MEMORANDUM

TO: FILE NOS. 71-00064 & 71-00069

FROM: PAM SKAGGS/^{CS}STATE OFFICE

SUBJECT: TRANSFER NO. 5105

DATE: October 22, 1997

=====

Transfer No. 5105 adds points of diversion, groundwater as a source, and changes the place and nature of use under all of Right No. 71-00069 and a portion of Right No. 71-00064, splitting the right into parts A and B.

The applicant has been working with the Forest Service, Department of Fish and Game and other pertinent agencies for the last few years to find an acceptable plan to change the water system on Busterback Ranch to reduce impact on fish in the surface source, Alturas Lake Creek, and continue irrigation in an acceptable manner.

Special requirements exist due to the location of the ranch in Sawtooth National Recreation Area and scenic easement requirements. With irrigation allowed only at night, a system has been designed to meet this time limitation using a high rate of diversion. Region calculations identified the minimum rate with an eight hour cycle while the system was designed to use the maximum rate available under these rights and will be able to accomplish the irrigation in six to seven hour cycles.

State office staff discussed the transfer proposal with the applicant prior to final recommendations reflected in the approval document. Domestic use has been dropped and stockwater use added with the similar diversion rate and annual diversion volume. Both uses are relatively non-consumptive and no expansion occurs through this change of use.

Season of use and diversion volume were adjusted to current standards. Recommended conditions include drilling permit requirements, multiple points of diversion/measuring devices, future annual reporting, fish screens, surface to groundwater limitation, surface diversion will cease in future, permissible place of use, extended completion time, 5 year non-use forfeiture, combined limits, irrigation overlap and standard transfer conditions.

RE: Alturas Lake Creek Diversion Modification

Gentlemen:

Thank you for your letter dated January 21st, 1997 regarding the future plans for removing the "Old Breckenridge/USFS diversion" structure on Alturas Lake Creek. The proposal brings several issues to mind which may need to be addressed in your planning process.

The first issue is that of protection of the stream channel. The proposal to remove the "Old Breckenridge/USFS diversion" sounds like a worthwhile and beneficial project, however, it does not appear to be an activity described in our minimum standards on stream channel alterations and would not be covered under our memorandum of understanding with the USFS. An application for a stream channel alteration describing how the proposal would be accomplished would allow us to get comments from other concerned agencies and give more meaningful comments in the form of conditions of approval on the permit. Please describe your plan for bank rehabilitation in your application. Enclosed is the application form and instructions for your convenience.

The second issue is that of water rights. As you indicate, the private rights (Breckenridge) will cease being diverted at the old structure and will be diverted elsewhere. This brings up the question of the need for transferring the point of diversion of these rights. To my knowledge no such transfer has been filed. If the new point of diversion is located in a different legal description then a transfer is required. Along these same lines, for your information, the Breckenridge rights are involved with an "Order Extending Resumption Of Use Date" dated February 15th, 1995 which requires resumption of the use by April 15th, 1997. It appears that these issues of "transfer" and "resumption of use" should be addressed in the near future. By copy of this letter I will inform the Breckenridge and their attorney of record of these concerns.

If you have any questions regarding these matters, please feel free to contact our office.

Sincerely,

Allen Merritt, PE
Southern Region Manager

Dear Mr. Merritt:

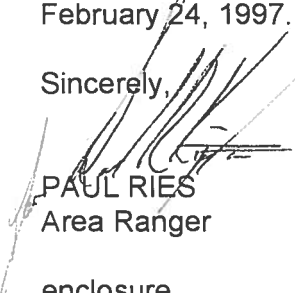

We are proposing a project within the Sawtooth National Recreation Area that may be of interest to you. The purpose of this letter is to inform you of the proposal, and ask for any comments or questions you may have. Your comments are valuable to us as we begin planning this project and will help us determine if, and how, we will implement it. A map is attached for your reference.

Alturas Lake Creek is a tributary to the Salmon River near its headwaters. Approximately three miles from its confluence with the Salmon River, in T. 7 N., R. 14 E., Section 4, a concrete diversion structure exists (ALC1). Recently, changes in the private users irrigation system has resulted in no further need of the existing diversion and associated ditch lines on public land. The concrete structure spans the channel and ditch inlet, roughly 50' x 15' in size. Approximately 1-1/4 miles of total ditch length exists on public land. Approximately one-half of the total is main ditch, 10 to 15 feet in width. The remaining length is supply ditches, in three branches, two to five feet in width. The diversion and ditch structures are an impediment to the migration of adult and juvenile salmon, including both sockeye and chinook salmon.

The Sawtooth NRA proposes to remove the diversion structure and back-fill portions of the existing ditch lines. The structure would be removed and banks rehabilitated. The mouth of the ditch would be closed and rehabilitated. For considerable length, the existing ditches have been over-grown with lodgepole pine since construction many years ago. Where possible without substantial disturbance to this established vegetation, these ditches would be back-filled and revegetated. It is estimated that perhaps one-half to two-thirds of the ditch length could be back-filled.

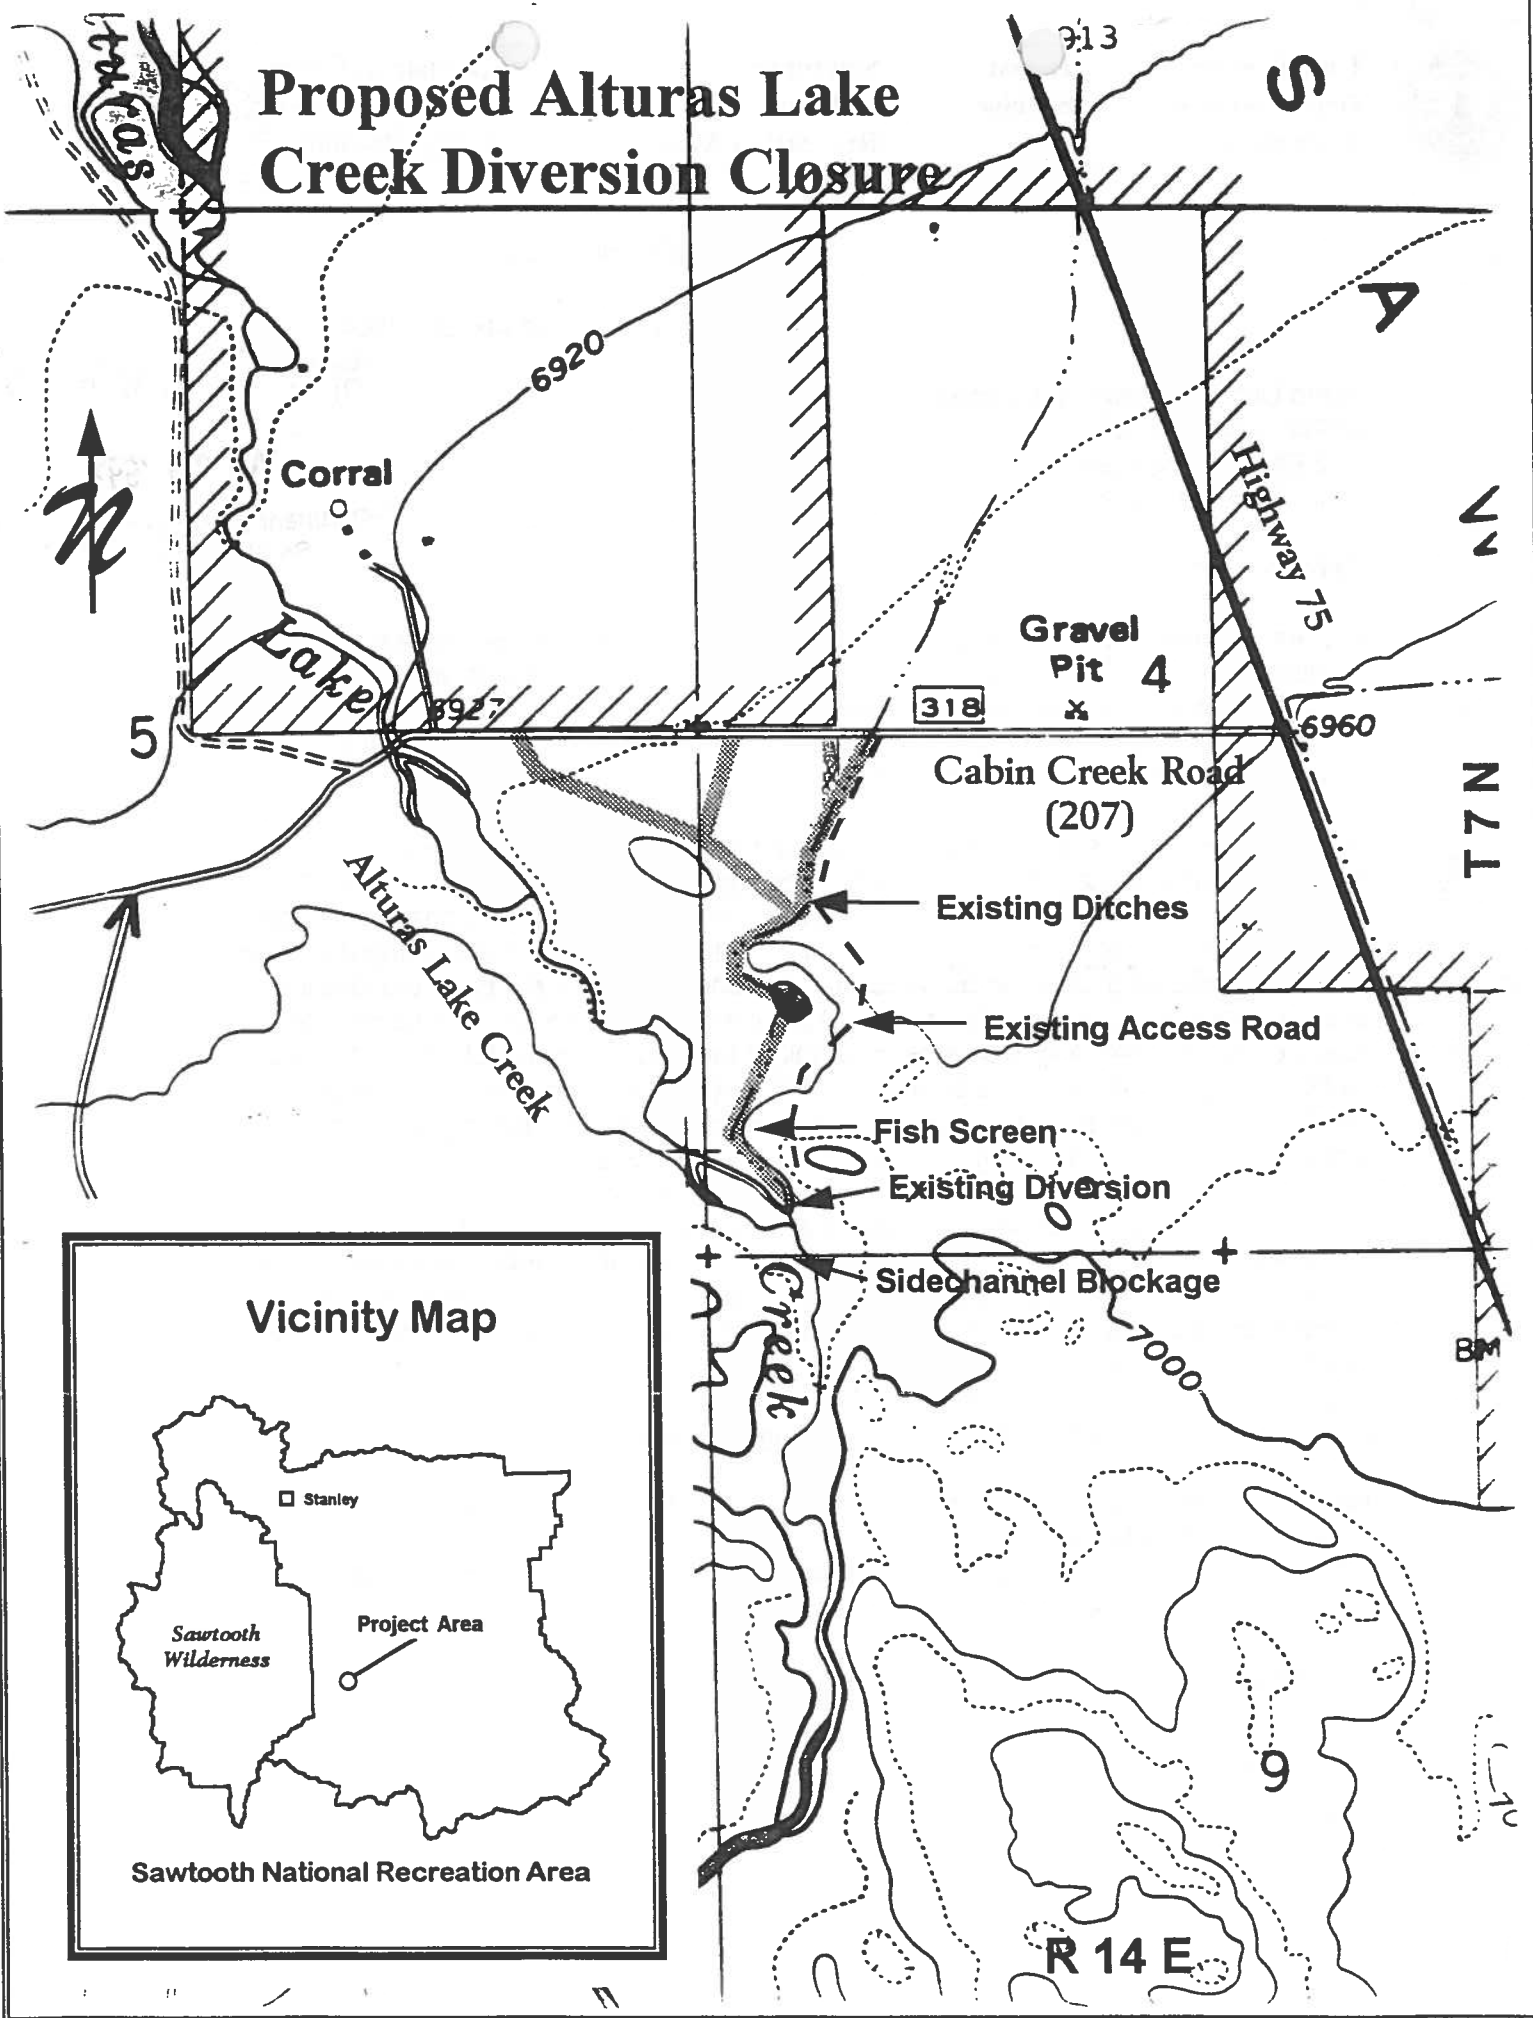

We will be analyzing this project in the near future. I hope you will assist us in developing a quality decision on this proposal by providing constructive questions or comments. Your questions or comments would be best utilized if received before February 24, 1997. Mark Moulton, at our Stanley Office, is the project leader.

Sincerely,

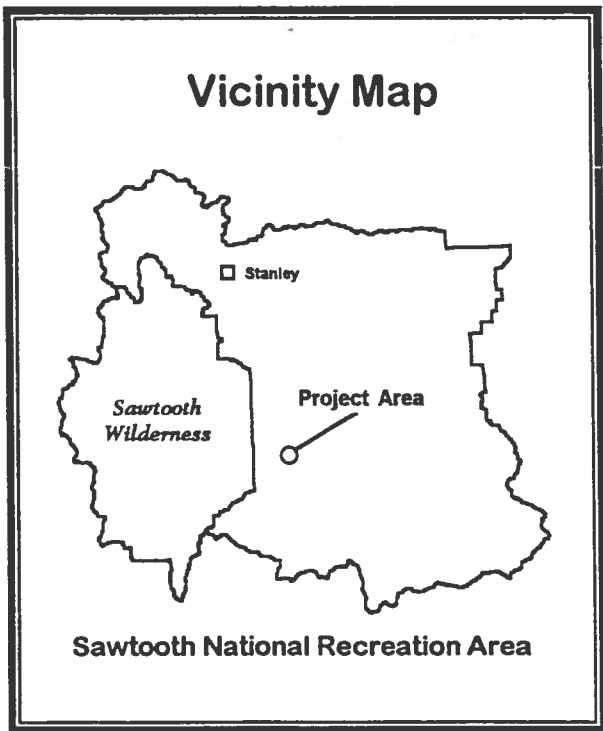

PAUL RIES
