- (2) When the stream flow at the West Fork Bruneau River quantification site is greater than or equal to 638 cfs (as adjusted by accounting for upstream junior depletions), the United States claims all flows.
  - (3) The quantification site for the flows identified above at the West Fork Bruneau River quantification site is the West Fork Bruneau River located in NW1/4SE1/4NE1/4, Sec. 05, T.13S., R.07E., Boise Meridian; Latitude 42° 19' 40" N, Longitude 115° 39' 12" W (NAD 83).
- b. This claimed water right does not prohibit the appropriation, diversion and use of water within the West Fork Bruneau River Basin upstream from the ending point, as identified in element 5.b. below ("West Fork Bruneau Wild and Scenic River Basin"), when the stream flow at the West Fork Bruneau River quantification site exceeds the flow amount in Section 3.a.(1) and is less than 638 cfs.
  - c. The discharges identified in the table in Section 3.a.(1) above are intended to reflect the 20% unimpaired exceedance discharges at the West Fork Bruneau River quantification site for each semi-monthly period (except for any semi-monthly period for which the discharge identified as necessary to protect recreation values exceeds the 20% exceedance discharge for that semi-monthly period). The 638 cfs discharge identified in the text of Section 3.a.(1), and in Section 3.a.(2) and Section 3.b. above, is intended to reflect the unimpaired 1.5 year peak flow recurrence interval discharge at the West Fork Bruneau River quantification site. These discharges have been calculated based upon the best available hydrologic data and without taking into account impairment of discharges (existing upstream depletions). If additional hydrologic data and/or information concerning impairment of discharges become available that indicate a need for adjustment of the stated exceedance discharges, and/or the 1.5 year peak flow recurrence interval discharge, the claimed discharges may be modified accordingly.
  - d. This claimed water right precludes any diversion of water out of the watershed of the West Fork Bruneau Wild and Scenic River Basin.

**4. Priority date claimed:**
