WARRANTY DEED

This indenture made this 24 day of September, 19 87, between RONALD WILSON and PEGGY M. WILSON, husband and wife, as to an undivided 1/5 interest; BRUNO PIVA and ELZA PIVA, husband and wife, MARION PIVA and MARY C. PIVA, husband and wife and PIERO PIVA and MABEL P. PIVA, husband and wife, as to an undivided 1/5 interest; CALVIN S. HELM and BARBARA HELM, husband and wife, as to an undivided 1/5 interest; THOMAS CHIVERS and AILEEN CHIVERS, husband and wife, as to an undivided 7/60 interest; JOHN CHIVERS and AMY CHIVERS, husband and wife, as to an undivided 7/60 interest; MARK STARK and BRENDA J. STARK, husband and wife, as to an undivided 1/6 interest and GARTH T. CHIVERS and GLENIS CHIVERS, husband and wife, by virtue of Real Estate Contract as to an undivided 7/60 interest, GRANTORS and the UNITED STATES OF AMERICA, GRANTEE.

Checked in to price, acreage, description, and conditions of purchase, and found correct.

WITNESSETH: That the said Grantors, for and in consideration of the sum of Four hundred seventy thousand and no/100 dollars (\$470,000.00), to the Grantors in hand paid by the said Grantee, the receipt of which is hereby acknowledged, do by these presents grant, bargain, sell, convey and confirm unto the said Grantee, and its assigns, forever, all the certain lots, pieces or parcels of land situate, lying and being in the County of Custer, State of Idaho, and bounded and particularly described as follows, to-wit:

A tract of land within the Challis National Forest, embraced in Homestead Entry No. 134, List 4-881, in Sections 13 and 24, surveyed Township 11 North, Range 12 East, and Sections 18 and 19, surveyed Township 11 North, Range 13 East, Boise Meridian, more particularly described by metes and bounds as follows:

Beginning at corner No. 1 from whence the corner common to Sections 13, 24, 18 and 19, Township 11 North, Range 12 and 13 East, Boise Meridian, bears

North 0° 1' West, 2.97 chains distant; thence
North 82°16' East, 10.54 chains to corner No. 2; thence
North 15°40' West, 1.63 chains to Corner No. 3; thence
North 15°40' West, 37.06 chains to corner No. 4; thence
North 15°40' West, 25.17 chains to corner No. 5; thence
North 45°00' West, 11.41 chains to corner No. 6; thence
South 69°27' West, 17.42 chains to corner No. 7; thence
South 16°15' East, 64.38 chains to corner No. 8; thence
South 16°15' East, 4.78 chains to corner No. 9; thence
North 82°16' East, 11.90 chains to corner No. 1, the
place of beginning.

Surveyed and found correct.

containing 159 acres, more or less.

TOGETHER with all and singular the tenements, hereditaments, improvements and appurtenances thereunto belonging, or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents, issues and profits thereof.

TO HAVE AND TO HOLD all and singular the above mentioned and described premises, together with the appurtenances, unto the said grantee and to its successors and assigns forever, and the said grantors and its assigns, the said premises in the quiet and peaceable possession of the said grantee, its successors and assigns against the grantors and its assigns and against all and every person and persons whosoever lawfully claimed or to claim the same, shall and will WARRANT and do by these presents forever DEFEND.

And the said Grantors for themselves, their executors and administrators do covenant and agree to and with the said grantee, and its assigns, that they are lawfully seized in fee of the aforegranted premises; that the same are free from all encumbrances; that they have a good right to sell and convey the same to the said grantee, aforesaid; and that they, the grantors warrant and will forever defend the before-

granted land and premises against the right, title, interest, or claim of all and every person whomsoever.

The acquiring agency is the U.S. Department of Agriculture, Forest Service.

IN WITNESS WHEREOF, the said grantors have hereunto set their hands and seals the day and year first above written.

NOTES: _____
↓
DRF3-167 1952 Flight
1972 Flight

The P14 is irrigated from Valley Cio thru the main ditch from the P10 in Sec 4. The ditch that parallels the old camp road until HES-133. The ditch then swings east to follow the highway in a south easterly dir. The ditch is used on HES-133 before it enters the canal (HES-431). The ditch supplies water to the canal and eventually so much water for the water from Tennell Co before it enters the recommended P14 for this claim. The water would run on the previous HES accumulation in natural channels and is eventually directed into this P14 near the NW corner of the P14 and again about 1800 ft South of the NW corner. Several ditches running generally South east cross over the P14 to irrigate the ground. A portion of the NE side is a clear area that is reached by an water but probably does not normally require irrigation but is included within the recommended P14. The eastern boundary of the P14 is not clearly defined but

RECOMMENDATIONS:

TOTAL ACRES:

REVIEWED BY:

141 152 141 151-99

is based upon the natural slope of the ground. There is a natural channel that roughly parallels the property boundary. The HES is for 159.1 acres & should 141 irrigated acres the majority of the now in 18 acres are in the NE NW & SE NW of Sec 18.

FIELD EXAM ATTACHMENT

DATE: 6-2-94PAGE: 1/3AGENT: KKC

FILES: _____

ATTACHMENT SUBJECT: P/D SYSTEM FOR 11N 12E Sec 4 NE SW NE *F06:: 71-00040A, 71-00040B, 71-00042A, 71-00042B, 71-00045,
71-00047, & 71-00050. Related Fish Screen VC-6.The Forest Service reconstructed the di structure at a location
other than decreed. Date of change unknown at this time.The ditch leaves the P/D and runs south east along the eastern
border of the Valley. The ditch intercepts Hanna Creek in
11N, 12E Sec 3 NW NE SW with the first major control structure
at this point. The water can be split with one channel rough,
using the old Hanna Cr channel to carry water to the north end
of the Mahoney/Kennedy Property that lays west of the Cow camp road
and is the northern most P/U between Valley Cr & the Cow camp road.
The other Channel continues southeast along the eastern border
of the Valley to the North end of the northern most P/U east
of the Cow camp road. The ditch again divides with
one main ditch paralleling the Cow Camp road on the east and
the other again forming the eastern Boundary of the irrigated
portion of the Valley. This portion of the ditch intercepts
McGowan Creek in 11N 12E Sec 2 SW SW SE. The main ditch
does not actually join with the McGowan Creek ditch but appears
that it may have at one time. The P/U in this general area
running south & east is a series of drainage channels
and this area appears to be naturally swampy. Valley Creek
water flows across this property and into HES 109 all

* Decreed right 71-00043 in HES 274 is also diverted from the same P/
but is physically removed from the common overlapping system
other rights. It is claimed in part under #71-00043 & Forest Service

FIELD EXAM ATTACHMENT

DATE: 6-2-94PAGE: 2/3AGENT: KKC

FILES: _____

ATTACHMENT SUBJECT: _____

along the NE $\frac{1}{2}$ of the border the McGowan Creek Ditch (and Valley Cr from Sec 4 somewhat) forms the eastern boundary for the HES 109 & into HES-133. This ditch system runs to HES 421 where it ends. For the HES's (portions of that lay east of the cow camp road (excluding HES-274) are in general irrigated concurrently in that as one HES is irrigated the tail water is either spread directly onto the next HES or is accumulated into a drain or ditch to be respread. Although this could be considered waste-water no one has claimed it as such. There are also swampy areas that may or may not be created by the Valley Cr, Hanna Cr, and/or McGowan Cr diversions. This interrelationship runs from HES 271 (the eastern $\frac{1}{2}$) thru HES 270, thru HES 109, thru HES 133, thru HES 421, and HES 319. All east of the Cow camp road. Water flows in general east & south from the cow camp road to the center of the irrigated meadow and south & east from the ditch system that forms the eastern boundary of the irrigated ground. This pattern is clearly visible on USDA F 173-13, 173-11 & others of the 8-28-72 flight similar USDA-F aerial photos 677-193 9-9-77 ASCS Aerial flight ~~8-22-52~~ 8-22-52 # DRF-3-167. or the Photo U68 to a certain extent also shows this relationship.

irrigation practices in the fields west of the cow camp road

FIELD EXAM ATTACHMENT

FILES: _____

ATTACHMENT SUBJECT: _____

and east of Valley Creek is also irrigated in a similar manner. From the SW $\frac{1}{2}$ of HES 271 thru HES 272, thru HES 420 and into HES 577

The channel running South from the Hanna diversion that enters the northern portion of the Mahoney/Keady property west of the cow camp road & part of the HES 274 is either spread across the meadow and/or allowed to stay in a ditch that roughly divides that pasture in half running straight southeast to HES 272 where it is again either spread across the northern portion of the HES or continues in the same ditch straight thru the middle of HES 272 to HES-420. A ditch follows the cow camp road (on the west side) thru HES-271, 272 420 and into 577. These HES's also share the water similar to the system east of the cow camp road.

Control of water diverted from section four ends roughly in the NW $\frac{1}{4}$ of sec. 13. HES 577 & HES 421 receive some water from the Sec 4 diversion but primarily receive water from other diversions and/or sources.

A small acreage west of Valley creek and within HES 272 is irrigated from Elk Creek. The western portion of HES 420 is also irrigated from Elk Creek but from a diff P/O. This P/O is shared with the deeded right that has been split for two parcels in HES 577. The irrigated ground west of Valley Cr in HES 422 is irrigated from the no other ground west of Valley Cr was found to be currently irrigated (this includes HES 273)

A. AJ CLAIMED USES:

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

SOIL TYPE	OPTIMAL / ROTATION (chart)	ACTUAL / ROTATION (field)	ACRES PER SOIL TYPE (field)	RATE PER ACRE (chart)	TOTAL DIVERSION RATE
RPI	4.33	15*	58.3	1.16	2.69 CFS
GO1	14.66	15	98.7	1.04	3.88 CFS

NOTES: The delivery system from the P/D in Sec 4 is a gravity system in that Hanks Creek runs into the ditch and then turns away from the Valley Co ditch just any excess water from Mc Gowan Creek will flow into various natural channels and eventually be used within the Valley Co system. Other advantages that normally do not flow was noted also under the system (e.g. Thompson Co). There are also along the eastern side of the entire N¹/₂ of the valley do at times also contribute water to the Valley Creek diversion system. It is virtually impossible to quantify this water.

See also a 3pg narration on System dated 6-2-94.
