RE: SRBA Notice of Claim A71-07003

Dear Ms. Graham:

Please find enclosed a receipt # S011253 for the money you recently submitted for payment of the fees for filing your claim. Note that the extension of time request for waiving the late fee was granted.

In reviewing the claim you submitted, I found that the place of use was not completed on the claim. It appears that the claim which you signed was a computer generated claim based on the existing computer record of license 71-07003. This record was incomplete as to the place of use of the water so the claim you signed was incomplete.

I have reviewed the water right file for the license 71-07003 and generated another complete claim based on my understanding of the legal descriptions found in this file. The file is somewhat contradictory but I think I have made the correct assumptions. Please review the claim I have enclosed; particularly the map. If this claim correctly describes your water use please sign the claim before a notary and return it to our office. If the claim needs correction please feel free to write any correction on the claim and then sign before a notary and return it to our office.

Please do not hesitate to contact me if you have any questions.

Sincerely

Allen Merritt, P.E.
Water Rights Supervisor

Dear Water Right Claimant(s):

The Idaho Department of Water Resources (IDWR) has completed its initial investigation of your water right claim(s) in the Snake River Basin Adjudication (SRBA). We have enclosed a print-out showing our preliminary recommendation regarding how your water right should be reported to the SRBA District Court.

Please review the preliminary recommendation carefully. If there is any information on the print-out you believe is inaccurate, please fill out the enclosed reply indicating what changes you believe should be made. Further instructions to assist you with the review are enclosed. For water rights with an irrigation water use, a Geographic Information System (GIS) computerized image of the place of use for your water right is also enclosed.

You may return this reply in person to us at a public meeting IDWR will be conducting in your area. **The meeting will be held on Thursday, August 6th at 7:00 p.m. at the Community Center in Stanley, Idaho.** Please come to the public meeting, where you will have an opportunity to find out more about the SRBA process and speak with a department staff member should you have questions regarding your water right. Please bring any and all information you have which will help the Department understand your water rights and describe them accurately.

This process is intended to ensure IDWR recommends your water right accurately to the SRBA District Court. This is the easiest and least costly means for you to identify corrections you believe should be made to our recommendation. Completion of this process is an important step toward the overall success of the adjudication in Idaho. Your participation is necessary so that accurate information is provided to the SRBA District Court.

We look forward to hearing from you.

Sincerely,

Karl J. Dreher
Director

Dear Water Right Claimant,

To help you with your water right claim(s) in the Snake River Basin Adjudication, this information is sent to you by the Idaho Department of Water Resources (IDWR). Included are the following important documents which I ask you to please read carefully because they give you the opportunity to save a great deal of time and money:

1. Preliminary Recommendation. This is IDWR's *initial* conclusion about your water right and how it should be reported to the SRBA Court. It is not filed with the court, but is provided to you to help correct errors or resolve any disagreement you may have over its content. This document has been prepared following IDWR's investigation and may be different than the claim(s) you filed.

Please review this preliminary recommendation carefully to find any errors or disagreements you have with IDWR's findings.

2. Error Correction/Settlement Process. This is a special service provided to you by IDWR to help you correct errors and resolve any other disagreement you have before the recommendations are filed with the court.

A description of how to work with IDWR is included. Our experience in the SRBA shows that by working in cooperation with IDWR most errors and differences can be addressed before coming into court. It's well worth your time to take full advantage of IDWR's helpful service. If your disagreement cannot be resolved, you will be able to file an objection to IDWR's recommendation when it is filed in court and have the final decision made by the Presiding Judge.

This error correction service is an important opportunity for you to work together with IDWR to make sure your water right claim(s) are decreed accurately. There is no cost to you other than your time reviewing the preliminary recommendation and talking to IDWR about any problem you see.

The goal of the SRBA is to see that your water right(s) are decreed by the court as accurately and fairly as possible. It is important to me that this is done efficiently in order to reduce your costs and present you with your decree.

I strongly encourage you to take full advantage of this opportunity to use the fine and courteous service provided by IDWR.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Daniel C. Hurlbutt, Jr.", is written over the typed name.

DIRECTIONS TO PROPERTY / REMARKS:

I stopped by the place several times while in the area but nobody was ever home. On 7/27/93 someone was finally there but they were just friends of the owner and didn't know anything about the water use. We found an old pipe running down to the creek but no pump. I left word for Mrs. Graham to contact me. She phoned the office on 7/28/93 and left the serial numbers of the pump. Apparently it was stored under the porch and had not been installed yet in 1993. A few days later Mrs. Graham came into the office and we talked about her water use. She indicated she uses the pump to water around the cabin and she specifically indicated that the pump also provides some fire protection.

The pump (1/2 H.P.) delivers to 2 sprinklers to provide fire
needed to keep that area green to provide fire
