RE: SNAKE RIVER BASIN ADJUDICATION CLAIM A71-10054 RENUMBERED
TO A71-00053

Dear Mr Bennetts

Enclosed is a proof report of the amended and then "Zed" right A71-10054. The claim should reflect the amended information that you submitted. Also enclosed is the receipt for the additional 10 acres included in the amendment.

After amending A71-10054, I renumbered it to A71-00053. Your claimed use will be recommended under the new number. Please review all of the enclosed records to verify that the changes have been data entered correctly.

AFFIDAVIT - WATER USE

RE: WATER RIGHT NO. A71-10054

STATE OF IDAHO)
 : ss.
County of Custer)

The undersigned, first being duly sworn, deposes and says as follows:

1. I am a male, born in March of 1921, presently residing in Custer County, Idaho. My parents had interests in a cattle ranch, with a winter operation near Challis and a summer operation above Stanley, during my early years.

2. I have reviewed the print-out from Idaho Department of Water Resources attached and made a part hereof as Exhibit A, and am familiar with the facts stated therein.

3. In the summer of 1927 I can recall attending a rodeo which was being held at the place of use. I can state from my own memory that at that time the approximately 30-acre tract was being irrigated and grass was growing. In fact, my uncle and others had to move some of the existing ditches and fill old ditches to accommodate the race track for the 1927 rodeo. The lands, however, continued to be irrigated and held to beneficial use for pasturage even with the presence of the rodeo grounds. This practice continues up to this date. However, it has been some time since the lands were used for summer rodeo purposes. The lands in question need to be irrigated to be productive.

4. I also state that I remained interested in the cattle business conducted on these and surrounding lands until very recently when I sold my ranching operation to Daniel J. Mahoney, Jr. My only extended absence was a brief period during World War II. Therefore, I have maintained contact with the yearly use of the lands and believe I have sound bases for these statements which to my best knowledge and belief are accurate and true.

RE: SNAKE RIVER BASIN ADJUDICATION CLAIM A71-10054

Dear Mr Bennetts

Enclosed is a copy of the orthophotograph U-68 enlarged 200% that shows the P/U as I found it. The boundaries on the east and west are the Park Creek channel on the west and natural drainage channels on the east. Ground east of this boundary is considered sub irrigated from Valley Creek itself. I have also enclosed a copy of USDA-F 173-13 (8-28-72 FLIGHT) that better shows the boundaries outlined on the ortho photo.

I have highlighted a portion of page 13 of the Cavanaugh vs Merritt decree that shows the Park Creek use as decreed. This right appears to be the same use as claimed under the current claim. The only discrepancy that I have identified is that the diversion ditch could not carry the 2.40 cfs decreed. I measured 0.81 cfs and consider this rate to be near the capacity of the ditch. I have enclosed a copy of a picture of the measurement location that shows the ditch characteristics. The water level in the original photo is clearer and shows the water level to be at the vegetation water line.

As there are several items requiring an amendment to update this claim, the best way to correct those areas would be to complete a new claim form but indicate on that form that it represents an amendment of A71-10054 rather than a new claim.

RE: Pardoe claim

Dear Mr Bennetts:

I have reviewed our records for claims A71-10054 and A71-00053 and it appears that there may be some confusion over the earlier amendments. Our records (computer printouts attached) indicate that A71-10054 was the original filing, and was for a priority of 1927 and 30 acres. In 1994, during work with Kelly Christensen, Mahoney amended the claim to specify a priority of 1913 and 40 acres. The amendment apparently corresponded with an earlier decreed right and the record was renumbered to A71-00053. This record was ultimately recommended to the court and is presently unobjected to.

Please get in touch with me if I have misunderstood some aspect of your client's concerns. Have a warm and wonderful Holiday Season and a terrific next year.

Sincerely,

RE: Pardoe Water Right #71-00053 or #71-10054

Dear Doug:

In reviewing the above for the Pardoes, I have noted that according to the records of Dan Mahoney, Jr. (Pardoes' predecessor in interest), Water Right #71-00053 was amended in april of 1994 and was assigned a new number (#71-10054).

Please pass this along to whomever can check your records to determine the status of the right, as the Pardoes have received nothing through the adjudication process showing the later right or amendment.

Thank you.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

RE: NAME CHANGE ON WATER RIGHT CLAIM

DEAR MR. MAHONEY:

I RECENTLY COMPLETED THE NAME CHANGE THAT YOU REQUESTED FOR YOUR IDAHO WATER RIGHT CLAIMS. THE PAPERWORK VERIFYING THIS SHOULD HAVE BEEN RECEIVED A FEW DAYS AGO.

IN FURTHER RESEARCH, I DISCOVERED A CLAIM (A71-00042A) UNDER THE NAME OF ATLANTA MAHONEY TRUST. DO YOU WANT THIS ONE'S NAME CHANGED TO MATCH THE OTHERS? IF SO, ANOTHER OWNERSHIP CHANGE MUST BE COMPLETED.

I HAVE ALSO FOUND THAT JAMES BENNETTS IS THE ATTORNEY-ON-RECORD FOR CLAIM A71-00053. HE IS ON NONE OF THE OTHERS. WOULD YOU LIKE THIS CHANGED? I AM ENCLOSING PROFILE REPORTS OF THESE CLAIMS, ALONG WITH BOTH A CHANGE OF OWNERSHIP AND A CHANGE OF ATTORNEY.

IF YOU HAVE ANY QUESTIONS, PLEASE CONTACT ME AT THIS OFFICE. THANK YOU FOR YOUR TIME.

SYSTEM DESCRIPTION:

The system is a diversion from Park Creek (the diversion normally carries ^{all} the natural flow of Park Creek without a diversion structure, the ditch flows along the Northern border of the Fossil P₁₄ and is periodically diverted to irrigate the pasture. A few cross ditches are also utilized in the on of this ground. Park Creek forms the western boundary; natural channels that carry water ~~to~~ to Valley Creek form the eastern boundary. The ground between the marked P₁₄ (see map) & Valley Creek is not irrigated from Valley C. & no water is diverted to on that ground. The acre length of run for in is approx 300'.

Explain in notes, below.

NOTES:

The ditch was measured on 9-21-93 and was near capacity. The ditch was carrying all of the Park Creek water. Flow analysis indicates a need for 2,75 CFS for a 10 day no let-up period. As the ditch could not carry that amount of water I am recommending the measured rate (calculated 30%) upwards based upon an estimated 3 inches of depth not subject at this time. Any additional water available would spill back into Park Creek and not be available for diversion downstream.

This photo set is looking east on the left to southeast on the right and shows the ditch running to the right of the shrubs in the left photo. The normal channel for Park Creek water is now the ditch and no diversion structure is necessary to convey the water down the ditch. The historical stream channel follows the shrubs along the right side of this photo set. The P/U for this claim begins at the fence crossing the two photos.
