

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS
IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM

CIVIL CASE NUMBER: 39576

Ident. Number: 71-07002

FILED UNDER STATE LAW

1. Name of Claimant: UNITED STATES OF AMERICA on behalf of the U.S.D.A. Forest Service
Address: 550 W. Fort Street MSC033
Boise ID 83724
2. Date of Priority: 07/07/1968
3. Source of water: WASTE WATER/UNNAMED DRAIN Tributary: SALMON RIVER
4. Location Meridian BOISE
Description of Diversion Works: Ditch or Canal From: Other
Location of Point of Diversion
T: 09 N R: 14 E S: 20 SWNWSW
Location of Point of Use
T: 09 N R: 14 E S: 19 NESE T: 09 N R: 14 E S: 19 NWSE
5. Quantity claimed: Period Quantity For
5/ 01 -- 9/ 30 1.80 CFS Irrigation
6. Total Consumptive Use Claimed for Present and Future Use is:
1.80 CFS
7. Present and future uses to which the water is or will be used:
Irrigation
8. Attach the legal description of the reservation, and maps showing for each consumptive use the existing and proposed place of use and existing points of diversion.

Bound separately
9. Remarks:
State Basin: 71
National Forest: Sawtooth
Forest Service Record ID: 04 14 17060201 49 0033
90 Acres, Acquired 01/09/1976. Now irrigating a 20 acre pasture grazed by government owned horses and mules.
10. Describe any other water rights used at the same place and for the same purposes as described above: None
11. Counties within the reservation: Not available

Notice is hereby given that the United States Department of Justice will represent the Department of Agriculture, Forest Service, in all matters pertaining to the Snake River Basin Adjudication. All notices required by law to be mailed by the Director to the claimant should be mailed to the individuals at the address below:

Bruce Bernard
U.S. Department of Justice
Environment and Natural Resources Division
550 W. Fort Street, Box 33
Boise, ID 83724

This form is an attachment to a letter forwarding the claims of the U.S. Department of Agriculture, Forest Service. The signature and affirmation on such letter constitutes the signature of the authorized agent representing the United States of America required for each such claim.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

TYPE OF CHANGE: (P/D), P/U), (N/U), OTHER

The license issued describes P/D in sec 29 but
field review finds P/D in sec 20 where
water is diverted from drain. It appears
this is the P/D always used. Seems to be a
problem of description rather than an actual physical
change. Source is being called "unnamed drain" instead of
wastewater to be consistent with other rights from same drain.

Final Analysis

A71-07002

APM

On 11/23/93 I met Val Hancock, Jay Dorr and Seth Phalen all from the USFS.

We visited several sites during the day including the lands irrigated under this claim. The lands found irrigated are

only irrigated from water diverted from an unnamed drain which collects water near

Sessions lodge from waste water & seeps originating on the old Williams property.

There are three claims to the use of this drain water in the vicinity of

Sessions lodge. During the summer I observed that this drain flowed continuously throughout the summer and it was

estimated that the flow was in the range of 10 cfs. Just north of Sessions

the drain crosses the Hwy and flows on the west side of the Hwy parallel to

the Hwy until it hits the Williams CK. drain where it dumps into

Williams CK and then into the Salmon River. Approx. 1/2 mile above where the

drain dumps into Williams CK where water is diverted for these lands. The

diversion ditch is approx. 6' in width and

MICROFILMED

OCT 28 1994

flows due west to the property. The land being irrigated is very gravelly in nature so I suspected the use consisted of more than 1"/Ac. By using NAPP of 1977 USFS photo of the orthogon I determined that there were 20 Ac being irrigated. From SCS soils maps I found the Plu to consist of BG1 type soil. During our field review the USFS people thought the pasture was watered with 2 day sets of 2-3 wk rotation. I analysed the land as "wild flooding" and determined the irrigation requirement for the 20 Ac based on a 14 day rotation of 8 hr. set was 1.37 cfs. (See Attached Sheets) I also calculated conveyance loss using the Worstell equation and by using the length of ditch from the P/D to mid way down the field (1500') to be 0.51 cfs. I used 4.5 for the "C" value based on pp 35 Hubble. $\frac{2.00 + 6.00}{2} = 4.5$; this is reasonable and matches measured values on other ditches in valley.

I allowed the 1.37 Irrig. Requirement plus $(1.80 - 1.37) = 0.43 < 0.51$ or 0.43 cfs conveyance loss.

MICROFILMED
OCT 28 1994

The soil has a MAD of 1.32"

$1.32 / 0.17 = 7.8$ days optimum
rotation. Since they indicated 2-3 wks
I used 14 days for my wild Flooding,
analysis.

In summary the amt claimed was
allowed in full. (1.80) for intris. of
20 acres. 0.43 cts of the 1.80 cts is
for conveyance loss. No other
rights are used on these lands.
