Review & Analysis of Massey Claims.

On 7/26/93 while @ ^{IDaho} Rocky Mtn. Ranch I questioned Mr. Aguilar about who Mr. Massey was and where he might live since I had found old WR records that were not claimed. He indicated Mr. Massey was at his cabin earlier in the day so he took me over to meet Mr. Massey. We met and discussed the SRBA and Mr. Massey indicated he would come in and file claims in the near future. On 7/29/93 Mr. Massey came into the office & filed claims. I told him he would have to provide evidence of priority for the claims he was filing. During our visit we discussed permit 71-07041. He indicated that that was for an additional diversion from Gold CK that was never developed. All of the water developed or used from Gold CK is covered under A71-04014.

On 8/19/93 while in the area I observed Mr. Massey's gold CK diversion running so I measured the flow in the ditch. Later that day I caught Mr. Massey home so we went over his uses. Mr. Massey has three water sources which are described on the three claims:

Claim A71-04013 is for the irrigation well located in the SE corner of the property. This well is used to supplement the surface water sources. In 1993 this well was not being used. The motor had been removed for repair. I questioned how long the well had not been used but Mr. Mersey was vague. I later contacted the power company to see about records but apparently the well has no separate service from the house power so they couldn't tell when it was last used. Review for possible forfeiture stopped at this point. The capacity of the pump was estimated via the theoretical calc. in the file. $Q \approx 0.41$ cfs.

Claim A71-04014 is for the water historically diverted from Gold CK. I measured the discharge thru the culvert just below the P/O on 8/19/93 and found 0.55 cfs in the partially full pipe. Since more water could be easily diverted it appears the restriction would be the culvert so I calculated a full pipe flow to be 0.68 cfs.

MICROFILMED

Claim A71-04015 is for the water diverted from two springs. The first spring is

POOR ORIGINAL

located SW of the house near a pond which captures the spring. Some flood irrigation from the pond is done but most of the water from the pond flows into a ditch which flows north in back of the house where another spring flows into the ditch. This second spring supplies water for the house via a pump in the basement. The excess water from the spring flows into the ditch. Just below the house Mr. Messey occasionally places a small gas portable pump and sprinkles the small pasture area around the barn. A little further down the ditch Mr. Messey irrigates via flood irrigation a small area just before the ditch leaves the Messey property and flows on to the Rember property. This ditch on the Rember property was measured @ 0.40 cfs.

The upper bench which contains approx. 6.2 Ac. is watered from all three sources.

71-04013 — All 6.2 Acres

71-04014 — All 6.2 Acres

71-04015 — 1.2 Acs of the 6.2 Acres.

The area below the spring ditch is only watered from the spring and is approx 1.2 Acres

Total of 7.4 Acres is watered on the farm

Excess Flow Analysis

The upper bench (6.2^{Ac.}) is SN1 type soil
 2nd based on the wild flooding analysis
 justifies 0.75 cfs. *

The land below the spring ditch (1.2 Ac.) is RPI
 type soil 2nd based on the wild flooding
 analysis justifies 0.09 cfs. *

* Mr. Massey in our discussions indicated he
 generally got back over the place in 10 days.
 Optimum rotation for SN1 is $0.69/.17 = 4$ days
 RPI is $1.13/.17 = 7$ days.
 $\therefore$ 10 day used in calculations.

Since 71-04013 calc. discharge was less than
 0.75 cfs the 0.41 cfs was recommended.

Since 71-04014 calc. discharge was less than
 0.75 cfs the 0.68 cfs was recommended.

Rt. 71-04015 was recommended for
 0.09 cfs for the 1.2 Ac. below
 2nd for 0.03 cfs/acre for the 1.2 Ac. above
 on the bench sprinkled or 0.04 cfs $\therefore$
 total is 0.13 cfs for irrigation. The
 soil also includes 1 hour @ 0.04 cfs.

standard rate. $\therefore$ Total of right is
0.17 cfs.

When the three rights are used in combination
on the 6.2 Acre tract on the bench
they are limited to the reasonable rate
of 0.25 cfs justified for these lands.
