II. STATEMENT OF THE RESPONSE

8. ☒ Period of Year: I respond to the objection concerning the period of year when water is used or is necessary for the purpose stated.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 8, and all allegations of the objection regarding this item, IDWR responds as follows: Idaho Code Sec. 42-1411(2)(g) requires the director to determine the period of use of each water right acquired under state law that is recommended in the director's report. IDWR's irrigation season of use standards have evolved over time as better technical information has become available. A necessary consequence of this is that, depending on when a particular license was issued, water rights in the same area have been licensed inconsistently, some licenses being issued with different lengths of season listed and some being issued with no season of use listed. To remedy this problem IDWR has developed irrigation season of use standards for various climatic areas throughout the state based on a 75% chance of a 24 degree fahrenheit frost. The period of the year during which this water right may be used is consistent with the standard irrigation season of use for the area in which the place of use of this

water right is located. The director's report does not prohibit pre-season or post-season irrigation; subject to the conditions set forth in general provision 12b of the director's report, water may be used for irrigation outside the standard season of use.

CHANGES TO THE DIRECTOR'S REPORT

The director proposes no changes to the description of this claim in the Director's Report.
