94939-1003

2. Date of Priority: JUN 1, 1904

3. Source: MC GOWAN CREEK
HANNA CREEK

Trib. to: VALLEY CREEK
VALLEY CREEK

4. Point of Diversion:

Township	Range	Section	1/4	of	1/4	of	1/4	Lot	County
11N	12E	2	SW		SW		SE		CUSTER
		3	NW		NE		SW		CUSTER

5. Description of diverting works:
COLLECTION DITCH, ROCK DIVERSIONS

6. Water is used for the following purposes:

Purpose	From	To	C.F.S	(or)	A.F.A.
IRRIGATION	04/01	11/01	0.140		

7. Total Quantity Appropriated is:
0.140 C.F.S. (and/or)

A.F.A.

8. Total consumptive use is

Acre Feet Per Annum.

9. Non-irrigation uses:

10. Place of Use:

Township	Range	Section	1/4	of	1/4	Lot	Use	Acres
11N	12E	11	NE		NE		IRR	1.2
			SW		NE		IRR	7.7
			SE		NE		IRR	4.1

10. Place of Use: Continued

Section Acres 13.0

Total Acres 13.0

11. Place of use in counties: CUSTER

12. Do you own the property listed above as place of use? YES

13. Other Water Rights Used:

A71-00040G & A71-10136B

14. Remarks:

P/U IS H.E.S. 109.

THIS IS A 2/3 PORTION OF THE WR 71-00039.

THE ORIGINAL CLAIM A71-00039B WAS SPLIT BASED UPON A FORMER OWNER SIGNATURE ON FORM 42-1409(7). THE SPLIT IS AS FOLLOWS:

PART C TO BERMAN FOR .64CFS

PART D TO BRUBAKER FOR .16CFS FOR LOT 6 OF THE THOMPSON CREEK RANCH SUBDIVISION. KKC 5-8-95

CLAIM SPLIT ON 7-26-1996 BY KKC. OWNERSHIP CHANGE BASED UPON SF 1409-(7) SIGNED BY NEW OWNER WITH WARRANTY DEED. PROPORTIONATE SPLIT BASED UPON THE RECOMMENDED PLACE OF USE TABLE I CREATED.

PART E TO HILL FOR 0.35 CFS (FOR LOTS 1,2, & 3 OF SUBDIVISION)

PART F TO BERMAN FOR 0.29 CFS (FOR LOTS 4 & 5 OF SUBDIVISION).

AN ADMINISTRATIVE MODIFICATION WAS MADE TO THE PLACE OF USE TO REFLECT THE PLACE OF USE AS IDENTIFIED THROUGH THE GIS PROCESS. THIS IS CONSIDERED A MODIFICATION OF THE SPLIT DURING THE CHANGE OF OWNERSHIP PROCESS. THE DIVERSION RATE FOR THIS SPLIT WAS ALSO MODIFIED TO REFLECT THE PLACE OF USE CHANGE. KKC 3-27-98

PART E TO HILL FOR 0.36 CFS (FOR LOTS 1,2, & 3 OF SUBDIVISION)

PART F TO BERMAN FOR 0.28 CFS (FOR LOTS 4 & 5 OF SUBDIVISION).

OWNERSHIP CHANGE AND SPLIT RIGHT DATA ENTERED ON 3-30-98 BY KKC.

PART F WAS SPLIT INTO PARTS G AND H BASED UPON THE GIS PLACE OF USE CALCULATIONS AND PROPORTIONATE RATE PER ACRE CALCULATIONS.

PART G REFLECTS THE IRRIGATED GROUND ONLY, IN THE PLACE OF USE.

PART H PLACE OF USE CONTAINS BOTH IRRIGATED GROUND AND NON IRRIGATED GROUND.

PART G TO MAHONEY FOR 0.14 CFS (FOR LOT 4 OF THE SUBDIVISION).

PART H TO PETERS FOR 0.14 CFS (FOR LOT 5 OF THE SUBDIVISION).

15. Basis of Claim: DECREED

RE: CHANGE OF OWNERSHIP AND MODIFICATION TO ADJUDICATION CLAIMS
A71-00039B, A71-00040B, AND A71-10136 AND SUBSEQUENT SPLITS

Dear Mr Berman

I have enclosed documents that cover the history of the original adjudication claims you filed and as modified through the GIS process, for all ownership changes of the Thompson Creek Subdivision. Normally, I do not provide a history of ownership changes prior to the current change, but as most all claims have been modified and I have to notify other owners as well, I created a packet to allow each individual to review those changes to see the effect on their portion of the original claims.

This project became complex only in that the subdivision was created with boundaries that lay approximately 42° to the quarter/quarter (QQ) lines. As water rights have historically been recorded by irrigated ground per QQ the diagonal lots create QQs with small acreage that was difficult to calculate using equipment previously available. The GIS program allows for more accurate identification of small acreage per QQ therefore the driving factor for the modifications.

I have included a chart, a split tree, a reevaluation analysis, and a GIS layout showing the subdivision to assist you in the review of the packet.

If you have any questions please contact this office and I will assist you.

Sincerely

Kelly K Christensen

Dear Mr. Christensen,

Thanks so much for your rapid response to my letter and its questions, which you have answered perfectly. It is certainly nice to know that you and your staff are so efficient and knowledgeable and I will certainly contact you again in the future if any more questions (dumb or not!) occur to me. As you say, it is better to ask questions now than find out answers later that one might find disagreeable, as in the case of the Snake River Basin Adjudication procedure. That was an excellent example, to say the least.

Thanks again very much for your time and patience and I hope you will have a fine spring and summer.

Very best wishes,

J. Michael Mahoney

RE: RESPONSE TO QUESTIONS

Dear Mr Mahoney

The answers I am providing are answers that apply to water use in Idaho in general and I have tried to anticipate what your potential uses might be.

QUESTION 1. Can you share Thompson Creek water to do small irrigating around the house?

ANSWER 1. The quick answer is no. That would basically be adding acres irrigated to the place of use and Idaho Code does not support expanding a water right. You do have the option of filing a transfer to 'dry up' an equivalent irrigated acreage and moving that to the home site. However, you may have problems accomplishing that based upon what I read in the warranty deeds concerning the subdivision and the common irrigation place of use.

QUESTION 2. Well water to provide water for the living quarters.

ANSWER 2. Groundwater is generally considered a separate source and therefore its development would be an independent right.

A portion of Idaho code defining domestic uses (abbreviated).

42-111. Domestic purposes defined. (1) For purposes of sections 42-221, 42-227, 42-230, 42-235, 42-237a, 42-242, 42-243 and 42-1401A, Idaho Code, the phrase "domestic purposes" or "domestic uses" means:

(a) The use of water for homes, organization camps, public campgrounds, livestock and for any other purpose in connection therewith, including irrigation of up to one-half (1/2) acre of land, if the total use is not in excess of thirteen thousand (13,000) gallons per day, or

(b) ((for small commercial uses. ((omitted)))

April 14, 1998
MAHONEY
PAGE 2

(2) For purposes of the sections listed in subsection (1) of this section, domestic purposes or domestic uses shall not include water for multiple ownership subdivisions, mobile home parks, or commercial or business establishments, unless the use meets the diversion rate and volume limitations set forth in subsection (1)(b) of this section.

(3) ((Multiple domestics use ((omitted))))

Answer 2. (continued) For irrigation greater than $\frac{1}{2}$ acre at this time you may apply and upon approval, develop a groundwater source for the irrigation of that ground. (it can be tied in with a domestic use)

As far as dumb questions goes, as rapidly as things are changing concerning water rights and moratoriums and such, I don't believe that I have all the answers right now. So, if you have more questions, please call this office and we will be happy to assist you. I'd much rather see people ask questions to 'know' what to do than just stumble along and later find out what will happen. The end result is basically the Snake River Basin Adjudication. We are finding their answers now even if they did not ask a question. And some of them do not like the answers.

Sincerely

Kelly K Christensen

Dear Mr. Christensen:

Thank you so much for your letter and the information contained therein concerning the water rights on the Thompson Creek Ranch Subdivision near Stanley, Idaho.

It is obvious that you have done a tremendous amount of very complicated work on this project and it is greatly appreciated. At the moment I do not have any questions about it but if in the future I do I will certainly contact you in that regard.

On second thought, I do have one question and that is would it be possible to use my share of the Thompson Creek water to do some small irrigating projects near the living quarters if I ever build a house on my lot? Thompson Creek actually runs, I believe, mostly in the spring and then pretty much dries up as the summer goes along. So there might not be enough water there to do anything with. I imagine well water would provide water for the living quarters area. Does that also come under the water allotted from the three sources for this lot. (I guess I had more questions than I thought!)

These are probably pretty dumb questions to which I should already know the answer, but since I don't any information you could give me in this regard would of course be greatly appreciated.

Thank you again for all the incredible amount of work you have done to sort through and straighten out all these claims. It is most impressive!

Very best regards,

J. Michael Mahoney

REEVALUATION OF THOMPSON CREEK SUBDIVISION LOTS AS IT AFFECTS ADJUDICATION CLAIMS BASED ON 71-00039, 71-00040, AND A71-10136

The department has adopted the computerized Geographic Information System (GIS) as the tool of the future for water rights recording and analysis. This tool provides a greater degree of accuracy, a visual representation of the place of use, and is less prone to error.

The initial claims filed by Mr Berman have currently been proportionately split three different times based upon ownership changes for specific subdivision lots. The original splits of these rights were based upon orthophotography and planimeter acre calculations. The GIS process has calculated the place of use by both overall acreage and acreage by quarter/quarters within each lot (GIS maps attached.) Through GIS there has been a slight acre shift for the irrigated ground within the subdivision and this shift is the basis for the modification of the splits of the original claims.

As a unit GIS calculated an additional 3.5 acres irrigated under adjudication claims A71-00039B and A71-00040B. More acres were claimed under those two rights than was found irrigated. All non-irrigated acres stayed with the split portion that was under Mr Berman's name. As the splits were made, only actually irrigated acres were split from the base right for (A71-00039D & A71-00040D the Brubaker sale), (A71-00039E & A71-00040E the Hill sale), and (A71-00039G & A71-00040G the Mahoney sale). The place of use for (A71-00039H & A71-00040H the Peters sale) includes the recognized 13.8 irrigated acres and the balance of 29.2 non-irrigated acres. The recommendation to the SRBA court will not reflect non-irrigated acres.

Again using GIS, an additional 6 acres irrigated were identified under claim A71-10136. They bring the total irrigated place of use under A71-10136 to three acres more than claimed. That shortage is currently identified under A71-10136B and will be addressed specifically with the Hills.

Because of the increase in acres and the shift within each lot, the proportional rate that is appurtenant to each lot also changed in most cases. See the attached table showing the place of use segregated by lot and quarter/quarter. See also, the attached split tree that identifies the appurtenant diversion rates per lot.

SALE TO BRUBAKER (lot 6)

The required modifications begin with the first change of ownership where lot 6 was sold to Mr Brubaker.

PLACE OF USE COMPARISON			
lot no.	original lot acres	gis lot acres	proportionate share of P/U
6	14.5	15	20%

MODIFICATION SUMMARY

claim number	original div rate	gis div rate	original acres	gis acres
A71-00039D	.16 cfs	.16 cfs	14.5	15.0
A71-00040D	.48 cfs	.48 cfs	14.5	15.0
A71-00039C	.64 cfs	.64 cfs	88.5	88.0
A71-00040C	.48 cfs	.48 cfs	88.5	88.0

The found irrigated acreage increased $\frac{1}{2}$ acre and the place of use by quarter/quarter (QQ) has also changed. This, however, did not change the proportionate diversion rate for either right. All four rights have been modified to reflect the $\frac{1}{2}$ acre and QQ change. This data reflects irrigated ground only.

SALE TO HILL (lots 1, 2, and 3)

This sale includes a change in acres and also the proportionate rate per acre, therefore, the six rights (post split) have been modified as follows:

PLACE OF USE COMPARISON			
for A71-00039E & A71-00040E			
lot no.	original lot acres	gis lot acres	proportionate share of P/U
1	10	11	14%
2	10	11.3	15%
3	11.5	12.4	16%
total	31.5	34.7	

for A71-10136A			
lot no.	original lot acres	gis lot acres	proportionate share of P/U
	8.0	9.0	38%
	5.5	5.5	23%
	5.5	6.7	28%
total	19.0	21.2	

MODIFICATION SUMMARY

claim number	original div rate	gis div rate	original acres	gis acres
A71-00039E	.35 cfs	.36 cfs	31.5	34.7
A71-00040E	1.04 cfs	1.08 cfs	31.5	34.7

A71-10136A	.36 cfs	.35 cfs	19.0	21.2
A71-00039F	.29 cfs	.28 cfs	57.0	53.3
A71-00040F	.89 cfs	.84 cfs	57.0	53.3
A71-10136B	.04 cfs	.05 cfs	19.0	21.2

SALE TO HILL (continued)

For Valley Creek and McGowan Creek water GIS calculated an additional 3.2 acres and for Thompson Creek Gis calculated 2.1 additional acres. Based upon a proportionate acre calculation the diversion rates for each right also has to be adjusted. All 6 rights involved in the splits have been modified based upon the GIS calculations. This data reflects irrigated ground only.

SALE TO MICHAEL MAHONEY

As the split rights were not generated using the original planimeter data, no modification of the rights is required. They reflect GIS information only. However, the original planimeter data can be compared to the GIS data through the use of the enclosed charts and tables.

<u>claim number</u>	<u>gis div rate</u>	<u>gis acres</u>
A71-00039G	.14 cfs	13.0
A71-00040G	.41 cfs	13.0
A71-10136B	.05 cfs	2.8

This data reflects irrigated ground only.

SALE TO PETERS (lot 5)

The balance of the place of use remains with the claim portions now in Mr Peter's name. Unlike the previous claims these rights include the originally claimed ground that was found to be outside the irrigated ground.

<u>claim number</u>	<u>gis div rate</u>	<u>gis acres</u>
A71-00039H	.14 cfs	13.8
A71-00040H	.43 cfs	13.8

CONTRACT REGARDING
FUTURE RIGHTS AND RESPONSIBILITIES
WITH RESPECT TO IMPROVEMENTS
ON REAL PROPERTY

WHEREAS, Daniel L. Berman, an individual ("Seller") whose residence is 50 South Main Street, Suite 1250, Salt Lake City, Utah, and Paul D. and Ann P. Hill ("Buyers") whose residence is 2635 Habersham Road, Atlanta, Georgia, have entered into a contract for the sale of certain real property located in Custer County, Idaho from Seller to Buyers; and

WHEREAS, the subject property of such sale constitutes Lots 1, 2 and 3 of a larger tract of real property (which is described more specifically below and hereinafter referred to as the "Property") and such Lots and tract are shown on a certain recorded plat of survey more specifically described below and hereinafter referred to as the "Plat", and

WHEREAS, Seller and Buyers wish to protect and preserve the scenic beauty and economic value of the respective pieces of real property which each of them will own following such sale and to insure, to the extent it is reasonable and feasible, that the future development and use of any part of such real property shall be consistent with the foregoing;

NOW, THEREFORE, in consideration of the mutual rights and responsibilities created and granted hereunder and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged by both Seller and Buyers, the parties agree as follows:

1. Definitions.

"Lot" means any of the separately numbered and individually described parcels of land shown on the Plat and intended for private use and ownership, as well as any future subdivided portion of any such parcel as permitted under the terms of this Contract, as it may be amended from time to time. (The Plat, as initially recorded in conjunction with this Contract, and prior to any modification or amendment, contains six (6) such Lots.)

"Mortgage" means a mortgage or a deed of trust recorded in the Official records.

"Mortgagee" means the mortgagee under a mortgage, or the beneficiary under a deed of trust, recorded in the Official records.

"Mortgagor" means the mortgagor under a mortgage, or the trustee under a deed of trust, recorded in the Official records.

"Official records" means the Official records of the Custer County Recorder, State of Idaho.

"Owner" means the person who is the owner of record (in the official records) of a fee or an undivided fee interest in any Lot. If one person owns more than one Lot at any time such person shall be considered an Owner, and shall have the rights and responsibilities of an Owner, with respect to each Lot owned; similarly if more than one person owns any given Lot all such persons shall be considered an Owner, and shall have the rights and responsibilities of an Owner, with respect to such Lot. Accordingly, at the time of closing of the sale transaction described above, Seller shall be the Owner of Lots 4, 5 and 6 and Buyers shall be the Owners of Lots 1, 2 and 3 as shown on the Plat. Notwithstanding any applicable theory relating to a mortgage, deed of trust or like instrument, the term "Owner" shall not mean or include a Mortgagee unless and until such Mortgagee has acquired title pursuant to foreclosure or any arrangement or proceeding in lieu of foreclosure.

"Plat" means the plat recorded _____, 1992 in the Official records as Instrument No. _____, entitled Thompson Creek Ranch subdivision, executed and acknowledged by Seller, prepared and certified to by Richard D. Fosbury, a duly licensed Idaho land surveyor, holding Certificate No. _____, and consisting of two sheets.

"Property" means the tract of real property located in Custer County, Idaho, shown on the Plat and described as follows:

A parcel of land located with H.E.S. 109, Sections 11 & 12, Township 11 North, Range 12 East, B.M., Custer County, Idaho, more particularly described as follows: commencing at the Northeast corner of Section 11, thence South 00°03'00" East 1130.58 feet to a brass cap which marks the true point of beginning; thence South 46°50'34" East 576.09 feet; thence South 43°03'21" West 2348.88 feet; thence North 47°18'09" West 1951.31 feet; thence North 42°51'36" East 2353.13 feet; thence South 47°19'00" East 1383.26 feet to the true point of beginning.

TOGETHER WITH a right-of-way and easement for vehicular ingress and egress over and across Thompson Creek Road.

2. Easements.

2.1 Roads. Seller grants to Buyers and Buyers grant to Seller, for the benefit of the Lots served, mutual nonexclusive easements and rights-of-way for vehicular and pedestrian ingress and egress over and across the private roads (except any roads developed and maintained exclusively by an Owner on such Owner's

Lot) on the Property, as shown on the Plat, as such roads may be relocated on an Owner's Lot by such Owner; provided, however, that any Owner may use the private roads on the Property only to the extent reasonably necessary for such Owner to have adequate ingress and egress to and from such Owner's Lot. Such easements and rights-of-way shall be evidenced only by this Contract and shall be prior and superior to any other instrument recorded after this Contract is recorded in the Official records.

2.2 Utilities. Seller also grants to Buyers and Buyers also grant to Seller, for the benefit of the Lots served, the right of an Owner to grant additional nonexclusive easements and rights-of-way to utility companies and public agencies for underground utility services such as electricity and telephone over and across the Property as may be necessary for the proper development of the Property, including, without limitation, necessary "backbone" electrical distribution systems and transformers; provided, however, that to the extent feasible such utility easements shall follow and be adjacent to the private road or roads on the Property and further provided that any Owner shall use the installations, equipment and lines serving more than one Lot with utility services only to the extent of service to such Owner's Lot. Such easements and rights-of-way shall be evidenced by an instrument executed by the Owner or Owners and recorded in the official records (with no other signature being necessary), and shall be prior and superior to any other instrument recorded after this Contract is recorded in the official records.

2.3 Other Common Facilities. Seller also grants to Buyers and Buyers also grant to Seller, for the benefit of the Lots served, nonexclusive easements and rights-of-way for the maintenance and repair of any log fence and entry gate constructed on the perimeter of the Property or the perimeter of the Lots owned by Seller or the perimeter of Lots owned by Buyers. Such easements and rights-of-way shall be evidenced only by this Contract and shall be prior and superior to any other instrument recorded after this Contract is recorded in the official records.

2.4 Exercise. The exercise of such easements and rights-of-way shall not unreasonably interfere with the free and unrestricted use of the Lot(s) over which the same are granted. Any Owner benefitted by such easements and rights-of-way (and their agents and assigns) may enter on any portion of the Property only to such extent as may be reasonably necessary or appropriate in order to accomplish the construction, installation, inspection, maintenance, repair and replacement of the utilities and facilities concerned, and in connection with such utilities and facilities, excavate or conduct construction activities on the Property only so long as such excavation or construction activities are performed in a good and workmanlike manner and are otherwise performed and completed in accordance with the provisions of this Contract. Any party exercising any rights under any easement or right-of-way

granted in this Contract shall: Exercise due care to minimize, to the fullest extent possible, any adverse impact on the scenic beauty and economic value of the Lots affected; Be responsible for all damages caused to any Lot as a result of such exercise of rights; and Promptly, upon completion of any installation, maintenance, or repair, restore any Lot or Lots so affected to their condition existing immediately prior to such exercise of rights.

2.5 Appurtenances. All such easements and rights-of-way shall constitute covenants running with the land, and may not be transferred, mortgaged or otherwise encumbered except as an appurtenance to the benefitted Lot.

3. Restrictions.

3.1 Further Subdivision Limited. The land included in Lots 1, 2 and 3 as shown on the Plat may be subdivided into not more than a total of four (4) Lots at any time; similarly, the land included in Lots 4, 5 and 6 as shown on the Plat may be subdivided into not more than a total of four (4) Lots at any time. Except for this limited subdivision, however, no Lot may be further subdivided beyond the Lots shown on the Plat. Notwithstanding the foregoing, the Owners of two (2) adjacent Lots may mutually agree to relocate the boundary line between such Lots so long as such action does not increase the total number of Lots beyond that specified above.

3.2 General Restrictions on Development. Except for that required for structures, ponds, roads and utilities, there shall be no excavation or topographic change that would be detrimental to the scenic beauty of the Property as now existing. Removal of live trees and other vegetation shall be limited to that necessary to accommodate structures, roads and other improvements and to allow the installation of utilities. Roads shall be designed, located and constructed to minimize aesthetic impact and soil erosion. All structures shall be architecturally compatible with the Property and its environment, shall be rustic in nature and shall be constructed using logs, shakes, rough lumber, rough wood, native stone or other similar material with nonreflective sidings and roofs. Paints and stains shall be of earth tones typical of the Property. No portion of any improvement shall be more than thirty-five (35) feet measured vertically at any point above natural grade; provided, however, that this limitation shall not apply to chimneys, lightening rods and weather vanes. It is hereby agreed and acknowledged that existing structures on Lot 1 of the Property shall be considered in full compliance with the foregoing conditions and requirements so long as such structures are maintained in their present condition. All utilities shall be underground. All fencing shall be of a rustic nature, and all parts thereof normally visible from a distance of one hundred (100) feet or more shall be constructed of log (and no other) materials.

3.3 Lot Improvements.

(a) Each Lot may be improved and used solely for residential or agricultural use, and for no other purpose.

(b) No Lot shall be improved except by (i) a single-family residential structure designed to accommodate no more than a single family, domestic help and occasional guests, plus an attached garage or garages and fencing and such other improvements as are necessary or customarily incident to a single-family residence; and (ii) not more than two (2) additional unattached structures designed to serve as a garage, guest housing or domestic help quarters, barn, stable or corral or any combination thereof. In no event may any Lot be improved with more than three (3) structures. No structure may be closer than twenty-five (25) feet to any boundary line between two Lots (except with respect to the boundary line between said Lots 3 and 4 where such restriction shall cover seventy-five (75) feet on each side of such boundary line), without the prior written approval of the Owners of both Lots adjacent to such Lot line.

(c) All single family residences constructed on any Lot shall have a floor area of not less than 1,800 square feet, exclusive of garages, patios, decks, breeze-ways, storage rooms, porches, overhangs and similar areas.

(d) Construction of all improvements on any Lot shall be pursued diligently and continuously from the time of commencement until all structures are fully completed inside and out, including finished painting, landscaping and any other planned improvements. All of the foregoing shall be completed within twelve (12) months after commencement of construction unless prevented by any cause beyond the control of the Owner or builder, but then only for the period such cause continues.

(e) No residence shall be used for any purpose other than single-family residential purposes. No automobile garage shall be used as living quarters at any time unless it is part of a combination structure designed to be used as both a garage and guest housing or domestic help living quarters. No business, profession, trade or other non-residential or non-agricultural use shall be conducted on any Lot.

(f) All residential structures on any Lot shall be provided with adequate sewage treatment facilities, including a septic tank and drain field of a capacity and design in conformance with the sanitary restrictions noted on the Plat and approved by such governmental authorities as may be required, and at least one well for domestic use. All such facilities shall be adequately maintained so as to cause no offensive odors or above-ground discharge.

(g) All improvements within any Lot shall be maintained in good condition and repair.

3.4 Nuisances. No rubbish or debris of any kind shall be placed or permitted to accumulate on the Property so as to render any portion of the Property unsanitary, unsightly, offensive or detrimental to any Lot. No noise or other audible nuisance shall be permitted which is offensive or detrimental to any Lot.

3.5 No Hazardous or Offensive Activities. No activities shall be conducted, and no improvements shall be constructed, on the Property which are or might be unsafe or hazardous to any person or property. Without limiting the generality of the foregoing, no firearms shall be discharged on the Property, and no open fires shall be lighted or permitted on any portion of the Property except while attended and in conformance with all applicable governmental ordinances, rules or regulations.

3.6 Unsightly Articles. No unsightly articles on a Lot shall be visible from an adjoining Lot. Without limiting the generality of the foregoing, trailers, motor homes, trucks (other than pickups), boats, tractors, vehicles (other than automobiles), campers (on or off vehicle), snowmobiles, snow removal equipment, garden and maintenance equipment, camping and recreational equipment and similar equipment shall be kept at all times when not in use in an enclosed structure or screened from view, except for trailers, mobile homes and campers in actual use by non-residents for a period not to exceed seven (7) days in any thirty (30) day period. All vehicles must be operational and must have current licenses. No dilapidated or unrepaired vehicles shall be permitted on the Property.

3.7 Refuse and Garbage. Refuse, garbage and trash shall be kept at all times in a covered container within an enclosed structure or appropriately screened from view. Service areas, and facilities for hanging, drying or airing clothing or household fabrics shall be appropriately screened from view.

3.8 No Mining or Drilling. The Property shall not be used for the purpose of mining, quarrying, drilling, boring or exploring for or removing water, oil, gas or other hydrocarbons, minerals, rocks, stones, gravel, or earth for sale; provided, however, that an Owner may, after obtaining an appropriate permit from the Idaho Department of Water Resources, drill one or more wells on such Owner's Lot for the extraction of water for domestic use and landscape irrigation.

3.9 Motorized Vehicles. Except when operated by or with the permission of an Owner on such Owner's Lot, all motorized vehicles are to be operated only on established roads and parking areas and are prohibited from all other portions of the Property.

4. Mortgagee Protection.

4.1 Notice and Cure. The Mortgagee with respect to any Mortgage covering any Lot, on filing a written request for notification with the Seller or the Buyers (whichever party is not the Mortgagor on such Lots), shall be entitled to written notification from the notified party of any default by the Mortgagor of such Lot in the performance of such Mortgagor's obligations under this Contract to the extent not cured within thirty (30) days after the date on which such obligations were to be performed. Such Mortgagee shall be entitled (but not obligated) to cure such default within an additional thirty (30) days after receipt of such notice.

4.2 Liability. Unless and until it enters into possession or acquires title pursuant to foreclosure or any arrangement or proceeding in lieu of foreclosure, any Mortgagee interested under any Mortgage affecting any portion of the Property shall have no obligation to take any action to comply with, and may not be compelled to take any action to comply with, any of the covenants, restrictions or other provisions of this Contract (other than those, if any, concerning a consent or approval to be given by a Mortgagee, if a Mortgagee's failure to give same is wrongful).

5. Form of Conveyancing. Any instrument conveying or encumbering title to any Lot shall describe the interest or estate involved substantially as follows:

Lot No. _____ contained within Thompson Creek Ranch Subdivision, as said Lot is identified on the Plat recorded _____, 1992 in the official records of Custer County, Idaho as Instrument No. _____, together with a nonexclusive right and easement of use and enjoyment in certain roads, utilities and other common facilities, as defined in the Contract Regarding Future Rights and Responsibilities with Respect to Improvements on Real Property dated _____, 1992 and (assuming such Contract is recorded) recorded _____, 1992 in the official records of Custer County, Idaho as Instrument No. _____.

6. Amendment. This Contract may be amended or terminated by an instrument in writing executed and acknowledged by the Owners of the Lots affected by such amendment or termination and any such amendment or termination shall be effective upon its execution and, if this Contract has been recorded, such instrument of amendment or termination shall also be recorded. Notwithstanding the immediately preceding sentence, no amendment or termination of this Contract shall in any way affect the rights of any Mortgagee interested under a first Mortgage which is in effect at the time of the amendment or termination concerned, unless such Mortgagee has

consented in writing to such amendment or termination. No such amendment or termination shall require the consent of any other person.

7. Covenants to Run with Land. The rights and responsibilities in the specified provisions of this Contract shall constitute covenants running with the land, and shall be binding on, and shall inure to the benefit of, each Owner and any other person holding any interest in or occupying any portion of the Property and their respective heirs, successors, assigns and legal representatives. The foregoing notwithstanding, this Contract is intended to create and grant such rights only for the benefit of the Seller, the Buyers, future Owners, and such other persons specified above, and the respective heirs, successors, assigns and legal representatives of the foregoing, and no other party or parties shall have any legal or beneficial interest in, or right to enforce or claim damages for, any rights or obligations specified herein.

8. Attorneys' Fees. If any person so entitled brings suit to enforce or interpret this Contract or with respect to any other issue related to this Contract, the prevailing party shall be entitled to recover from the other party the prevailing party's reasonable attorney's fees and costs incurred in any such action or in any appeal from such action, in addition to the other relief to which the prevailing party is entitled.

9. Notices. Any notice or demand to be given under this Contract shall be given in writing by personal service, telegram, express mail, Federal Express, DHL or any other similar form of courier or delivery service, or mailing in the United States mail, postage prepaid, certified, return receipt requested. Any such notice shall be deemed to have been given, and shall be effective, on delivery to the notice address then applicable for the party to which the notice is directed; provided, however, that refusal to accept delivery of a notice or the inability to deliver a notice because of an address change which was not properly communicated shall not defeat or delay the giving of a notice.

10. General Provisions. This Contract shall be governed by, and construed and interpreted in accordance with, the laws (excluding the choice of laws rules) of the State of Idaho. Titles and headings of Paragraphs of this Contract are for convenience of reference only and shall not affect the construction of any provision of this Contract. Either Seller or Buyers may assign, transfer or delegate some or all of their respective rights and responsibilities under this Contract to any other person, as may their assigns; provided any such assignee, transferee or delegatee shall also be bound by all applicable provisions of this Contract. In the event, at any time, Seller or Buyers are advised by qualified legal counsel that this Contract or any portion hereof should be recorded in the Official records, or that any provisions

hereof should be evidenced in a separate document or documents which should be recorded in the Official records, in order to insure the enforceability of the rights and obligations provided herein with respect to present or future Owners of any Lots (or their respective heirs, successors, assigns or legal representatives), then upon the request of Seller or Buyers the other party executing this Contract (or their respective assignee, transferee or delegatee whether an Owner or otherwise) shall promptly execute any necessary documents and take any and all other actions necessary to enable this Contract to be so recorded or to enable such other document or documents to be created, duly executed and recorded.

IN WITNESS WHEREOF, the parties hereto have executed this Contract as of the day and year first above written.

DANIEL L. BERMAN

PAUL D. HILL

ANN P. HILL

STATE OF Idaho)
County of Blaine) ss.

On this 5th day of October, 1992, before me, The undersigned, a Notary Public in and for said State, personally appeared DANIEL L. BERMAN, known or identified to me to be the person whose name is subscribed to the foregoing instrument, and acknowledged to me that he executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal the day and year in this certificate first above written.

Notary Public for Idaho
Residing at Hailey

OTHER (DESCRIBE IN NOTES BELOW)

NOTES: the decreed right only lists McGowan Cr as the source & therefore, I am recommending only McGowan Cr. The former P/D legal desc. for McGowan Cr diversions agree with the claimed & decreed legal desc. McGowan Cr's channel is now the delivery system for all the claims under McGowan Cr sources. The ditch system normally carries all the stream flow and as such, no physical diversion structure is now required to direct water in the main ditch, therefore, the P/D legal desc. is somewhat ambiguous. The P/D was determined (cont. Below)

SYSTEM DESCRIPTION: DESCRIBED BELOW (), SEE LICENSE FILE (), OR SEE ATTACHMENT ()

(ont) to be that point where the current channel leaves the Forest Service boundary & is diverted to the main ditch that parallels the tree line and runs east-so-east. Legal determined from field exam comparison to the ortho photo U-68 & GIS Analysis.

FIELD EXAM ATTACHMENT

DATE: 6-2-94

PAGE: 1/3

AGENT: KKC

FILES: _____

ATTACHMENT SUBJECT: P/D SYSTEM FOR 11N 12E Sec 4 NE SW NE *

F06:: 71-00040A, 71-00040B, 71-00042A, 71-00042B, 71-00045,
71-00047, & 71-00050. Related Fish Screen VC-6.

The Forest Service reconstructed the di structure at a location
other than decreed. Date of change unknown at this time.

The ditch leaves the P/D and runs south east along the eastern
border of the Valley. The ditch intercepts Hanna Creek in
11N, 12E Sec 3 NW NE SW with the first major control structure
at this point. The water can be split with one channel roughly
using the old Hanna Cr channel to carry water to the north end
of the Mahoney/Kennedy Property that lays west of the Cow camp road
and is the northern most P/U between Valley C & the Cow camp road
the other Channel continues southeast along the eastern border
of the Valley to the North end of the northern most P/U east
of B the Cow camp road. The ditch again divides with
one main ditch paralleling the Cow Camp road on the east and
the other again forming the eastern Boundary of the irrigated
portion of the Valley. This portion of the ditch intercepts
Mc Gowan Creek in 11N 12E Sec 2 SW SW SE The main ditch
does not actually join with the McGowan Creek ditch but appears
that it may have at one time. The P/U in this general area
running south & east is a series of drainage channels
and this area appears to be naturally swampy. Valley Creek
water flows across this property and into HES 109 all

* Decreed right 71-00043 Co HES 274 is also diverted from the same P/D
but is physically removed from the common overlapping system of the
other rights. It is claimed in part under A 71-00043 Forest Service.

ATTACHMENT SUBJECT: _____

along the NE $\frac{1}{2}$ of the border. The McGowan Creek Ditch (and Valley Cr from Sec 4 somewhat) forms the eastern boundary for the HES 109 & into HES-133. This ditch system runs to HES 421 where it ends. For the HES's (portions of that lay east of the cow camp road (excluding HES-274) are in a general irrigated concurrently in that as one HES is irrigated the tail water is either spread directly onto the next HES or is accumulated into a drain or a ditch to be respread. Although this could be considered waste-water no one has claimed it as such. There are also swampy areas that may or may not be created by the Valley Cr, Hanna Cr, and/or McGowan Cr diversions. This interrelationship runs from HES 271 (the eastern $\frac{1}{2}$) thru HES 270, thru HES 109, thru HES 133, thru HES 421, and HES 319. All east of the Cow camp road. Water flows in general east & south from the cow camp road to the center of the irrigated meadows and south & east from the ditch system that forms the eastern boundary of the irrigated ground. This pattern is clearly visible on USDA F 173-13, 173-11 & others of the 8-28-72 flight similar USDA-F aerial photos 677-193 9-9-77 flight ASCS Aerial flight ~~777~~ 8-22-52 # DRF-3-167. On the Photo 768 to a certain extent also shows this relationship.

Irrigation practices for the fields west of the cow camp road

FILES: _____

ATTACHMENT SUBJECT: _____

and east of Valley Creek is also irrigated in a similar manner. From the SW $\frac{1}{2}$ of HES 271 thru HES 272, thru HES 420 and into HES 577

The channel running South from the Hanna diversion that enters the northern portion of the Mahoney/Kearney property west of the cow camp road & part of the HES 274 is either spread across the meadow and/or allowed to stay in a ditch that roughly divides that pasture in half running straight southeast to HES 272 where it is again either spread across the northern portion of the HES or continues in the same ditch straight thru the middle of HES 272 to HES-420. A ditch follows the cow camp road (on the west side) thru HES-271, 272 420 and into 577. These HES's also share the water similar to the system east of the cow camp road.

Control of water diverted from section four ends roughly in the NW $\frac{1}{4}$ of sec. 13. HES 577 & HES 421 receive some water from the Sec 4 diversion but primarily receive water from other diversions and/or sources.

A small acreage west of Valley Creek and within HES 272 is irrigated from Elk Creek. The western portion of HES 420 is also irrigated from Elk Creek but from a diff P/O. This P/O is shared with the deeded right that has been split for two parcels in HES 577. The irrigated ground west of Valley Cr in HES 422 is irrigated from back Cr. No other ground west of Valley Cr was found to be currently irrigated (this includes HES 273)

**BASIS OF RECOMMENDATION FOR:
RIGHTS SPLIT FROM A71-00039B, A71-00040B, AND A71-10136**

The irrigated P/U for subdivision lots 1 through 6 of the Thompson Creek Subdivision are identified and operated as a common area (see Thompson Creek Subdivision plat submitted with the change of ownership, Berman-to-Hill). As the irrigation of the subdivision lots is operated as a system, the analysis is also based upon that system and then 'broken down' per lot owner.

The A71-00039 series rights have McGowan creek as a source and this system covers all 76.5 found irrigated acres within the sub division. The portion appurtenant to the sub division is 0.80 cfs which is ≈ 0.01 cfs/acre.

The A71-00040 series rights have Valley creek as a source and this system covers the same 76.5 found irrigated acres. The portion appurtenant to the subdivision is 2.40 cfs or ≈ 0.03 cfs/acre.

The A71-10136 series rights have Thompson creek as a source and only cover 24 acres of the subdivision (all within lots 1 through 4). This right was claimed at 0.40 cfs or ≈ 0.017 cfs/acre.

The revised Hubble analysis calculations for the 76.5 acres indicate a maximum requirement of 5.60 cfs. the three rights when combined are for 3.60 cfs which is less than the Hubble analysis requirement, therefore, the recommendation is for the claimed rates and subsequently split through the ownership changes on a proportional rate per acre basis.

REEVALUATION OF THOMPSON CREEK SUBDIVISION LOTS AS IT AFFECTS ADJUDICATION CLAIMS BASED ON 71-00039, 71-00040, AND A71-10136

The department has adopted the computerized Geographic Information System (GIS) as the tool of the future for water rights recording and analysis. This tool provides a greater degree of accuracy, a visual representation of the place of use, and is less prone to error.

The initial claims filed by Mr Berman have currently been proportionately split three different times based upon ownership changes for specific subdivision lots. The original splits of these rights were based upon orthophotography and planimeter acre calculations. The GIS process has calculated the place of use by both overall acreage and acreage by quarter/quarters within each lot (GIS maps attached.) Through GIS there has been a slight acre shift for the irrigated ground within the subdivision and this shift is the basis for the modification of the splits of the original claims.

As a unit GIS calculated an additional 3.5 acres irrigated under adjudication claims A71-00039B and A71-00040B. More acres were claimed under those two rights than was found irrigated. All non-irrigated acres stayed with the split portion that was under Mr Berman's name. As the splits were made, only actually irrigated acres were split from the base right for (A71-00039D & A71-00040D the Brubaker sale), (A71-00039E & A71-00040E the Hill sale), and (A71-00039G & A71-00040G the Mahoney sale). The place of use for (A71-00039H & A71-00040H the Peters sale) includes the recognized 13.8 irrigated acres and the balance of 29.2 non-irrigated acres. The recommendation to the SRBA court will not reflect non-irrigated acres.

Again using GIS, an additional 6 acres irrigated were identified under claim A71-10136. They bring the total irrigated place of use under A71-10136 to three acres more than claimed. That shortage is currently identified under A71-10136B and will be addressed specifically with the Hills.

Because of the increase in acres and the shift within each lot, the proportional rate that is appurtenant to each lot also changed in most cases. See the attached table showing the place of use segregated by lot and quarter/quarter. See also, the attached split tree that identifies the appurtenant diversion rates per lot.

SALE TO BRUBAKER (lot 6)

The required modifications begin with the first change of ownership where lot 6 was sold to Mr Brubaker.

MODIFICATION SUMMARY

claim number	original div rate	gis div rate	original acres	gis acres
A71-00039D	.16 cfs	.16 cfs	14.5	15.0
A71-00040D	.48 cfs	.48 cfs	14.5	15.0
A71-00039C	.64 cfs	.64 cfs	88.5	88.0
A71-00040C	.48 cfs	.48 cfs	88.5	88.0

The found irrigated acreage increased $\frac{1}{2}$ acre and the place of use by quarter/quarter (QQ) has also changed. This, however, did not change the proportionate diversion rate for either right. All four rights have been modified to reflect the $\frac{1}{2}$ acre and QQ change. This data reflects irrigated ground only.

SALE TO HILL (lots 1, 2, and 3)

This sale includes a change in acres and also the proportionate rate per acre, therefore, the six rights (post split) have been modified as follows:

PLACE OF USE COMPARISON

for A71-00039E & A71-00040E				for A71-10136A			
lot no.	original lot acres	gis lot acres	proportionate share of P/U	original lot acres	gis lot acres	proportionate share of P/U

A71-10136B	.04 cfs	.05 cfs	19.0	21.2

SALE TO HILL (continued)

For Valley Creek and McGowan Creek water GIS calculated an additional 3.2 acres and for Thompson Creek Gis calculated 2.1 additional acres. Based upon a proportionate acre calculation the diversion rates for each right also has to be adjusted. All 6 rights involved in the splits have been modified based upon the GIS calculations. This data reflects irrigated ground only.

SALE TO MICHAEL MAHONEY

As the split rights were not generated using the original planimeter data, no modification of the rights is required. They reflect GIS information only. However, the original planimeter data can be compared to the GIS data through the use of the enclosed charts and tables.

<u>claim number</u>	<u>gis div rate</u>	<u>gis acres</u>
A71-00039G	.14 cfs	13.0
A71-00040G	.41 cfs	13.0
A71-10136B	.05 cfs	2.8

This data reflects irrigated ground only.

SALE TO PETERS (lot 5)

The balance of the place of use remains with the claim portions now in Mr Peter's name. Unlike the previous claims these rights include the originally claimed ground that was found to be outside the irrigated ground.

<u>claim number</u>	<u>gis div rate</u>	<u>gis acres</u>
A71-00039H	.14 cfs	13.8
A71-00040H	.43 cfs	13.8

CHECK DOCUMENTS USED TO VERIFY POU: ☒ ORTHOPHOTOQUAD, IDWR NO. 11-68; () TOPOGRAPHIC QUAD, IDWR NO. _____;

See split analysis

NOTES:

see analysis sheet. Thomp Cr Sub. (3pgs)

R.H.

The stream was measured at 0.80 CFS on 9-21-93 but this did not identify the system capacity. The Gowan Cr was not flowing enough to fill the channel this late in the season. I estimated the flow to be approx 50% of the system capacity based upon the channel physical character. The 'High water' mark was approximately double the current flow level, therefore the normal flow would be closer to 1.60 CFS. This is 133% greater than the decreed rate from The Gowan Creek ~~from~~ under 71-00039.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

SOIL TYPE	OPTIMAL / ROTATION (chart)	ACTUAL / ROTATION (field)	* ACRES PER SOIL TYPE (field)	* RATE PER ACRE (chart)	= TOTAL DIVERSION RATE
