RE: Evidence of Priority SRBA Claim A71-04013 (Groundwater)

Dear Mr. Massey:

I have reviewed the copy of the affidavit which you submitted to my office earlier this year to support the priorities claimed on your three claims. (A71-04013-Groundwater; A71-04014-Gold Creek; A71-04015-Springs) The affidavit supports the priorities for your Gold Creek and Spring diversions however it does not mention or support the priority for the groundwater (well) use. Before I can recommend your groundwater claim I will need supporting evidence for the priority of the groundwater use. Please submit this evidence as soon as possible. I am in the process of drafting my recommendations for the court to the rights in your area and if I do not hear from you soon (within 3 weeks) I will be required to recommend that your groundwater claim be disallowed.

Additionally, since the affidavit described above was a copy I request that you submit the original for our files.

If you have questions please feel free to contact our office.

Sincerely,

Allen D. Merritt, P.E.
Water Rights Supervisor

Review & Analysis of Massey Claims.

On 7/26/93 while @ Rocky Mtn. Ranch ^{IDAHO} I questioned Mr. Aguilar about who Mr. Massey was and where he might live since I had found old WR records that were not claimed. He indicated Mr. Massey was at his cabin earlier in the day so he took me over to meet Mr. Massey. We met and discussed the SRBA and Mr. Massey indicated he would come in and file claims in the near future. On 7/29/93 Mr. Massey came into the office & filed claims. I told him he would have to provide evidence of priority for the claims he was filing. During our visit we discussed permit 71-07041. He indicated that that was for an additional diversion from Gold CK that was never developed. All of the water developed or used from Gold CK is covered under A71-04014.

On 8/19/93 while in the area I observed Mr. Massey's gold CK diversion running so I measured the flow in the ditch. Later that day I caught Mr. Massey home so we went over his uses. Mr. **MICROFILMED** has three water sources which are described in the three claims. **OCT 28 1994**

Claim A71-04013 is for the irrigation well located in the SE corner of the property. This well is used to supplement the surface water sources. In 1993 this well was not being used. The motor had been removed for repair. I questioned how long the well had not been used but Mr. Mersey was vague. I later contacted the power company to see about records but apparently the well has no separate service from the house power so they couldn't tell when it was last used. Review for possible forfeiture stopped at this point. The capacity of the pump was estimated via the theoretical calc. in the file. $Q \approx 0.41$ cfs.

Claim A71-04014 is for the water historically diverted from Gold CK. I measured the discharge thru the culvert just below the P/O on 8/19/93 and found 0.55 cfs in the partially full pipe. Since more water could be easily diverted it appears the restriction would be the culvert so I calculated a full pipe flow to be 0.68 cfs.

MICROFILMED

OCT 28 1994

Claim A71-04015 is for the water diverted from two springs. The first spring is

POOR ORIGINAL

located SW of the house near a pond which captures the spring. Some flood irrigation from the pond is done but most of the water from the pond flows into a ditch which flows north in back of the house where another spring flows into the ditch. This second spring supplies water for the house via a pump in the basement. The excess water from the spring flows into the ditch. Just below the house Mr. Messey occasionally places a small gas portable pump and sprinkles the small pasture area around the barn. A little further down the ditch Mr. Messey irrigates via flood irrigation a small area just before the ditch leaves the Messey property and flows on to the Rember property. This ditch on the Rember property was measured @ 0.40 cfs.

The upper bench which contains approx. 6.2 Ac. is watered from all three sources.

71-04013 — All 6.2 Acres

71-04014 — All 6.2 Acres

71-04015 — 1.2 Acs of the 6.2 Acres.

The area below the spring ditch is only watered from the spring and is approx 1.2 Acres

Total of 7.4 Acres is watered on the farm

MICROFILMED
OCT 28 1994

POOR ORIGINAL

Excess Flow Analysis

The upper bench (6.2^{Ac.}) is SNI type soil
and based on the wild flooding analysis
justifies 0.75 cfs. *

The land below the spring ditch (1.2 Ac.) is RPI
type soil and based on the wild flooding
analysis justifies 0.09 cfs. *

* Mr. Massey in our discussions indicated he
generally got back over the place in 10 days.
Optimum rotation for SNI is $0.69 / .17 = 4 \text{ days}$
RPI is $1.13 / .17 = 7 \text{ days}$.
 $\therefore$ 10 day used in calculations.

Since 71-04013 calc. discharge was less than
0.75 cfs the 0.41 cfs was recommended.

Since 71-04014 calc. discharge was less than
0.75 cfs the 0.68 cfs was recommended.

Rt. 71-04015 was recommended for
0.09 cfs for the 1.2 Ac. below
and for 0.03 cfs/acre for the 1.2 Ac. above
on the bench sprinkled or 0.04 cfs $\therefore$
total is 0.13 cfs for irrigation. The
spring nt also includes 1 hour @ 0.04 cfs.

MICROFILMED
OCT 28 1994

standard rate. $\therefore$ Total of right is
0.17 cfs.

When the three rights are used in combination
on the 6.2 Acre tract on the bench
they are limited to the reasonable rate
of 0.25 cfs justified for these lands.

THEORETICAL FLOW RATE ANALYSIS FORM

FILE: A71-04013
DATE: 2/4/91
BY: ADW

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (H.P.) \times (EFF.)}{TDH}$

Q = CFS
H.P. = Total Brake Horsepower of pumping plant (including booster)
EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)
TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]
LIFT = depth to water in FEET from land surface to pumping water level
PSI = pumping pressure measured in psi near pump (if open discharge assume zero [0])

(8.8) (.....².....) (0.70)

Q = $\frac{\text{.....}}{[(\text{.....}^{30'}) + (\text{.....} \times 2.31)]}$ = 0.41

REMARKS

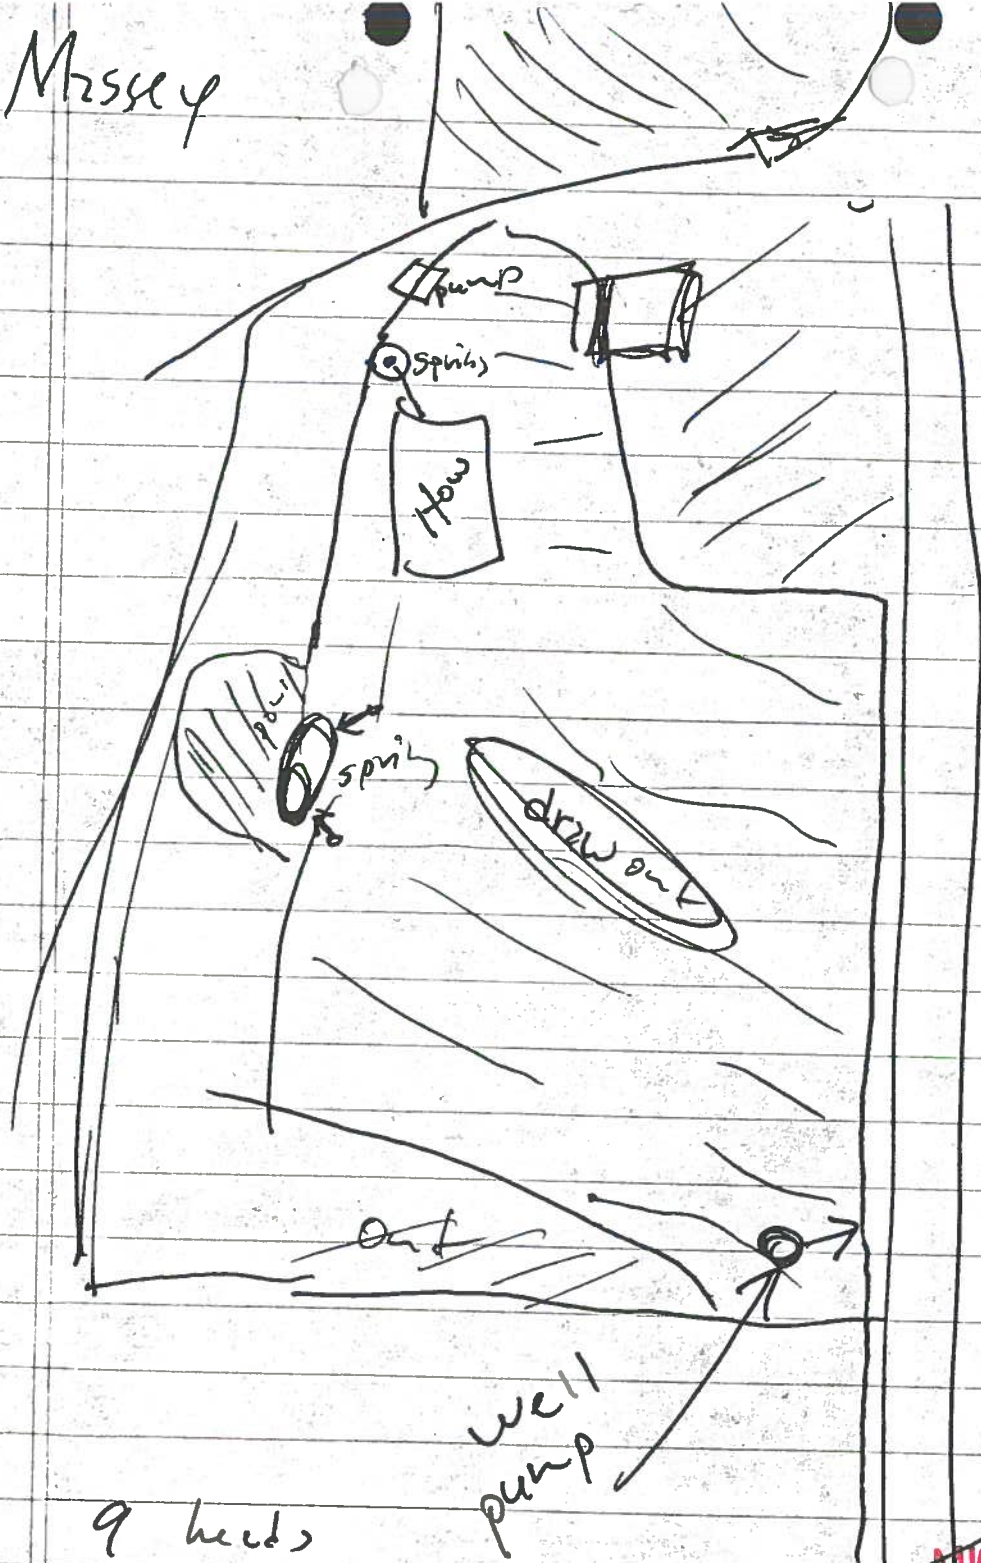

Mr. Massey indicated he once had sprinklers hooked to the well but 2+ times just dumped the water in the ditch.

It is being analysed open discharge into the ditch.

RE: Evidence of Priority SRBA Claim A71-04013 (Groundwater)

Dear Mr. Massey:

I have reviewed the copy of the affidavit which you submitted to my office earlier this year to support the priorities claimed on your three claims. (A71-04013-Groundwater; A71-04014-Gold Creek; A71-04015-Springs) The affidavit supports the priorities for your Gold Creek and Spring diversions however it does not mention or support the priority for the groundwater (well) use. Before I can recommend your groundwater claim I will need supporting evidence for the priority of the groundwater use. Please submit this evidence as soon as possible. I am in the process of drafting my recommendations for the court to the rights in your area and if I do not hear from you soon I will be required to recommend that your groundwater claim be disallowed.

Additionally, since the affidavit described above was a copy I request that you submit the original for our files.

If you have questions please feel free to contact our office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Allen D. Merritt'.

INTER-DEPARTMENT MEMO

TO: A71-04013

SUBJECT: Priority

FROM: Allen Mewitt

DATE: 11/1/93

I phoned Salmon River Elec. Co-op to see if they could tell me when pump was first hooked-up or when last used. I talked with Hiedi (879-2283) and she indicated that from their records she couldn't tell. She assumed that the pump must be hooked on to the domestic service of not separate for irrigation.
