RE: Evidence of Priority

RESPONSE DEADLINE

FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.

ANALYSIS OF ENLARGEMENT 43-10014

This claim is for an enlargement of use in T16S, R24E Section 12 on acres put into production after 1968 and before commencement of the Adjudication in 1987. It represents no increase in diversion rate from licenses 43-2552 and 43-2560, but an increase in volume of 140 AFA. Irrigated acres were expanded when more efficient sprinkler irrigation methods were instituted, specifically the addition of two pivot systems.

The claim as filed listed 142 acres of expansion. GIS analysis, based upon 1987 NAPP aerial photos, found that the total number of acres irrigated from ground water in 1987 was 417. The number of acres licensed for irrigation in Section 12 per transfer #2851 was 306. The number of acres represented by beneficial use claim 43-4018 was 76. Therefore, the extent of extent of expansion is 35 acres. *See excel spreadsheet attached.*

OPQ map DD80 dated August 1976 does not yet show the full extent of expanded use. The pivots in the NW ¼ and SE ¼ of section 12 are not there. ASCS photo from 1978 does show a pivot partially in use in the NW ¼. At this time, the NENW is still in BLM ownership with a sale to Durfees pending. From this information, I believe that it is more likely that the date of beneficial use of this right is 1978. Note that in 1978 there were still 40 acres being irrigated in section 23, as the Durfees had not transferred all acres into section 12. This 40 acres was subsequently transferred to the NENW section 12 when Durfees purchased the land from BLM.

CHRONOLOGY OF EVENTS
GROUND WATER RIGHTS OF ELBERT, BRUCE AND KENT DUFFEE

1968 - Licenses 43-2552 and 43-2560 issued for a combined total of 306 acres and 8.6 cfs. 43-2552 = 298 ac, 3.6 cfs. 43-2560 = 266 ac, 5.0 cfs. Field exam indicates total capacity of 5 wells is 8.73 cfs.

1970 - Statutory claim 43-4018 filed for 2 cfs on 320 acres priority date 1942 which is date first well was dug in NWSW Sec 12 per affidavit. POU is S ½ section 12. This claim is filed in response to claimed shortage in acres licensed to right holder in 1968.

1975 - T1935. First transfer moves 103 acres from Sec 14 to Sec 12. Combined limits are included in transfer, limiting diversion rate to 6.12 cfs for 306 acres.

1979 - Application for permit filed for 135 acres and 2 cfs in Section 14 with POD of well in Section 14. License 43-7140 is issued in 1989. Capacity of this well measured 2.10 cfs.

1982 - T2712. Second transfer filed to accurately show wells combined into one system. 1 well located in Sec 23, 1 well in Sec 14, 3 wells in section 12. No change in POU. Diversion rate for 43-2552 remains at 3.6 cfs. Diversion rate for 43-2560 now reduced to 2.52 cfs with combined limits remark.

1985 - T2851. Third transfer moves 40 acres from Sec 23 to Sec 12. POD in section 14 deleted from this system. Wells in system identified as 1 well in Sec 23, 2 wells in Sec 12. No change in diversion rate, acres remain at 306. *Memos outlining possible errors in licensed acres and combined diversion limit are added to the file.*

1987 - SRBA ground water claims filed include licensed rights 43-2552 & 43-2560 as transferred, Stat claim 43-4018, and an expansion claim 43-10014, all appurtenant to section 12. Also Licensed right 43-7140 for section 14.

2000 - SRBA review reveals errors in the numbers of acres licensed in 1968. The number of acres irrigated in Section 12 were shorted by approximately 76 acres. The number of acres and the combined

diversion rate for the two licenses 43-2552 and 43-2560 should properly have been 382 acres and 7.64 cfs. It appears, at this time, that the clearest way to rectify the error is by recommending the additional 76 acres and 1.5 cfs as beneficial use claim 43-4018 using the priority date of the junior license, 1-4-1963.

Enlargement claim 43-10014 is also found to be necessary for 35 acres that were developed in the late 1970s due to the addition of pivot sprinklers and the resulting increased efficiency of ground water usage.

RECOMMENDATION

Due to the co-mingling of groundwater rights into a common sprinkler system prior to commencement of the adjudication, the four rights involved should be recommended as a permissible place of use of 417 acres, broken down as follows:

43-2552 3.60 cfs for the irrigation of a certain 306 acres when combined with claim 43-2560, in a permissible place of use of 417 acres. Combined diversion rate with 43-02560 of 6.12 cfs.

43-2560 5.0 cfs for the irrigation of a certain 306 acres when combined with claim 43-2552, in a permissible place of use of 417 acres. Combined diversion rate with 43-2552 of 6.12 cfs.

43-4018 1.50 cfs for the irrigation of 76 acres within a permissible place of use of 417 acres.

43-10014 No additional diversion rate for the irrigation of 35 acres within a permissible place of use of 417 acres.

43-7140 - 2.0 cfs for the irrigation of 132 acres in Section 14. This well is a separate system from that in Section 12.

Combined limits for the wells associated with the rights listed above is 8.9 cfs, which includes the original licensed diversion rates of 3.6 and 5.0 cfs with an additional 0.3 cfs measured from the well in section 14 during the licensing exam for 43-7140.

Subsequent to the father Elbert Durfee's death in 1995, there has been a division in ownership of the property, and a split of the four rights between Kent and Bruce will be necessary. Groundwater rights are also subject to diversion rate limits when combined with surface water.
