IDAHO DEPARTMENT OF WATER RESOURCES

PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Prior to diversion of water under this water right, the right holder shall submit to the Department a diagram identifying the specific location of the 121.0 acres authorized for irrigation annually, and prior to the irrigation season any year when irrigated acres will be different than previously identified.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

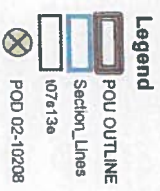

Failure of the right holder to comply with the elements and conditions of this water right as authorized under this transfer is cause for the Director to rescind approval of the transfer.

The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.

Subject: Recommendation

The claimant's attorney submitted a Notice of Error reaffirming a telephone conversation I had with him that the water right would be recommended consistent the Transfer 69980 approved in 2003. Upon further review, the approved transfer for this right amended the previous claim, but the approved transfer did not confirm the water right as is clear from the condition of the approval.

The most obvious error was the total acres approved for the water right. More than one of the tracts approved in the transfer was for 40 acres when in fact a government lot for the tract contains less than 40 acres or more specifically 37 or 38 acres in whole numbers. Secondly the approved transfer did not reflect the meticulous claim review conducted later in the year addressing all the pieces and splits of former right 2-2209. One of the results of that review is a acre limit within the recommended place of use that correspondingly reduced the diversion volume from the amount shown on the approved transfer.

The recommendation prepared for the director's report incorporates the information assembled in a comprehensive manner laying before the Court the water right description that should be confirmed.

Re: Preliminary Recommendation of water right no. 2-10208

Dear Don:

Per our conversation of earlier today, this letter will serve as the Notice of Error for the above referenced water right recommendation claimed by the Cottonwood Mutual Canal Company in the SRBA. In our discussion today, I informed you that the preliminary recommendation of water right no. 2-10208 differed in significant ways from its description in approved transfer no. 69980 (a copy of which I attach hereto for your convenience). It is my understanding based upon our conversation today that the preliminary recommendation will be corrected to match the description in transfer no. 69980 in all respects, and that IDWR will recommend the water right in the SRBA per that description. Please contact me immediately if my assumption is incorrect.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles L. Honsinger". The signature is fluid and cursive, with the first name "Charles" being the most prominent.

CONDITIONS OF APPROVAL

1. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
2. The total instantaneous diversion of water from all points of diversion under Right 2-10209 shall not exceed 0.22 cfs, nor total combined annual volume of 36.8 af.
3. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of the originating approval.
4. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
5. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
