E. NARRATIVE/REMARKS/COMMENTS

This permit overlaps lands licenced under 71-02091 and acres historically irrigated by ditches (claimed under A71-10665). To resolve this ~~this~~ recommended acres are only those most recently developed and do not include acres under these other rights.

These same lands are also supplied water from a well covered under 71-07083. (See the narrative in F.E. for 71-07083). The pump described above pumps ~~draws~~ water from the creek and at times pressurizes water from the well. The capacity of the pump is 3.48 cfs so this is the limit when this right, 71-02091C & 71-10665A are being diverted thru this system and additionally when 71-07083 is being pressurized.

The measurement of the pump was conducted by Guy Funderburg in 1984 however the exam was never completed. His notes & exam are attached.

Have conditions of permit approval been met? ☒ yes ☐ no
