EXAMINATION

Date 7/16/81 Accompanied by Howard Field Total Q measured 7.61
If source is surface water, estimate total flow of source _____
Methods of measurement anemometer Meets Permit requirements? _____

Measurement calculations:

7 inches of water = 78 - 10" anemometer 7.61 cfs meter. Serial # 05812 Model 672
340 acres x 5 AFA/acre = 1700 AFA anemometer # 18736
340 acres x 0.2 = 6.8 cfs open discharge
6.8 x 1.9835 x 245 = 3304.5

WELL/DIVERSION* NO.	HP	MOTOR MAKE	MOTOR SERIAL NO.	PUMP MAKE	PUMP SERIAL NO.	MEASURING DEVICE TYPE	CONDITION OF MEAS. DEV.	REMARKS
	100	D.E.	AL114009	Cornell	18736	anemometer	Fair	

System Description 100 HP motor 12" aluminum mainline - 16" laterals - 210 - 3/8" lds. Pumps from a concrete sump.

*Code with map on reverse side. Disregard code if only one.

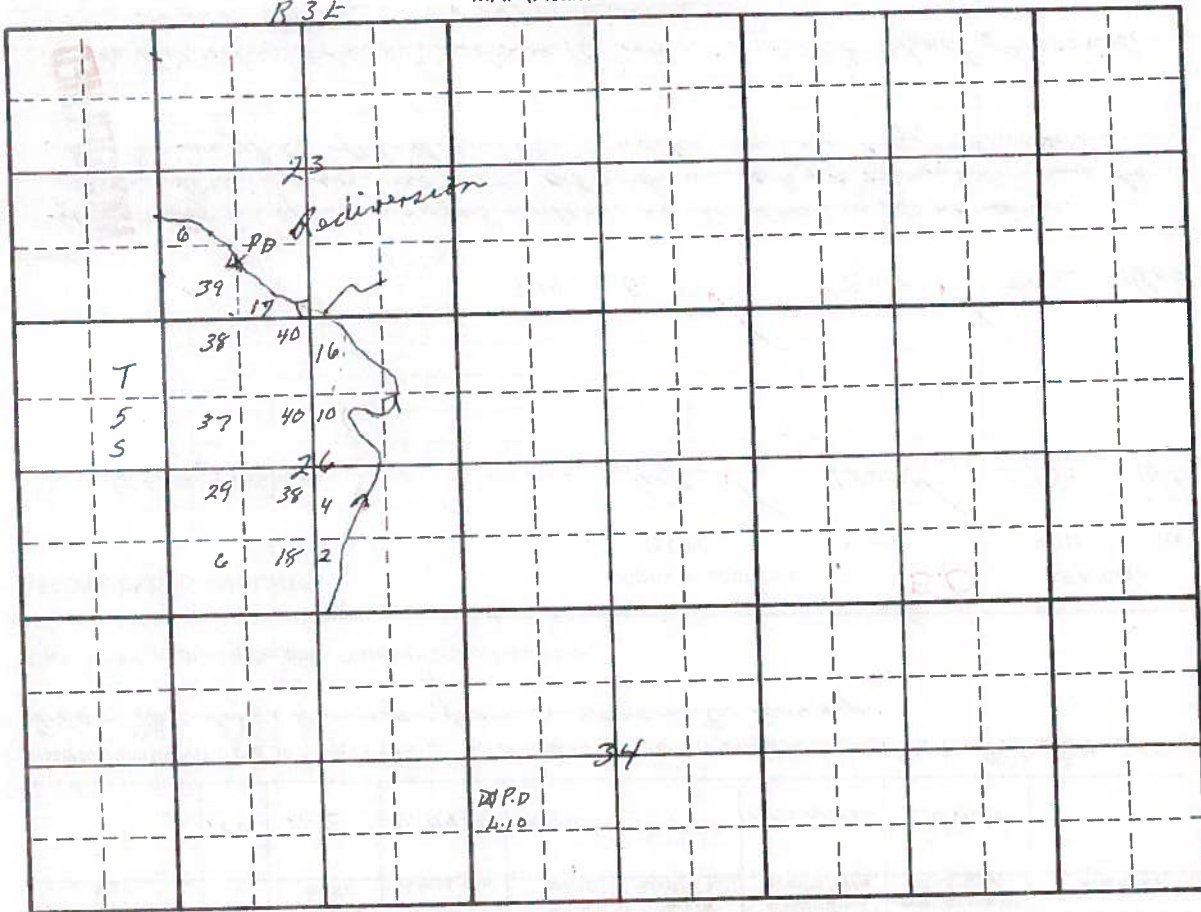

RECOMMENDED AMOUNTS

USE	Irrigation requirement = <u>5.0</u>		AFA/Acre	
	Q (cfs)	V (afa)	FROM	TO
<u>Irrigation</u>	<u>6.8</u> ✓	<u>1700</u> ✓	<u>3/15</u>	<u>11/15</u>
Total	<u>6.8</u> ✓	<u>1700</u> ✓	<u>3/15</u>	<u>11/15</u>

Remarks

The purpose of this application is to secure financing for filling in on way abandon any prior claims to the right filed in the Snake River adjudication.
is it when combined with at-02-0053 shall provide no more than .02 cfs/acre.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

I, A. Kenneth Dunn, Director of the Department of Water Resources hereby

Approve the above Application for Amendment for Permit No. 02-7357.

Witness my hand this 27 day of Aug

A. Kenneth Dunn
Director

MICROFILMED

DET

Don,

I do not want to be unmindful of the basin 02 deadlines for IDWR at the SRBA court.

We are prepared to send you electronic copies of the new 1959 SRBA claim and the amended 1967 SRBA claim for Howard Field, consistent with the land ownership before Howard Field sold 30 acres of irrigated land to Terry Carothers. I think the original SRBA claim for license 02-7357 does not have to be amended, unless it should be amended because of its relationship with the 1959 and the 1967 claims.

We have prepared the claims consistent with 340 acres of land that received 350" of Snake River water delivered through the Grand View Mutual Canal (100" of 1959 priority from the DLE records; 250" of 1967 priority) prior to the 1981 license, and consistent with a 42-1425 accomplished transfer of 95 acres (shorthand for 94.3 acres) of those 340 acres to land that is not listed with the place of use for the 1981 license.

In order to do this, we compared the maps and designated acreages for all of Howard Field's SRBA claims prior to the sale to Carothers, with the IDWR license file and maps for the 1981 license, and then compared that information with the current IDWR recommendations and maps for Howard Field and Carothers.

I end up with 245 acres of the 1959/1967 claims that overlap with the place of use for the 1981 license. I am not certain how to represent this on the SRBA claims. Should there be a 340 acre permissible place of use (from the 1981 license) for the "245 acre" portion of the 1959/1967 claims that is not appurtenant to the "95 acre" accomplished transfer?

You are welcome to call. I didn't realize this would take so much time.

**SUMMARY STATEMENT
HOWARD FIELD'S APRIL 15, 1959 PRIORITY CLAIM**

Howard Field owns property in Section 23 and 26, Township 5 South, Range 3 East, which has Snake River water rights delivered through a carriage contract with the Grand View Mutual Canal Company. The water used by Mr. Field and delivered by the Grand View Mutual Canal Company is Snake River water which Idaho Power Company delivers through the C. J. Strike Dam. The Idaho Power Canal is the canal that delivers water into the Grand View Mutual Canal. When the C. J. Strike Dam was constructed by the Idaho Power Company, certain diversions from the Snake River and tributaries of the Snake River had to be moved because of inundation from C. J. Strike Reservoir. Consequently, IPCo entered into contracts over a period of years with individuals to deliver their Snake River water rights through the C. J. Strike Dam.

2-101792 Field
2-101792 Carothers

This 1959 priority claim for 2 cfs (100 inches) is one of three SRBA claims for Mr. Field's Snake River water rights which are delivered through a carriage contract with the Grand View Mutual Canal Company. The three claims are for a total of 455 inches for the irrigation of 435 acres: amended claim 02-00053¹, this 1959 claim, and claim 02-7357. The three claims reflect the status of Mr. Field's land ownership in December 1988 when he originally filed 3 SRBA claims for irrigation of the 435 acres. Claim 02-10009 originally filed in December 1988 is to be withdrawn.

The origin of the 455 inches delivered to Mr. Field was examined by IWR in the early 1980's, and Mr. Field does not dispute those investigations. They are discussed here for background purposes.

In the early 1980's, IDWR made an extensive review of flow records at the C.J. Strike Power Plant, contracts between Idaho Power Company (IPCo) and Snake River water users whose rights are delivered through the C. J. Strike Dam, and information from Kay Garsja who, for many years, was the secretary for the Grand View Mutual Canal Company and the Grand View Irrigation District. Based on those IDWR investigations, Howard Field's 455 inches delivered through the Grand View Mutual Canal Company are based upon 455 inches for Shoofly Grazing, dating from a 1952 Agreement. IDWR also examined eight different contracts from 1952 through 1966 regarding Idaho Power Canal water deliveries. At the time of these IDWR investigations, the calculations of the individual rights delivered through the Grand View Mutual Canal, in addition to the water rights that the Grand View Mutual Canal Company holds, were less than the consistent flows from C. J. Strike Dam through IPCo's canal to the Grand View Mutual Canal during the years 1963 to 1981.

¹ Amended Claim 02-00053 now has remarks stating its combined use with the 1959 claim; it also shows the addition of 17 acres to more accurately reflect historical irrigated acreage. Both the 1959 claim and amended claim 02-00053 limit irrigation to 340 acres, 95 of which are an accomplished transfer, and the remaining 245 acres have a common 340 acre permissible place of use (PPU). The 340 acre PPU is also the place of use for claim 02-7357.

2-10278

The purpose of this summary is to establish that 100 inches of the 455 inches has a priority date of April 15, 1959. 250 inches of the 455 inches are already claimed and have a preliminary recommendation from IDWR based SRBA claim A02-00053 which has a priority of May 2, 1967. The third claim is based on a 1981 license, SRBA claim 02-7357.

The use of 100 inches (2 cfs) from the Snake River delivered through the system of the Grand View Mutual Canal for irrigation on land now owned by Howard Field, dates from Desert Land Entries (DLE) by Verlin Roberts and Ellen M. Roberts, husband and wife.

There were additional Snake River rights (of the Grand View Mutual Canal Company) and ground water rights (of the Roberts) and additional lands involved with the Roberts DLE entries. This summary focuses on 100 inches of Snake River water (not owned by, but delivered by the Grand View Mutual Canal Company) used on the land now owned by Mr. Field.

Copies of the National Archive documents for the DLE entries are attached and confirm that land now owned by Howard Field (and within the 340 acre permissible place of use on the 1959 and 1967 SRBA claims) began to be irrigated April 15, 1959: 123 acres in the SW quarter of Section 26 and 150 acres in the NW quarter of Section 26.

Copies of 1964, 1969, and 1977 aerial photos are attached to show continued irrigation of lands in the SW quarter and NW quarter of Section 26 (first associated with the Roberts DLE entries) as well as continued irrigation of the 340 acre permissible place of use listed on this claim and amended claim 02-00053. Based on the rainfall in this part of Owyhee County, tilled land is presumed to be irrigated land.

The combination of these 100 inches of Snake River water (1959 priority) and the 250 inches of Snake River water from 02-00053 (1967 priority) together provided 350 inches of Snake River water, delivered through the Grand View Mutual Canal Company system, for irrigation of 340 acres, now listed as the permissible place of use for both claims. 95 of the original 340 acres are now claimed on adjacent lands through an accomplished transfer in 1982; the remaining 245 acres are used within the 340 acre permissible place of use. License 02-7357, issued in 1981, is for the 340 acres historically irrigated with only the 1959 and 1967 priority claims, and thus overlaps with these earlier priority claims.

IDWR aerial photograph confirms the irrigation of all 435 acres prior to the commencement of the SRBA in November 1987.
