Identification Number Change

Dear Mr. and Mrs. Russell:

The Identification Number of your Notice of Claim to a Water Right has been changed from A71-00025 to A71-00025B. The suffix has been added in order to distinguish your claim from other claims that may claim a portion of the same original water right. This change does not affect your claim in any other way.

Enclosed is a computer-generated copy of your claim with the new Identification Number. Refer to this record number in any future inquiries or correspondence.

Sincerely,

Jeanie Robertson

RE: Notice of Error Response on SRBA Claim 71-0025B

Dear Mr. Russell,

Enclosed please find a Change of Ownership form used to notify use of these changes. It appears you wish to remove a party from the water right, then complete and return the form as instructed.

Your request for a change in your water right to that listed on the Notice of Error reply form has been reconsidered and the file reviewed. The current documentation in the file limits the right to the amounts presently recommended. Basically, the IDWR field examiner found your system could only divert 0.43 cfs not the 2.00 cfs as claimed. The same exam found only 1.1 acres irrigated; the balance of the lot appears to be part of a naturally wet area due to a high water table and would not benefit from additional irrigation waters. You are welcome to review the file contents if you wish.

If you have additional evidence that would support your claim to a diversion of 2.00 cfs or proof of the irrigation of 10 acres, I would be willing to consider any documentation you may be able to provide.

Please feel free to contact me at our office if you have further questions on this matter.

Sincerely,

STEVE CLELLAND
Sr. Water Resource Agent

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

Evaluation of Rights Based on Decree 71-00025, from Iron CK.

This decreed right was decreed to Andrew Critchfield along with rights 71-00022, 71-00023 & 71-00024 all of which were from Goat Creek. At the time of the decree Critchfield owned 160 Ac. in Sec 8 T10N R13E. This summer I investigated the diversions from Iron Creek and found the only point of diversion which could have historically served the Critchfield property. (See attached map for description of old Critchfield property and location of ditch found.) The ditch is the highest P/D on Iron CK and can only serve lands in the SE NW Sec 8 which belonged at one time to Critchfield. The other tracts of land would have had to be served by the Goat CK rights due to the lay of the land if at all. (Actually much of Critchfield's land was not found to have been irrigated since it lies on a ridge between Iron CK & Goat CK and continues to be covered by **MICROFILMED** pine forest. There are two claims filed **OCT 27 1994** based on decree 71-00025. A71-00025A was

POOR ORIGINAL

filed by Cannon. A71-00025B was filed by Russell. On 6/3/93 I first located the diversion from Iron CK however it was not being used. Between 6/3 & 6/10 I attempted to contact Cannon & Russell and finally got hold of Mrs. Russell. I told her I needed to measure the water and she indicated they would have to clear the ditch and get it going. She didn't know who Cannon was or where their property was. On 6/10/93 I returned to the area and found the diversion taking water. That day the creek was high & the ditch was taking about all it could. I meas. 0.43 cfs. On 6/16/93 I was in Chellis and was able to get copies of plats showing the ownership of the SENE Sec 8. That tract is split into 4 10Ac. tracts. Russell & Cannon own the two southern tracts. On 6/17/93 I met Mrs. Russell and she described their use of the water on their 10Ac. tract. They water the west portion of the tract around the house. The remaining portion of the tract east of the house is **MICROFILMED** boggy area full of rushes & bushes. ~~Oct 27 1994~~ It is impossible to irrigate this area.

On 6/10/93 it was observed that only a trickle of water was getting to the Russell property which was estimated to be approx. 10% of what was initially measured. No measurement was made but it was estimated to be less than 20 gpm.

On 6/17/93 when I talked with Mrs. Russell they had shut off the water since it had run & flooded into the house. She said that the water table was high and they were only diverting since I had to measure the water. No other use of the water was being made on the other properties. There was no ditch observed running to the Cannon Property. On 6/29/93 I met Jack Furey and discussed the Cannon property. He indicated Mrs. Cannon was his sister and knew they didn't use the water. Based on my review I recommend A71-00025A be disallowed & A71-00025B be allowed to the extent of 0.43 cfs.

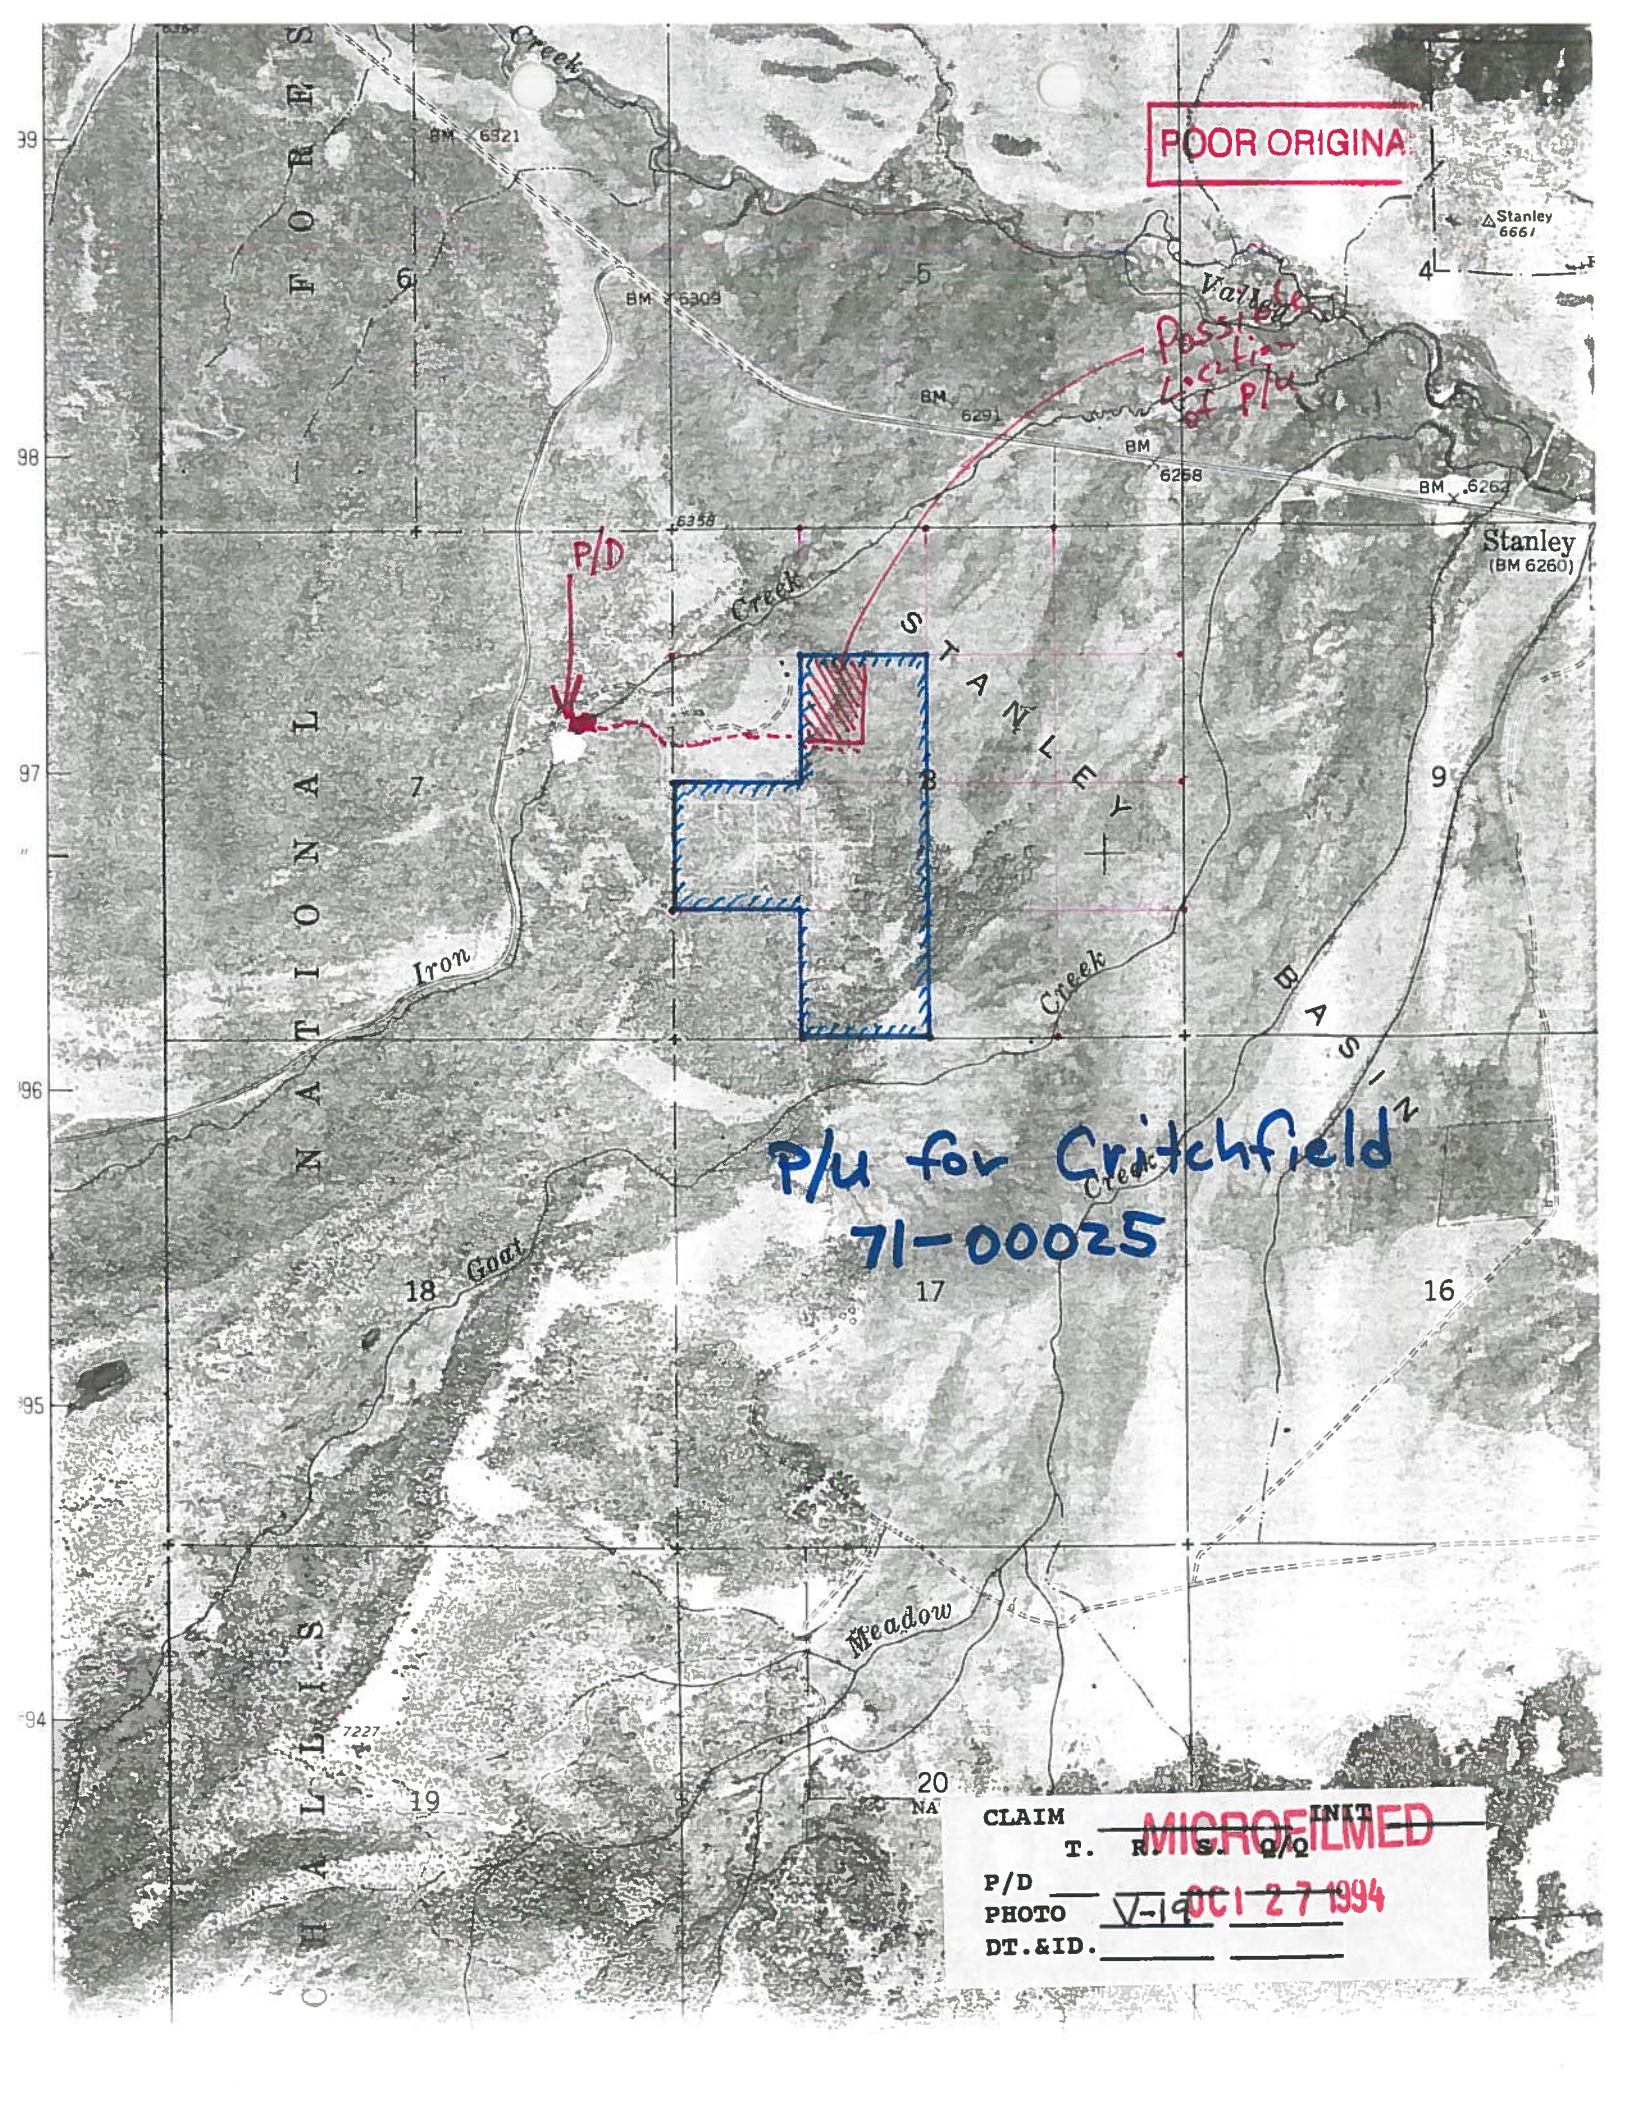

Allow 0.04 cfs irrig. requirement & 0.39 conveyance loss. Area irrigated = $150' \times 320' \approx 1.1 \text{ Ac.}$

→ Allow $0.03 \times 1.1 \approx 0.04 \text{ cfs}$
