Ref: Claims A02-10137, A02-10138 & A55-13666

Dear Joe,

I checked over these claims and after looking them over you may want to consider amending them as I will describe below. I have included full scale maps for your reference that I used to determine these suggestions.

Detailed Description of suggested amendments:

A02-10137:

1. You claimed your ending point on this in the SWNW S14, but didn't claim it as a place of use. ADD IT?
2. The Snake River passes through the SESW of S15, you didn't claim it as a place of use in your instream reach. ADD IT? (If you are not wanting to add it then you will have to add additional beginning and ending points because an instream reach is unbroken).
3. Our recommendations for instream stock CFS amount will be 0.02 CFS as determined by basin wide issue #12. If this was diverted use, the 0.22 CFS as claimed would normally be ok. You don't have to change your claim, however, it will probably help to let you know that 0.02 CFS is the maximum amount we can recommend per basin wide issue #12.

A02-10138:

1. Appears to be ok.

A55-13666:

1. Beginning and ending points were claimed reversed, rule of thumb; upstream = beginning point, downstream = ending point. INDICATE REVERSE?
2. Spring Creek also touches the NWSE and NESE. ADD? (If you are not wanting to add it then you will have to add additional beginning and ending points because an instream reach is unbroken).

Should you decide to make these amendments you may use the computer generated claims to write on to add or make changes, sign and date with the notary and return ASAP.

Sincerely,

Ron Howerton

Ref: Claims A02-10137, A02-10138 & A55-13666

Dear Joe,

I checked over these claims and after looking them over you may want to consider amending them as I will describe below. I have included full scale maps for your reference that I used to determine these suggestions.

Detailed Description of suggested amendments:

A02-10137:

1. You claimed your ending point on this in the SWNW S14, but didn't claim it as a place of use. ADD IT?
2. The Snake River passes through the SESW of S15, you didn't claim it as a place of use in your instream reach. ADD IT? (If you are not wanting to add it then you will have to add additional beginning and ending points because an instream reach is unbroken).
3. Our recommendations for instream stock CFS amount will be 0.02 CFS as determined by basin wide issue #12. If this was diverted use, the 0.22 CFS as claimed would normally be ok. You don't have to change your claim, however, it will probably help to let you know that 0.02 CFS is the maximum amount we can recommend per basin wide issue #12.

A02-10138:

1. Appears to be ok.

A55-13666:

1. Beginning and ending points were claimed reversed, rule of thumb; upstream = beginning point, downstream = ending point. INDICATE REVERSE?
2. Spring Creek also touches the NWSE and NESE. ADD? (If you are not wanting to add it then you will have to add additional beginning and ending points because an instream reach is unbroken).

Should you decide to make these amendments you may use the computer generated claims to write on to add or make changes, sign and date with the notary and return ASAP.

Sincerely,
