ALL MATTERS RAISED IN THE CLAIMANT'S ANSWER,
AFFIRMATIVE DEFENSES AND PRAYER FOR RELIEF.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 1, and all allegations of the objection regarding this item, IDWR responds as follows:

After the director's report was filed a notice of change in ownership was filed with IDWR. The name and address of the claimant should be changed as shown in the attachment entitled "Recommended Water Rights Acquired Under State Law."

In response to Statement of the Objection item 10 and all allegations of the objection regarding this item, IDWR responds as follows:

The maximum quantity in AFY is a diversion volume, and not a consumptive use volume. This diversion volume was erroneously included in the description of this right, and should be deleted as shown in the attachment entitled "Recommended Water Rights Acquired Under State Law."

In response to Statement of the Objection item 11 and all allegations of the objection regarding this item, IDWR responds as follows:

Idaho Code section 42-1411(2) provides that the director's report shall include "such other matters as are necessary to define the right." The facility volume correctly describes the current use of water diverted for fish propagation purposes. Description of the current use is necessary to define the right and to prevent future expansions in use of the right. The recommendation of the director to the SRBA court as to how the right should be decreed does not constitute a taking, because it is simply a recommendation and not a final determination by the court; the eventual decree by the SRBA Court of the water right based on the actual beneficial use of the water diverted does not constitute a taking, because a water right is limited to the actual beneficial uses of the water diverted.

In response to Statement of the Objection item 14 and all allegations of the objection regarding this item, IDWR responds as follows:

See attached "IDWR's Response to Answer, Affirmative Defenses and Prayer for Relief of Claimant."

In response to the sentence listed in Changes to the Director's Report, whereby the claimant attempts to "reserve the right to claim all purposes of use and quantities of use as shown by the evidence at trial", IDWR responds as follows:

Insofar as this purported reservation of rights may constitute an attempt to reserve the right to amend at trial the claimant's notice of claim, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim just as a party must obtain leave of court to file a late claim after the director's report is filed.

The notice of claim attached to this response is a copy.
IDWR will supplement its response with the original claim at a
later date.

The attachment also contains part VIII, AFFIRMATIVE DEFENSES (pp. 20 through 28) and a PRAYER FOR RELIEF (untitled, p. 28).

In response to each of the items enumerated above IDWR responds that pursuant to Section 4 a.(2)(c) of SRBA Administrative Order 1, Rules of Procedure, IDWR generally denies each and every allegation, if any, contained in each enumerated portion of the attachment. IDWR affirmatively responds that neither SRBA Administrative Order 1, Rules of Procedure, nor Title 42, Chapter 14, Idaho Code, make provision for IDWR to affirm, amplify, or otherwise respond to the claimant's admissions, or to deny the claimant's denials, and that IDWR therefore does not believe that it is required to do so. Title 42, Chapter 14, Idaho Code solely defines the content and scope of the director's report. It is to contain a description of the water system and is to provide a recommendation as to each water right claimed and as to those matters necessary for administration of those water rights. Therefore, the content and scope of the objection is limited to those same matters. The attachment to the present objection asserts or otherwise raises matters not directly addressing the elements of the water right as recommended, the description of the water system, or the general provisions. Rather, the attachment raises broad issues as to the constitutional, statutory and administrative efficacy of the entire adjudication process. All such issues should be raised by means of motions to designate basinwide issues and similar procedural vehicles specifically designed to provide for basinwide notice and participation. They should not be permitted to divert the focus of any individual subcase away from the issues directly connected to the elements of the water right and the administration thereof. Therefore, because the attachment to the present objection is not within the scope of the statutory purpose of an objection it should be stricken.

However, in the event that the court should determine that all or part of the attachment is properly within the scope of the objection, IDWR further responds as follows:

IDWR affirmatively responds that all statements within the director's report are properly included therein pursuant to Title 42, Chapter 14, Idaho Code, and in particular pursuant to Idaho Code §§ 42-1411 and 42-1412(8); and that the provisions of the Idaho Rules of Civil Procedure regarding pleadings are inapplicable to the extent that they are in conflict with the statutory requirements. Therefore IDWR denies all allegations directed at the contents of the director's report.

As to the enumerated portions of the attachment addressing the listings of recommended water rights, abstracts of federal reserved water right claims, or negotiated agreements, other than the individual recommendation that is the subject of this objection, IDWR responds that such claims or agreements are not brought before this court by this objection.

Responding to the 27 affirmative defenses asserted in the attachment, IDWR generally denies each and every affirmative defense asserted. IDWR further responds that affirmative defense numbers 1, 2, 4, 5, 10, 11, 12, 18, and 22, asserting various violations of civil or constitutional rights, fail to comply with the requirements I.R.C.P. 9(b) providing that in all averments of violation of civil or constitutional rights the factual circumstances constituting such violation must be stated with particularity. Accordingly, IDWR asserts that those affirmative defenses should be stricken.

In response to that portion of the multi-page attachment to the objection wherein the claimant asserts a prayer for relief, IDWR responds as follows:

1. IDWR denies that the director's report asserts any claims against the claimant; rather, the director's report contains only the recommendation of the director as to how the claimant's water right should be decreed and administered.
2. IDWR denies that the claimant is entitled to have the water right decreed as claimed unless in the director's report the water right has been recommended as claimed.
3. IDWR denies that any acts upon its part constitute the taking of private property for which just compensation should be allowed and awarded.
4. IDWR denies that the claimant is entitled to recover court costs and reasonable attorney fees.
5. IDWR denies that the claimant by this objection has raised any claims against IDWR entitling such claimant to any relief other than the eventual judicial determination and decree of the various elements of the claimant's water right, if any, and of those related matters necessary to describe and administer that water right.
