Dear Allen,

Enclosed is a copy of the
Affidavit signed by Martine
Fleming. Some said she was
dead, but I located her in
Hoodsport, Wash.

If you need the original instead
of a copy I will give it to you
when you come up.

Please let me know when you
will be here so I will be around.
I am planning on going to Tenn.
about Sept. 1

Re: Snake River Basin Adjudication (SRBA)
Water Rights #71-04013, 71-04014 & 71-04015
Change of Address

Dear Water Right Holders:

Mail recently sent to you was returned to us by the Postal Service. They also advised us your address has changed to the above address. We have enclosed the returned mail.

Although we have reached you at the address above, we need your written confirmation this is your correct mailing address before we can change our records.

Please sign your name at the bottom of this letter and return it to this office. Make corrections to your name and address if necessary before returning this letter, list any other water right claims you have, and return the letter by August 10, 1998. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of the property connected with the water right referenced above, please call this office toll-free at 1-800/451-4129 to obtain a form to make this required change to the claim record.

Sincerely,

S. Sherman

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

Review & Analysis of Massey Claims.

On 7/26/93 while @ Rocky Mtn. Ranch ^{IDAHO} I questioned Mr. Aguilar about who Mr. Massey was and where he might live since I had found old WR records that were not claimed. He indicated Mr. Massey was at his cabin earlier in the day so he took me over to meet Mr. Massey. We met and discussed the SRBA and Mr. Massey indicated he would come in and file claims in the near future. On 7/29/93 Mr. Massey came into the office & filed claims. I told him he would have to provide evidence of priority for the claims he was filing. During our visit we discussed permit 71-07041. He indicated that that was for an additional diversion from Gold CK that was never developed. All of the water developed or used from Gold CK is covered under A71-04014.

On 8/19/93 while in the area I observed Mr. Massey's gold CK diversion running so I measured the flow in the **MICROFILMED** Later that day I caught Mr. Massey **OCT 28 1994** so we went over his uses. Mr. Massey has three water sources which are described on the three claims:

Claim A71-04013 is for the irrigation well located in the SE corner of the property. This well is used to supplement the surface water sources. In 1993 this well was not being used. The motor had been removed for repair. I questioned how long the well had not been used but Mr. Marney was vague. I later contacted the power company to see about records but apparently the well has no separate service from the house power so they couldn't tell when it was last used. Review for possible forfeiture stopped at this point. The capacity of the pump was estimated via the theoretical calc. in the file. $Q \approx 0.41$ cfs.

Claim A71-04014 is for the water historically diverted from Gold CK. I measured the discharge thru the culvert just below the P/O on 8/19/93 and found 0.55 cfs in the partially full pipe. Since more water could be easily diverted it appears the restriction would be the culvert so I calculated a theoretical flow to be 0.68 cfs.

MICROFILMED

OCT 28 1994

Claim A71-04015 is for the water diverted from two springs. The first spring is

located SW of the house near a pond which captures the spring. Some flood irrigation from the pond is done but most of the water from the pond flows into a ditch which flows north in back of the house where another spring flows into the ditch. This second spring supplies water for the house via a pump in the basement. The excess water from the spring flows into the ditch. Just below the house Mr. Messey occasionally places a small gas portable pump and sprinkles the small pasture area around the barn. A little further down the ditch Mr. Messey irrigates via flood irrigation a small area just before the ditch leaves the Messey property and flows on to the Rember property. This ditch on the Rember property was measured @ 0.40 cfs.

The upper bench which contains approx. 6.2 Ac. is watered from all three sources.

71-04013 — All 6.2 Acres

71-04014 — All 6.2 Acres

71-04015 — 1.2 Acs of the 6.2 Acres.

The area below the spring ditch is only watered from the spring and is approx 1.2 Acres

Total of 7.4 Acres is watered on Messeys.

MICROFILMED
OCT 28 1994

Excess Flow Analysis

The upper bench (6.2^{Ac.}) is SN1 type soil and based on the wild flooding analysis justifies 0.75 cfs. *

The 12nd below the spring ditch (1.2 Ac.) is RPI type soil and based on the wild flooding analysis justifies 0.09 cfs. *

* Mr. Messey in our discussions indicated he generally got back over the place in 10 days.
 Optimum rotation for SN1 is $0.69 / .17 = 4 \text{ days}$
 RPI is $1.13 / .17 = 7 \text{ days}$.
 $\therefore$ 10 day used in calculations.

Since 71-04013 calc. discharge was less than 0.75 cfs the 0.41 cfs was recommended.

Since 71-04014 calc. discharge was less than 0.75 cfs the 0.68 cfs was recommended.

MICROFILMED

Rt. 71-04015 was recommended ~~OCT 28~~ 1994

0.09 cfs for the 1.2 Ac. below
 and for 0.03 cfs/acre for the 1.2 Ac. above
 on the bench sprinkled or 0.04 cfs $\therefore$
 total is 0.13 cfs for irrigation. The
 spring rte also includes 1 house @ 0.04 cfs.

Review & Analysis of Massey Claims.

On 7/26/93 while @ Rocky Mtn. Ranch ^{IDaho} I questioned Mr. Aguilar about who Mr. Massey was and where he might live since I had found old WR records that were not claimed. He indicated Mr. Massey was at his cabin earlier in the day so he took me over to meet Mr. Massey. We met and discussed the SRBA and Mr. Massey indicated he would come in and file claims in the near future. On 7/29/93 Mr. Massey came into the office & filed claims. I told him he would have to provide evidence of priority for the claims he was filing. During our visit we discussed permit 71-07041. He indicated that that was for an additional diversion from Gold CK that was never developed. All of the water developed or used from Gold CK is covered under A71-04014.

On 8/19/93 while in the area I observed Mr. Massey's gold CK diversion running so I measured the flow in the ^{MICROFILMED} Later that day I caught Mr. Massey ^{OCT 28 1994} so we went over his uses. Mr. Massey has three water sources which are described on the three claims:

Claim A71-04013 is for the irrigation well located in the SE corner of the property. This well is used to supplement the surface water sources. In 1993 this well was not being used. The motor had been removed for repair. I questioned how long the well had not been used but Mr. Marney was vague. I later contacted the power company to see about records but apparently the well has no separate service from the house power so they couldn't tell when it was last used. Review for possible forfeiture stopped at this point. The capacity of the pump was estimated via the theoretical calc. in the file. $Q \approx 0.41$ cfs.

Claim A71-04014 is for the water historically diverted from Gold CK. I measured the discharge thru the culvert just below the P/O on 8/19/93 and found 0.55 cfs in the partially full pipe. Since more water could be easily diverted it appears the restriction would be the culvert so I calculated a flow to be 0.68 cfs.

MICROFILMED
OCT 28 1994

Claim A71-04015 is for the water diverted from two springs. The first spring is

located SW of the house near a pond which captures the spring. Some flood irrigation from the pond is done but most of the water from the pond flows into a ditch which flows north in back of the house where another spring flows into the ditch. This second spring supplies water for the house via a pump in the basement. The excess water from the spring flows into the ditch. Just below the house Mr. Messey occasionally places a small gas portable pump and sprinkles the small pasture area around the barn. A little further down the ditch Mr. Messey irrigates via flood irrigation a small area just before the ditch leaves the Messey property and flows on to the Rember property. This ditch on the Rember property was measured @ 0.40 cfs.

The upper bench which contains approx. 6.2 Ac. is watered from all three sources.

71-04013 — All 6.2 Acres

71-04014 — All 6.2 Acres

71-04015 — 1.2 Acs of the 6.2 Acres.

The area below the spring ditch is only watered from the spring and is approx 1.2 Acres

Total of 7.4 Acres is watered on Messeys.

MICROFILMED
OCT 28 1994

Excess Flow Analysis

The upper bench (6.2^{Ac.}) is SN1 type soil and based on the wild flooding analysis justifies 0.75 cfs. *

The land below the spring ditch (1.2 Ac.) is RPI type soil and based on the wild flooding analysis justifies 0.09 cfs. *

* Mr. Massey in our discussions indicated he generally got back over the place in 10 days.
 Optimum rotation for SN1 is $0.69 / .17 = 4 \text{ days}$
 RPI is $1.13 / .17 = 7 \text{ days}$.
 $\therefore$ 10 day used in calculations.

Since 71-04013 calc. discharge was less than 0.75 cfs the 0.41 cfs was recommended.

Since 71-04014 calc. discharge was less than 0.75 cfs the 0.68 cfs was recommended.

MICROFILMED

Rt. 71-04015 was recommended ~~OCT 28~~ 1994

0.09 cfs for the 1.2 Ac. below
 and for 0.03 cfs/acre for the 1.2 Ac. above
 on the bench sprinkled or 0.04 cfs $\therefore$
 total is 0.13 cfs for irrigation. The
 spring rte also includes 1 house @ 0.04 cfs.

standard rate. $\therefore$ Total of right is 0.17 cfs.

When the three rights are used in combination on the 6.2 Acre tract on the bench they are limited to the reasonable rate of 0.25 cfs justified for these lands.

Acre Calc.
