SANITARY SURVEY
ALTURAS NORTH SHORE AND SMOKEY BEAR CAMPGROUND

DEC 9 1993

Department of Water Resources
Southern Region OfficeI. DESCRIPTION

Note: These two campgrounds are fed by the same system.

Alturas North Shore Campground - 04140400077602
Smokey Bear Campground - 04140400077612
Sawtooth National Forest
Sawtooth National Recreation Area (D-4)
Facilities Served - Campgrounds. Public Noncommunity.
PAOT - 81 and 60 (91 days/season)
Average Daily Population - 32 and 24
Water Demand - 405 and 300 = 705 (at 100% capacity)
Source from spring.

Date of Survey - October 4, 1978.
Survey Participants - R. C. Smith
Purpose - Routine survey to comply with Safe Drinking Water Act.

II. SOURCE EVALUATION

Geology and Topography - The spring is located about 1/3 the way up the east facing slope of the mountains on the west side of Alturas Lake. The topography is mountainous. The underlying geology is reportedly decomposed granite.

Nature of Soil and Strata - The surface material is a sandy loam.

Water Table, Drainage Area, Slope, etc. - The ground cover above the spring is conifer, sagebrush, and grasses indicating the water table is not near the surface. Thicker grasses and aspen grow below the spring. The drainage area is not large. The slope varies but is generally about 40%.

Proximity to Pollution Sources - Possible infiltration.

Physical, Chemical, Biological Analyses - A chemical analysis of October 27, 1978, indicated the water is well within limits inorganically. Bact. test results have been good.

This is a definite spring.
Spring encasement appears to be good.
There is marginal protection against surface runoff.
The lid needs a rubber gasket to be watertight.
Overflow drains are adequate, but need new screens.

Potential Sources of Pollution:

1. Infiltration
2. Rodents entering system through deteriorated drain screens.
3. Deliberate human contamination.

MICROFILMED
OCT 28 1994

The area is not fenced.
Trespass does not appear to be a problem.

III. TREATMENT EVALUATION

There is no treatment of this water. In the event of bad test results, the system is shut down and/or posted.

IV. DISTRIBUTION SYSTEM EVALUATION

A. Storage

The present system is probably adequately protected against flood waters and surface runoff, but a diversion ditch would help.

Lid needs a new rubber gasket to be waterproof.

Overflow drains need new screens.

Pipes and fittings appear to be adequate.

Proximity to sources of Pollution:

1. Possible surface runoff.
2. Rodents entering through deteriorated drain screens.
3. Deliberate human contamination.

Frost protection appears to be adequate. System is shut down in the fall.

B. Distribution System

Pressure appears to be adequate.

There was no apparent excessive leakage.

Pipe materials and circulation appeared to be adequate.

Proximity to sources of pollution - none.

There are no sewer line crossings.

Drains and valves appeared to be adequate.

There are no stream crossings.

Pipe sizes and frost protection appears to be adequate.

C. Cross Connections

There were no apparent sources of cross connections.

V. PROCEDURAL EVALUATION

Management and operation methods appeared to be adequate.

There are no special skills or qualifications necessary to operate this system other than knowledge of locations of drains, valves, and other system components.

There is no operation and maintenance manual.

Test results were good.

Testing frequency should be monthly during use season. This is being done.

MICROFILMED

OCT 28 1994

Proper sampling and handling procedures are observed.

All samples are sent to State approved labs.

Lab results should be and are being kept and recorded for a history and evaluation.

No followup or corrective action was noted.

Force-account O&M appeared to be adequate.

The system is cleaned, disinfected, flushed, and cleaned prior to seasonal start up.

The system appears to meet the demand.

VI. RECOMMENDED CORRECTIVE ACTION

	<u>Estimated Cost</u>
1. Replace gaskets and drain screens.	\$ 60.00
2. Construct fences and diversion ditches at spring box and storage tank.	2,000.00
3. Locate and draw a diagram of all system components.	100.00
4. Write an O&M manual.	100.00

RE: Evidence of Priority

RESPONSE DEADLINE

DECEMBER 1, 1993

Dear Mr. Breamer:

The Notice of Claims identified on the attached Selection File Contents Report have been filed in the Snake River Basin Adjudication (SRBA) in the name of the USFS. The Notices indicate these water uses are based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date that has been claimed.** Please find enclosed a pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. Since time is short we request that the evidence be submitted as soon as possible with a target deadline of December 1, 1993. If additional notices of claims are to be submitted by USFS for rights presently not claimed and the basis of those claims are "Beneficial Use" it is requested that the evidence of priority be submitted at the time the claims are filed.

Please note that the notices highlighted in yellow are associated with water rights that are based on decrees, licenses or permits. I do not know if this is a data entry error or these notices are intended to claim something different than the state law water right. If you could clarify this matter it will be helpful.

If you have any questions not covered by this letter or the enclosed pamphlet, please feel free to contact me at this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

Subject: Season of Use

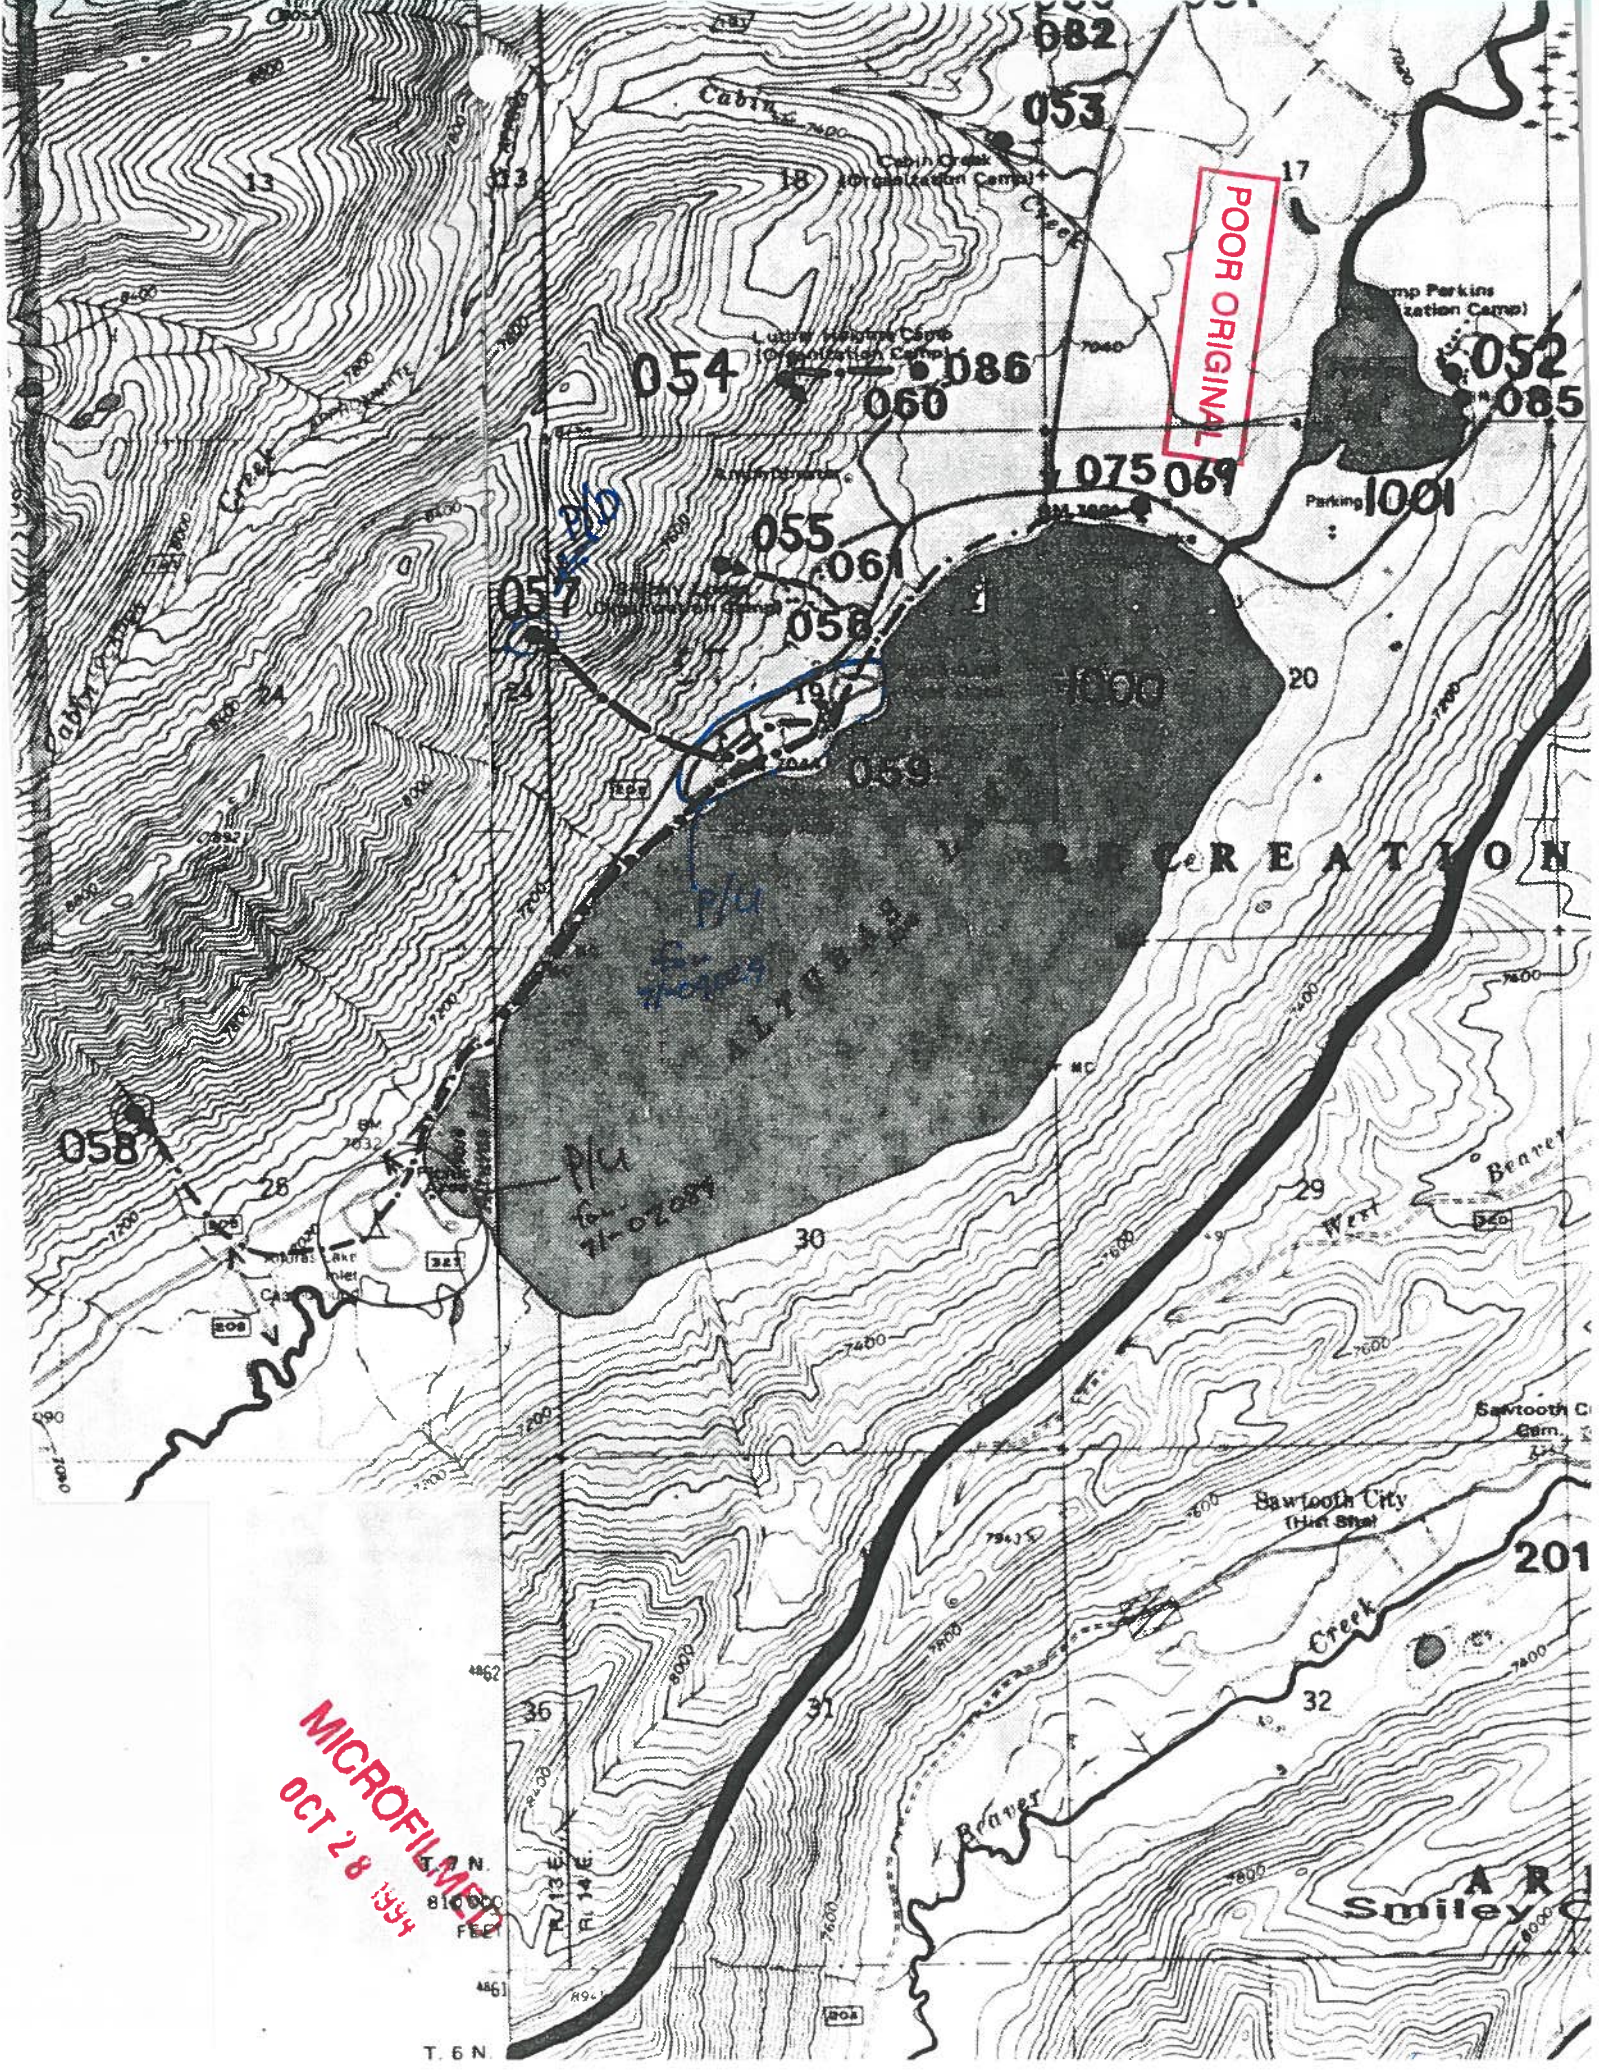

Review of the claims & licenses finds there is a large variation in the season of use for this area with little reason. In an effort to standardize I contacted Mark Moulton, USFS, to provide insight. We discussed the "Sawtooth Nat'l Forest" Map which provides a season of use for the campgrounds generally 6/15 to 9/15 which is more restrictive than the water rights. Mark indicated the use of the campgrounds is dictated more by weather & budget of the USFS. He indicated that the Map's season would be more of an indication that the campgrounds would be open. From our conversation and review of the licenses it appears three situations exist: 1. Handpumps; 2. Pipelines; 3. Organization camps. Generally Organization camps can be year-round - Allow 1/1 - 12/31. Generally Pipelines are shut off early to prevent damage and handpumps are used until weather prevents access. Mark indicated that no license appears to support that use starts around 5/1 and pipelines generally shut off after Labor Day (9/30) reasonable and handpumps used into hunting season until snow limits access, (10/31) reasonable.

Organization camps 1/1 to 12/31

Hand pumps 5/1 to 10/31

Pipelines 5/1 to 9/30

C. FIELD EXAM REQUIRED?

DUE TO PRIORITY DATE DISCREPANCY? (Y/N) DATABASE N FIELD EXAMINER

ARE THERE OBVIOUS REASONS TO QUESTION THE PRIORITY DATE CLAIMED? Y() N(X)

NOTES:

Evidence of priority submitted to support priority was 2 Sanitary Survey sheet conducted in 1978 and 2 part of that survey was 2 detl sheet that indicated that North shore development occurred in 1937 and the Smokies Bear development occurred in 1961. Since the spring serves these areas it is reasonable that the 1961 priority is proper.
