Dear Mr. Jones,

I have been working on the ownership changes for the property you purchased from Larry Cooper. Be aware that some of the original rights needed to be split between you and Cooper which resulted in different water right numbers than those on the document you submitted. You still have a total of 8.17 cfs after the 1.65 cfs you sold to Harper and should be receiving copies of everything soon. The address on the original ownership change is outdated so please complete the enclosed Change of Address form and return it to our office so we can update the Department's records with the correct address.

Feel free to call if you have any questions.

Sincerely,

Jeanie Robertson

RECORDED AT THE REQUEST OF

LAND TITLE & ESBROW

REAL ESTATE PURCHASE AND SALE AGREEMENT
("Jones/Harper")

THIS AGREEMENT is made and entered into effective as of March 1, 2001 by and between **J. Max Jones and Diane D. Jones, husband and wife**, herein collectively referred to as, ("**Jones'**") and **Gary B. Harper and Susan Harper, husband and wife**, or their assignees, herein collectively referred to as ("**Harpers**").

RECITALS

A. Jones' own the following real and personal property:

1. The real property is located in Cassia County, Idaho, is legally described in the attached Exhibit A and shall be referred to in this Agreement as the "Real Property". Currently, irrigation water for the Real Property is provided by two wells on other property ("Other Jones' Property") owned by Jones' and described in Exhibit B. The licenses for the irrigation water from the two wells are 43-2478, 43-2332 and 10150B. 1.65 CFS, of the water, in total, from those wells irrigates the Real Property. That portion (1.65 CFS) of the water from the licenses listed above shall be referred to as the "Real Property Water Share".
2. The personal property is comprised entirely of one used, six tower Valley pivot and is hereafter identified in this Agreement as the "Irrigation Equipment".

B. Harpers desire to purchase and Jones' desire to sell all of the Real Property and Irrigation Equipment subject to terms of this Agreement.

NOW, THEREFORE, in consideration of the mutual covenants entered into herein, the parties hereby agree as follows:

1. **Sale of Real Property and Irrigation Equipment.** Jones' shall sell and Harpers shall purchase, upon the terms and conditions herein provided, the Real Property and the Irrigation Equipment. All appurtenances thereto that are now on or used in connection with the Real Property shall be included in this sale subject to the following:

- a. Any and all rights to sand and gravel, pursuant to the Royalty Agreement by and between Loughmiller Reclamation, LLC and Larry K. Cooper and Barbara Jean Cooper, dated February 16, 2000, as amended by an Addendum to Royalty Agreement, dated July 12, 2001 (copies of said Agreement and addendum are attached hereto as Exhibits C and D).

- b. That certain mineral rights reservation that is more particularly described in Exhibit E to this Agreement.

The parties agree that the water right is limited to 1.65 CFS of the water allowed by the licenses identified in the Recitals section of this Agreement.

2. **Improvements.** Except for a buried irrigation main line and fences there are no other improvements to the Real Property.

3. **Proration.** The parties shall prorate the 2001 real property taxes and Irrigation Equipment taxes, if any, as of January 1, 2001 based on the 2000 tax assessment. No proration of utility billings shall be required; however, Harpers shall make arrangements with Raft River Electric to have all utility services to the premises for 2001 and subsequent years billed to Harpers. Jones' shall be responsible for all of the taxes assessed against the Real Property and Irrigation Equipment for 2000 and prior years.

Inasmuch as the effective date of this Agreement is March 1, 2001, interest shall be charged on the purchase price at the rate of 9.35% per annum from that date to the date of closing. Harpers shall be required to pay Jones' the accrued interest at closing.

4. **Cooper Mortgage.** The Real Property is now encumbered by a mortgage ("Cooper Mortgage") executed by Larry Cooper and Jean Cooper in favor of U.S. Bank. As a condition for closing, Sellers shall be required to obtain a release of the Real Property from the Cooper Mortgage.

5. **Price.** The total price to be paid Jones' by Harpers for the Real and Irrigation Equipment described in this agreement shall be the sum of \$140,000.00, which sum shall be paid in cash at closing.

6. **Change in Point of Diversion.** The Real Property Water Share is appurtenant to the Real Property and, therefore, shall be transferred to Harpers with the transfer and conveyance of the Real Property; however, Harpers shall be required to change the "point of diversion" from the well located on the Jones' Other Property to the Real Property or any other location selected by Harpers. Harpers agree to complete "point of diversion" within 24 months of closing. In no event, however, shall Harpers be entitled to water from the well located on the Other Jones Property.

7. **Warranty Deed and Bill of Sale.** At the closing of this agreement, Jones' shall execute and deliver to the Harpers a warranty deed conveying to Harpers fee title to the Real Property, free and clear of all liens and encumbrances, but subject to real property taxes and

assessments for 2001 and subsequent years, rights reserved in federal patents, state or railroad deeds, building and use restrictions, building and zoning regulations and ordinances; all rights of way and easements claimed, established or of record; encumbrances which are not shown by public records and which were created prior to Seller's ownership of the property; discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records; unpatented mining claims and claims or title to water or water rights. At closing, Jones' shall also deliver to Harpers a bill of sale to the Irrigation Equipment. Title to the Irrigation Equipment shall be transferred free and clear of all encumbrances created by Sellers but without any other warranty. Except as otherwise provided in this Agreement, Harpers shall take both the Real Property and Irrigation Equipment AS IS.

8. **Title Policy Commitment.** At least 10 days in advance of closing, Jones' shall deliver to Harpers a title insurance policy commitment. Harpers shall have five days from receipt of the commitment or until 24 hours prior to closing, whichever period of time is less, within which to object in writing to the condition of the title as set forth in the title report. If the Harpers do not so object, Harpers shall be deemed to have accepted the condition of the title. It is agreed that if the title to said premises is not marketable, or cannot be made so at or prior to closing, this agreement shall be null and void at Harpers' option.

9. **Title Policy.** At closing, Jones' shall purchase for Harpers, from the sales proceeds paid at closing, a standard owner's title insurance policy in the sum of \$140,000, subject to the usual printed exceptions, easements and reservations of record and accruing taxes. The face amount of the policy is deemed to equal the purchase price of the Real Property.

10. **Professional Representation.** The parties understand that Merrill & Merrill, Chartered represents Jones' in this transaction and that Harpers have been advised to consult with their own counsel.

11. **Environmental Representation.** To Jones' best information and belief, Jones' represent, with respect to the Real Property and the water sources located on or under the Real Property, that there has been no spill, discharge, release, cleanup or contamination of or by any hazardous or toxic waste or substance.

12. **Pre-closing Default and Remedies.** If, after all conditions of this Agreement are satisfied and Jones' are ready and able to perform, Harpers refuse to consummate the sale, Jones' shall be entitled to any and all remedies allowed by Idaho law, including specific performance. If Harpers are ready and able to perform and Jones' refuse to close the transaction and deliver possession, Harpers shall be entitled to specific performance and all other remedies allowed by law. Moreover, if any condition preliminary to closing this Agreement is not timely satisfied, this Agreement shall be voidable at the option of the party in whose favor the unsatisfied condition runs.

13. **Attorney's Fees.** Should Jones', at their option, elect to employ the services of attorneys at law to represent them in the enforcement of any obligation undertaken by Harpers in connection herewith, or to participate in legal proceedings in any way connected herewith, as plaintiff or intervener, Harpers do hereby agree to pay Jones' a reasonable attorney's fee. In the event of litigation and in the event Harpers are the prevailing party, then Jones' shall pay Harpers a reasonable attorneys' fee.

14. **Notices.** Any communications between the parties hereto or notices provided hereunder may be given by mailing the same, postage prepaid, to Jones' and to Harpers at the addresses provided below:

15. **Binding on Heirs.** This agreement is binding upon the heirs, successors and assigns of the respective parties.

16. **No Waiver.** Jones'' waiver of any of the provisions of this contract shall not constitute a waiver with respect to any of the other terms provided by this contract.

17. **Closing.** Closing of this transaction shall occur at Title Land and Escrow Co's office on or before July 13, 2001. The parties shall bear their own legal expenses and the parties shall equally split the closing agent fee, and recording fees. The parties agree that Jones' shall pay the cost of title insurance. At closing Jones' shall sign the warranty deed and bill of sale required by this Agreement.

RE: OWNERSHIP CHANGE/SPLITS COOPER-HARPER

Dear Larry,

Enclosed are your new preliminary recommendations and layout for the rights involved with the property you sold to Gary Harper via Max Jones. (Even though I realize that you have sold to Jones, we have not received an ownership change request, so I am sending this to you.) Since all the groundwater rights were recommended to the entire place of use, they all needed to be involved in the split. I have split all the rights proportionately, except for Coe Creek (43-423A), where I reduced the 360 recommended acre place of use to the 368 retained acres. Transfers will need to be filed in order to separate the ground which is to have surface water from that which is to have groundwater.

The new right numbers are different from the original numbers because our new computer system no longer allows for us to add suffixes like A or B, but assigns a new number. At the bottom of the new recommendations, you can determine from which right they were split.

If you have any questions, feel free to give me a call at the office.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Jeanie'.

ADJUDICATIONS MEMO #21

TO: Adjudications Bureau Staff
FROM: Lynne Krogh-Hampe
DATE: April 25, 1989
RE: New Legislation

Two new sections have been added to Chapter 14, Title 42 of Idaho Code, which will impact the SRBA. Copies of the legislation are attached.

I. Changes in Use

The first new section is Section 42-1416A. This section permits a person who made a change in use of a water right prior to entry of the commencement order (November 19, 1987 in the SRBA) to claim the water right as changed in a general adjudication without filing an application for change with IDWR. IDWR can recommend the right as changed and the district court can decree it as changed if the change meets the substantive requirements of §42-222 (no injury, no expansion, and in the local public interest). Also, IDWR can recommend and the district court can decree the right as changed but subject to conditions where necessary to meet the substantive requirements of §42-222.

Note that this statute does not change the manner in which the presumption statute applies, nor does it change the requirement that a second notice of claim must be filed for an expansion (unless the expansion is limited to an expansion of irrigated acreage of a decreed right that occurred prior to entry of the commencement order).

II. Expansions in Critical Ground Water Areas

The second new section is §42-1416B. This section permits a person who has expanded the use of a ground water right in a critical ground water area after designation of the critical ground water area but before entry of the commencement order to claim the expansion in a general adjudication. The statute provides that the priority date for all such rights decreed shall be June 30, 1985.

Note that the original right could be a decreed right, a licensed right, a beneficial use right established prior to the mandatory permit system, and permits approved as of the date of entry of the commencement order. The original right claimed to have been expanded cannot be a beneficial use right in violation of the mandatory permit statute, or an application for permit approved after the date of entry of the commencement order.

Expansion includes any enlargement in use of the amount of water originally appropriated, such as expansions in irrigated acreage or additional purposes of use. It does not include an enlargement in the amount or rate of water diverted.

Re: Ownership Changes/Splits

An ownership change was received from Gary Harper for part of the Larry Cooper property (claims originally filed by Allen Bros.). He had a deed and sales agreement from Max Jones. I told him we needed a copy of the deed where Cooper sold to Jones, which he later provided. There were also problems with the way the sales agreement split the water rights. The property was recommended as a ppu of 494 acres, of which Harper bought about 126 acres. There were 3 licenses, two of which were recommended with the same 3 cfs when combined, a beneficial use right, an expansion claim, and one surface water right. The sales agreement specified that a total of 1.65 cfs of groundwater was to be conveyed, .55 cfs each from 43-2478, 43-2332, and 43-10150B. (43-2402 was recommended as limited to the same 3 cfs as 43-2478 but it was not mentioned in the agreement.) 43-10150B is an expansion claim and as such has no real diversion rate. I told him we could not honor that agreement as far as splitting the rights and ended up splitting all of the groundwater rights proportionately. The total diversion rate did end up to be 1.65 cfs and because of the expansion claim, Harper ended up with 29 expansion acres. Rights 43-13108 through 43-13117 now represent the splits of the old rights. I just reduced the place of use for the surface water right (43-423A) to the 368 acres which Cooper retained, since it was limited to 360 acres. Jones has not filed an ownership change for the rest of the property yet, so I left his part under Cooper for now...A Transfer will need to be filed by Harper to correct the points of diversion and by Cooper and Jones to separate the surface water (Cooper) from the groundwater (Jones).

Dear Mr. Cooper,

Enclosed is an ownership change form and profile reports of the claims our records still show in the name of Allen Enterprises. Please complete the form and return it along with the required information as soon as possible.

I have also enclosed some maps and a copy of the 1987 aerial photo of the area. Please indicate on the large copy of the ASCS map, the irrigation system layout for the Bartschi Bros. Property. (I already talked to Scott Allen about his irrigation system when I was out there several years ago.) Now that you own both properties, I may have to reanalyze my initial recommendations for the claims, but I'm mainly interested in how and what was being irrigated in 1987, the commencement of the adjudication. Changes that have been made after that will need to be dealt with through our transfer process. Please call when you receive this information so we can go over it together.

Sincerely,

RE: Adjudication Claims A43-00423A, A43-02332, A43-02402, A43-02478, and A43-10150A & B

Dear Mr. Allen,

I have completed an initial review of your claims and have prepared preliminary recommendations for the Director's Report, which will be mailed out in the next few months. Since some of my recommendations differ from the original claims, I thought I would inform you of my conclusions, in case you have any questions or would like to discuss them before they are filed.

During the field exam of your property in 1994, you indicated that your two parcels in sections 10 and 11 **could** be tied together, but **weren't at the time**. There is also a 40-acre strip of land between the two parcels, which is owned by someone else. For these reasons I have recommended only your Coe Creek decreed right (A43-000423A) to the acres in section 10. You claimed 120 acres, of which I determined 115 were irrigated. Allowing 1 inch per acre for the 115 acres, I recommended 2.3 cfs, instead of the 3 cfs claimed.

I recommended your other claims for the wells on your land in section 11. A43-02332 is recommended for the 3.2 cfs and 160 acres as claimed. A43-02402 and A43-02478 were based on licenses for 3 cfs each, one on 195 acres and the other on 184 acres. These two rights totally overlap in acreage and were for the same well. Since the original licensing field exam notes did not show the well as capable of producing 6 cfs (only 3.25 cfs were measured), I recommended both rights combined would be limited to 3 cfs.

You amended A43-10150 and split it into parts A and B, part A for the land in section 11 and part B for the land in section 10, claiming different priority dates. I disallowed the B portion because the wells did not irrigate the lands in section 10. I recommended the A portion for 24 acres, instead of the 45 claimed because out of the total of 379 irrigated acres in section 11, 355 were already covered by the licenses and you only needed 24. I also recommended the extra .25 cfs from the measurement mentioned above and changed the priority date to the beginning of the 1962 irrigation season.

All told, you will have 115 acres and 2.3 cfs (inch per acre) in section 10, and 379 acres in section 11 with a total of 6.45 cfs (0.017 cfs per acre, just under an inch per acre).

Please feel free to give me a call at the office if you would like to discuss these recommendations or should you have any questions.

Sincerely,

Jeanie Robertson

A43-02402 1/13/1954 3.0 cfs 195 Ac.

- well in SWSE of Section 11
- field exam done 7/20/1957

A43-02478 10/5/1959 3.0 cfs 184 Ac.

- same well as above in SWSE of Section 11
- field exam done 6/12/1962 (3.25 cfs measured)
- these 184 acres completely overlap the 195 acres from 43-02402 and the measurement of 3 cfs was from the same well. At no time in the notes does it show this well can produce more than the 3 cfs, so this license appears to be a duplicate of the other. I will recommend them both but with a combined limit of 195 acres and 3 cfs.

A43-10150 was originally filed as an expansion claim. It was later amended and split into parts A & B; A for the lands in Section 11, with a priority date of 4/1/1956, and B for the lands in Section 10, with a priority date of 6/30/1985.

A43-10150A 4/1/56 0.9 cfs 45 Ac.

The 45 acres are in the NWSE and the SWSE of Section 11. About 30 acres in this area appear to be irrigated in the '62 & '68 aerial photos and could be recognized as a beneficial use right. Gis of the parcel shows a total of 379 irrigated acres. Of these 379 acres, 355 are covered by licenses, so this right will be reduced to 24 acres. There was an extra .25 cfs measured during the licensing exam for 43-02478 and can be recommended under this claim. The priority date will be changed to the beginning of the 1962 irrigation system, for lack of any better evidence at this time. An additional volume of 96 AF (24 ac. x 4) can also be recognized.

A43-10150B 6/30/85 2.4 cfs 120 Ac.

These 120 acres are over in Section 10 and claim to be an expansion of the licensed rights over in Section 11. Since my field notes indicate that the two systems (groundwater & surface water) were supposedly never tied together (even though they could have been and there's a 40 ac strip between the two parcels which is owned by someone else), I have recommended this right for disallowal and recommended the 115 irrigated acres, out of the 120 claimed, under 43-00423 A.

Substance of Communication While doing a field exam on the neighboring property, I was able to talk to Scott Allen about his claims. He told me where the two wells were located, how his irrigation lines ran, and we outlined the acres in green on my ASCS map that he actually irrigates. He also gave me an updated address and telephone number for the claims. He declined to sign the Robin Wells Release form...
