Re: Amended Notices of Claim - Basin 71.

Department of Water Resources
Southern Region

Dear Allen:

I am filing amended claims for the United States of America on behalf of the U.S. Department of Agriculture Forest Service ("Forest Service") in Basin 71 of the Snake River Basin Adjudication for the upcoming Director's Report for Irrigation and Other Water Rights. These amendments are based upon Forest Service information and information from IDWR field investigations. A brief description of these claims follows:

1. Two unnumbered claims at Merritt Spring. This is in lieu of 71-02107. I do not anticipate pursuing this irrigation claim. However, the Forest Service maintains a pasture for horses and mules at Tuckaway Ranch that requires stockwater claims. One claim is for the Merritt Spring and the natural pond at this source. The second claim is for the ditch leading from this source out into the pasture. Kelly Christensen suggested that these will receive State identification numbers when they are received by your office. Please notify Steve Spencer when numbers are assigned to these claims. I understand that irrigation of part of the horse pasture as 71-07002 will be recommended.
2. 71-10277 and 71-10278 are for irrigation of 15 acres of land acquired by the National Forest System in 1974 and used by the Forest Service as pasture for government owned horses and mules.
3. 71-10726 is for irrigation of 20 acres of land acquired by the National Forest System in 1974.
4. 71-10728 is for irrigation of 11 acres of National Forest System land.
5. 71-10729 is for commercial use at Redfish Lodge, all situated on National Forest System land.
6. 71-10770 is for irrigation by the concessionaire of approximately 5 acres of National Forest System Land as the grounds and landscaping associated with Redfish Lodge.
7. 71-10871 is for irrigation of 67 acres of National Forest System land.

We will also be filing amended claims for several water rights associated with the Busterback Ranch and Valley Creek.

If you have any questions about these claims, or any other claims to water use by the Forest Service that are or should be involved in the Director's Report for Irrigation and Other Water Rights in Basin 71, please contact Steve Spencer or me.

Very truly yours,

Randall J. Bramer

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.
