Subject: Unsurveyed Lands

At various places along the Snake River (and other rivers) the most recent federal land survey (as represented by the BLM's Geographic Coordinate Database, GCDB) stops at river meander lines. Since the time of the survey, the river has changed course in several places, which created land that is not represented in the survey data. This land is known as omitted lands.

This recommendation for this claim consists of 12.5 acres. Of those acres, 1.5 acres are on omitted lands. In order to create a meaningful description of the place of use, I copied $\frac{1}{4}$ $\frac{1}{4}$ section lines and overlaid them on the omitted lands, carefully lining them up with the existing GCDB $\frac{1}{4}$ $\frac{1}{4}$ section lines. In so doing, there was a theoretical $\frac{1}{4}$ $\frac{1}{4}$ section line that was divided by an existing lot. In this case I used ArcView to calculate the acres for the smallest division.

For example, I recommended 6.5 acres in T07N, R05W, S8 **NENE** Lot 1. Additionally, there were 1.5 acres recommended as unsurveyed land in T07N, R05W, S8 **NENE**. Dividing the acres in the recommendation in this way allows both the acres for each lot and the acres for each theoretical $\frac{1}{4}$ $\frac{1}{4}$ to be calculated by simple addition. According to the example, there are a total of 8 acres in T07N, R05W, S8 **NENE**. This method also keeps the government lot as part of the recommendation, which provides a more accurate legal description.
