ALL MATTERS RAISED IN THE CLAIMANTS' ANSWER,
AFFIRMATIVE DEFENSES AND PRAYER FOR RELIEF.

REASONS SUPPORTING EACH BOX CHECKED

In response to the claimant's description of interest in the water right, IDWR responds as follows: IDWR recommended the water right in question based on beneficial use with the priority date claimed by the claimant. The claimant here asserts that the right is decreed with a 1903 priority date. To the extent that the claimant is now attempting to assert a different basis for the claim and priority date, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

In response to Statement of the Objection items 3 and 3.a, and all allegations of the objection regarding those items, IDWR responds as follows: (1) it recommended the amount of water it determined was being beneficially used; (2) the claimant is not entitled to any amount greater than that which is beneficially used (Idaho Code Secs. 42-104 and 42-1402); (3) the recommendation of the director to the SRBA Court as to how the right should be decreed does not constitute a taking because it is simply a recommendation and not a final determination of the right; and (4) the eventual decree by the SRBA Court of the amount of water beneficially used, even if less than the amount previously decreed, will not constitute a taking because the right is limited to that amount beneficially used. IDWR further responds that the claimant originally claimed 11 cfs under this right. Per the objection the claimant now seeks 20 cfs. By here asserting a quantity greater than the quantity claimed, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

In response to Statement of the Objection 4, and all allegations of the objection regarding this item, IDWR responds that it recommended the priority date as claimed. By now seeking an earlier priority date the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report

-(Over)

is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

In response to Statement of the Objection item 10 and all allegations of the objection regarding that item, IDWR responds as follows: Because the use of water under this right is nonconsumptive, no consumptive use volume was either claimed or recommended. The claimant's objection to this item is in error.

In response to Statement of the Objection item 11 and all allegations of the objection regarding that item, IDWR responds as follows: There is an error in the remarks in the description of this water right in the director's report. The recommendation should be corrected as shown in the attachment entitled "Recommended Water Rights Acquired Under State Law." In further response to Statement of the Objection item 11, IDWR responds that it has authority pursuant to Idaho Code Sec. 42-1411(2)(j) to include in its recommendations of water rights acquired under state law and recommended in the director's report "such other matters as are necessary to define the right." The remark or remarks objected to are necessary to adequately describe and define this water right.

In response to Statement of the Objection item 14, and all allegations of the objection regarding that item, see attached "IDWR's Response to Answer Affirmative Defenses and Prayer for Relief of Claimant".

In response to the sentence listed in Changes to the Director's Report, whereby the claimant attempts to "reserve the right to claim all purposes of use and quantities of use as shown by the evidence at trial," IDWR responds as follows: Insofar as this purported reservation of rights may constitute an attempt to reserve the right to amend at trial the claimant's notice of claim, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim just as a party must obtain leave of the court to file a late claim after the director's report is filed.

IDWR'S RESPONSE TO ANSWER, AFFIRMATIVE DEFENSES AND PRAYER FOR
RELIEF OF CLAIMANT

This portion of the response addresses the multi-page attachment to the objection (hereinafter "the attachment"), wherein the claimant admits or denies all sections of Parts I, II, and III of the director's report, asserts 27 affirmative defenses, and alleges a prayer for relief. The attachment contains the following sections, corresponding to the various sections of the director's report:

- (1) I. GENERAL RESPONSE

 - (33) DIRECTOR'S REPORT FOR REPORTING AREA 3 (BASIN 36), (DIRECTOR'S REPORT PART III)

The attachment also contains part VIII, AFFIRMATIVE DEFENSES (pp. 20 through 28) and a PRAYER FOR RELIEF (untitled, p. 28).

In response to each of the items enumerated above IDWR responds that pursuant to Section 4 a.(2)(c) of SRBA Administrative Order 1, Rules of Procedure, IDWR generally denies each and every allegation, if any, contained in each enumerated portion of the attachment. IDWR affirmatively responds that neither SRBA Administrative Order 1, Rules of Procedure, nor Title 42, Chapter 14, Idaho Code, make provision for IDWR to affirm, amplify, or otherwise respond to the claimant's admissions, or to deny the claimant's denials, and that IDWR therefore does not believe that it is required to do so. Title 42, Chapter 14, Idaho Code solely defines the content and scope of the director's report. It is to contain a description of the water system and is to provide a recommendation as to each water right claimed and as to those matters necessary for administration of those water rights. Therefore, the content and scope of the objection is limited to those same matters. The attachment to the present objection asserts or otherwise raises matters not directly addressing the elements of the water right as recommended, the description of the water system, or the general provisions. Rather, the attachment raises broad issues as to the constitutional, statutory and administrative efficacy of the entire adjudication process. All such issues should be raised by means of motions to designate basinwide issues and similar procedural vehicles specifically designed to provide for basinwide notice and participation. They should not be permitted to divert the focus of any individual subcase away from the issues directly connected to the elements of the water right and the administration thereof. Therefore, because the attachment to the present objection is not within the scope of the statutory purpose of an objection it should be stricken.

However, in the event that the court should determine that all or part of the attachment is properly within the scope of the objection, IDWR further responds as follows:

IDWR affirmatively responds that all statements within the director's report are properly included therein pursuant to Title 42, Chapter 14, Idaho Code, and in particular pursuant to Idaho Code §§ 42-1411 and 42-1412(8); and that the provisions of the Idaho Rules of Civil Procedure regarding pleadings are inapplicable to the extent that they are in conflict with the statutory requirements. Therefore IDWR denies all allegations directed at the contents of the director's report.

As to the enumerated portions of the attachment addressing the listings of recommended water rights, abstracts of federal reserved water right claims, or negotiated agreements, other than the individual recommendation that is the subject of this objection, IDWR responds that such claims or agreements are not brought before this court by this objection.

Responding to the 27 affirmative defenses asserted in the attachment, IDWR generally denies each and every affirmative defense asserted. IDWR further responds that affirmative defense numbers 1, 2, 4, 5, 10, 11, 12, 18, and 22, asserting various violations of civil or constitutional rights, fail to comply with the requirements I.R.C.P. 9(b) providing that in all averments of violation of civil or constitutional rights the factual circumstances constituting such violation must be stated with particularity. Accordingly, IDWR asserts that those affirmative defenses should be stricken.

In response to that portion of the multi-page attachment to the objection wherein the claimant asserts a prayer for relief, IDWR responds as follows:

1. IDWR denies that the director's report asserts any claims against the claimant; rather, the director's report contains only the recommendation of the director as to how the claimant's water right should be decreed and administered.
2. IDWR denies that the claimant is entitled to have the water right decreed as claimed unless in the director's report the water right has been recommended as claimed.
3. IDWR denies that any acts upon its part constitute the taking of private property for which just compensation should be allowed and awarded.
4. IDWR denies that the claimant is entitled to recover court costs and reasonable attorney fees.
5. IDWR denies that the claimant by this objection has raised any claims against IDWR entitling such claimant to any relief other than the eventual judicial determination and decree of the various elements of the claimant's water right, if any, and of those related matters necessary to describe and administer that water right.
