Case No. 39576

STANDARD FORM 5

SUBCASE NO: 34-12388

STIPULATED ELEMENTS OF A
WATER RIGHT

THIS FORM MAY ONLY BE USED IF ALL PARTIES HAVE STIPULATED TO ALL ELEMENTS OF A WATER RIGHT AND MAY BE SUBMITTED AT ANY TIME FOLLOWING THE CLOSE OF THE STATUTORY RESPONSE PERIOD.

This form is used to report the proposed elements of one federal reserved water right or one water right acquired under state law. Submission of this form will not result in the automatic issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; and they have been served with sufficient process, according to the law, and have appeared, prosecuted and defended their positions with regard to this water right dispute.

Instructions For Use

Elements where there has been no objection should be listed exactly as they appear in the director's report. The statement as to an uncontested element shall state "as recommended in the director's report."

Contested elements that are the result of an objection filed with the court shall be accompanied by a statement fully describing all facts, documents, expert opinions and law which support the element of the water right (attach additional pages if necessary).

The use of water for fire suppression benefits the public. Water diverted for fire suppression may be taken randomly, without a definition of the specific elements of a recordable water right, and if so diverted for fire suppression, existing water rights will not be diminished.

These matters are necessary because:

IDWR and the parties agree that such revised remarks are appropriate and should be included in the decree in order to more accurately define the water right as it is defined in the negotiated agreement for the Craters of the Moon National Monument.

These matters do not fall within the 9 elements listed above because:

The remarks make reference to provisions in the Agreement which further define the water right, which references are needed to comply with the understanding of the parties and fully define the federal reserved water right.
