The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

RE: SRBA Claim A71-00004A

Dear Mr. Cutler:

Please find enclosed the "Change of Ownership" form for recording of the splitting of your SRBA claim as we discussed in our meeting on May 12, 1993 in Stanley. Please complete the form indicating what portion of your claim is to be transferred to the Reeses with the motel.

As we discussed for me to complete my field review I will need to examine your pumping system. As you indicated your old gas powered pump has expired and will be replaced this summer so I will need to observe its replacement this summer to complete my review. I will need to observe what irrigation was in existence in 1987; all lands not water at that time will not be included. If it is the intention that two replacement pumps are to be installed; one for you and one for Mr. Reese's parcel, then technically this is the addition of a point of diversion which requires the approval of a transfer application. (By copy of this letter to Mr. Reese I will send him the transfer application) If it is the intent that the replacement pump will supply both properties then the transfer application is not required.

Another item which is important to discuss is the basis of your claim. You have based your SRBA Claim on an old water right decree #71-00004 which was decreed to Dan J. Cavanagh with a priority of 06/01/1910 at a rate of 2.00 cfs. This old decree is also basis for SRBA Claim A71-00004B in the name of Piva which is essentially claiming all of the right or 2.00 cfs. Since there is a question of ownership for this right you will need to provide evidence to support your claim. (By copy of this letter Piva's will also be informed of this requirement) This evidence would be in the form of a review of the deeds which have split out the land from the old Cavanagh place. Assuming your land has always been watered from Meadow Creek and the deed trail is silent as to not specifically reserving water when the lands were split then you may also have a portion of the other Cavanagh right 71-00005 for 6.40 cfs from Meadow Creek with a priority of 07/01/1910. To resolve this you may also approach Piva and work this matter out. If it cannot be worked out that you have a portion of any of the old decrees your next

PAGE 2

option is to modify the basis of your claim to beneficial use and then you will need to provide evidence as to when your diversion was first developed. To be valid your use will have to have been established prior to 1971 or otherwise your claim will be recommended to be disallowed. I know this sounds rather complicated but if you have questions please feel free to contact our office.

Sincerely,

A handwritten signature in dark ink, appearing to read "A. D. Merritt", written over the typed name.
