STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA)
Case No. 39576) **NOTICE OF CLAIM**
) **Federal Reserved Water Right 55-13898**
) **Dickshooter Creek**
) **Wild & Scenic River**

1. **Name and address of claimant:**

UNITED STATES OF AMERICA, on behalf of the
Department of Interior, Bureau of Land Management
Idaho State Office
1387 S. Vinnell Way
Boise, Idaho 83709-1657

2. **Source of water:**

Dickshooter Creek, tributary to Deep Creek

3. **Quantity of water claimed:**

a. Stream flows at the Dickshooter Creek quantification site:

- (1) When the stream flow at the Dickshooter Creek quantification site, as identified in Section 3.a.(3) below ("Dickshooter Creek quantification site"), is less than 146 cfs, the United States claims the following flows (subject to paragraph 3.c. below):

Period of Use	Discharge (cfs)	Period of Use	Discharge (cfs)
January 1-15	4.22	July 1-15	8.17
January 16-31	4.025	July 16-31	6.78
February 1-15	4.09	August 1-15	5.38

February 16-28(29)	3.85	August 16-31	5.58
March 1-15	3.61	September 1-15	5.78
March 16-31	14.56	September 16-30	6.55
April 1-15	25.5	October 1-15	7.32
April 16-30	28	October 16-31	7.83
May 1-15	30.5	November 1-15	8.33
May 16-31	23.95	November 16-30	8.69
June 1-15	17.4	December 1-15	9.04
June 16-30	12.79	December 16-31	5.77

- (2) When the stream flow at the Dickshooter Creek quantification site is greater than or equal to 146 cfs (as adjusted by accounting for upstream junior depletions), the United States claims all flows.
 - (3) The quantification site for the flows identified above at the Dickshooter Creek quantification site is the Dickshooter Creek located in NW1/4NW1/4, Sec. 32, T.12S., R.02W., Boise Meridian; Latitude 42° 20' 34.451" N, Longitude 116° 36' 23.189" W (NAD 83).
- b. This claimed water right does not prohibit the appropriation, diversion and use of water within the Dickshooter Creek River Basin upstream from the ending point, as identified in element 5.b. below ("Dickshooter Creek Wild and Scenic River Basin"), when the stream flow at the Dickshooter Creek quantification site exceeds the flow amount in Section 3.a.(1) and is less than 146 cfs.
 - c. The discharges identified in the table in Section 3.a.(1) above are intended to reflect the 20% unimpaired exceedance discharges at the Dickshooter Creek quantification site for each semi-monthly period (except for any semi-monthly period for which the discharge identified as necessary to protect recreation values exceeds the 20% exceedance discharge for that semi-monthly period). The 146 cfs discharge identified in the text of Section 3.a.(1), and in Section 3.a.(2) and Section 3.b. above, is intended to reflect the unimpaired 1.5 year peak flow recurrence interval discharge at the Dickshooter Creek quantification site. These discharges have been calculated based upon the best available hydrologic data and without taking into account impairment of discharges (existing upstream depletions). If additional hydrologic data and/or information concerning impairment of discharges become available that indicate a need for adjustment of the stated exceedance discharges, and/or the 1.5 year peak flow recurrence interval discharge, the claimed discharges may be modified accordingly.
 - d. This claimed water right precludes any diversion of water out of the watershed of the Dickshooter Creek Wild and Scenic River Basin.

4. Priority date claimed:

March 30, 2009

5. Point of diversion:

There is no diversion associated with this instream flow water right. The legal description of the beginning and ending points of the instream flow water right are as follows:
