The United States; the State)
of Idaho; and all Claimants to)
the use of water from the Snake)
River Basin Water System,)

Respondents.)
_____)

I. GENERAL INFORMATION

1. Person responding to objection:

Name: R. KEITH HIGGINSON, DIRECTOR

Address: IDAHO DEPARTMENT OF WATER RESOURCES
P.O. BOX 44449
BOISE, ID 83711-4449

Briefly describe your interest in this water right:

IDWR is required to file a response to an objection to part
I of the director's report pursuant to I.C. section 42-1412(2).

(Over)

2. Person who filed objection:

Name: JOHN A SANDERS FAMILY LTD PARTNERSHIP
Address: 2107 HOOVER DRIVE
SANTA CLARA CA 95051

3. If this response is filed by an attorney:

Attorney Name(s): NICHOLAS B. SPENCER

Attorney Address: DEPUTY ATTORNEY GENERAL(S)
IDAHO DEPARTMENT OF WATER RESOURCES
P.O. BOX 44449
BOISE, ID 83711-4449

Attorney Phone No.: (208) 327-7900

II. STATEMENT OF THE RESPONSE

3. ☒ Quantity: I respond to the objection concerning:
- 3a. ☒ The total quantity of water used in cubic feet per second.
8. ☒ Period of Year: I respond to the objection concerning the period of year when water is used or is necessary for the purpose stated.
11. ☒ Remarks: I respond to the objection concerning the "remarks" listed with the water right.
14. ☒ Other: I respond to the objection concerning:

ATTACHMENT

REASONS SUPPORTING EACH BOX CHECKED

There is a typographical error with the name of the appropriator in the description of this right. The recommendation should be corrected as shown in the attachment entitled "Recommended Water Rights Acquired Under State Law".

In response to Statement of the Objection items 3, 3.a., 11, and 14, and all allegations of the objection regarding these items, IDWR responds as follows: The claimant filed three claims, nos. 36-02382, 36-07016, and 36-10174, to rights diverted from the same well to use on the same 377 acres. Right no. 36-02382 is based on a license issued by IDWR. The licensing field exam conducted in 1962 measured the capacity of the diversion system as 4.85 cfs, and this right was licensed, claimed, and recommended for 4.85 cfs. The issuance of the license was a final administrative determination of the amount of water appropriated from this well in 1962, and the claimant is bound by that determination. In 1968, after enactment of the mandatory permit statute for appropriation of groundwater, the claimant filed application for permit no. 36-07016, seeking to appropriate an additional .50 cfs from this well. The licensing field exam conducted in 1973 confirmed that the system had the capacity to divert the additional .50 cfs, and that the additional .50 cfs had been diverted and used for the purposes described in the permit. This right was licensed for .50 cfs, and was claimed and recommended for .50 cfs. Appropriation for any additional diversion rate can be made only in accordance with the statutory permit and license procedure. Right no. 36-10174 is an expansion of the first two rights pursuant to Idaho Code Section 42-1416(2) which confirms the right to use the licensed diversion rate for the irrigation of lands in addition to the number of acres licensed under the first two rights. That section does not allow appropriation of a diversion rate in addition to the diversion rate licensed under the first two rights.

In response to Statement of the Objection item 8, and all allegations of the objection regarding this item, IDWR responds as follows: Idaho Code Sec. 42-1411(2)(g) requires the director to determine the period of use of each water right acquired under state law that is recommended in the director's report. IDWR's irrigation season of use standards have evolved over time as better technical information has become available. A necessary consequence of this is that, depending on when a particular license was issued, water rights in the same area have been licensed inconsistently, some licenses being issued with different lengths of season listed and some being issued with no season of use listed. To remedy this problem IDWR has developed irrigation season of use standards for various climatic areas throughout the state based on a 75% chance of a 24 degree fahrenheit frost. The period of the year during which this water right may be used is consistent with the standard irrigation season of use for the area in which the place of use of this water right is located. The director's report does not prohibit

(Over)

pre-season or post-season irrigation; subject to the conditions set forth in general provision 12b of the director's report, water may be used for irrigation outside the standard season of use.

In further response to this objection item, IDWR responds that it recommended a longer season of use than claimed based on the above standards. By seeking a yet longer season of use in the objection, the claimant improperly seeks to use the objection process to amend the notice of claim. A claimant must obtain leave of the court to amend a claim after the director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

CHANGES TO THE DIRECTOR'S REPORT
