	)	WATER RIGHT

THIS FORM MAY ONLY BE USED IF ALL PARTIES HAVE STIPULATED TO ALL ELEMENTS OF A WATER RIGHT AND MAY BE SUBMITTED AT ANY TIME FOLLOWING THE CLOSE OF THE STATUTORY RESPONSE PERIOD.

This form is used to report the proposed elements of one federal reserved water right or one water right acquired under state law. Submission of this form will not result in the automatic issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; and they have been served with sufficient process, according to the law, and have appeared, prosecuted and defended their positions with regard to this water right dispute.

10. Other matters necessary to define this water right:

See water rights agreement between the State of Idaho and the United States for the Craters of

the Moon National Monument, signed May 14, 1992 (Agreement).

The basis of this water right is the reservation made under Proclamation No. 1843.

For purposes of the Agreement, the surface water within the boundaries of the Monument and perched ground water underlying the Monument shall be treated as a self-contained water system.

The use of water for fire suppression benefits the public. Water diverted for fire suppression may be taken randomly, without a definition of the specific elements of a recordable water right, and if so diverted for fire suppression, existing water rights will not be diminished.

These matters are necessary because:

IDWR and the parties agree that such revised remarks are appropriate and should be included in the decree in order to more accurately define the water right as it is defined in the negotiated agreement for the Craters of the Moon National Monument.

These matters do not fall within the 9 elements listed above because:

The remarks make reference to provisions in the Agreement which further define the water right, which references are needed to comply with the understanding of the parties and fully define the federal reserved water right.
