RE: Notice of error reply, 71-02063 & 71-04037

Dear Mr & Mrs Carstensen:

I am writing to acknowledge your replies to our proposed recommendations. Thank you for your quick response. I have reviewed the field exam notes and various maps in the files. It appears to me that the upper ditch heads from the river in the SENESE S8, as we recommended. However, perhaps you have other information that would clarify this, and which was not included in your reply.

I believe there is still time to exchange correspondence, and suitably resolve this uncertainty, before our final recommendation is sent to the court (mid-September). Please forward any documentation you may have that would resolve the issue. I know we both want the most accurate information recorded in the right.

One observation I have made on diversions in the area is that there are often control gates and side channel spills, which return water to the river, some distance down ditch. I don't know for certain whether this is the case for your ditch and whether this may be part of your considerations. IDWR considers that the point of diversion to be where the ditch actually first separates from the river or stream and not at the controlling works.

Please contact us if you have further questions or need other assistance. Again, I look forward to receiving any further information on the question of diversion location.

Sincerely,
