Re: Amended Notices of Claim - Basin 71.

Department of Water Resources
Southern Region

Dear Allen:

I am filing amended claims for the United States of America on behalf of the U.S. Department of Agriculture Forest Service ("Forest Service") in Basin 71 of the Snake River Basin Adjudication for the upcoming Director's Report for Irrigation and Other Water Rights. These amendments are based upon Forest Service information and information from IDWR field investigations. A brief description of these claims follows:

1. Two unnumbered claims at Merritt Spring. This is in lieu of 71-02107. I do not anticipate pursuing this irrigation claim. However, the Forest Service maintains a pasture for horses and mules at Tuckaway Ranch that requires stockwater claims. One claim is for the Merritt Spring and the natural pond at this source. The second claim is for the ditch leading from this source out into the pasture. Kelly Christensen suggested that these will receive State identification numbers when they are received by your office. Please notify Steve Spencer when numbers are assigned to these claims. I understand that irrigation of part of the horse pasture as 71-07002 will be recommended.
2. 71-10277 and 71-10278 are for irrigation of 15 acres of land acquired by the National Forest System in 1974 and used by the Forest Service as pasture for government owned horses and mules.
3. 71-10726 is for irrigation of 20 acres of land acquired by the National Forest System in 1974.
4. 71-10728 is for irrigation of 11 acres of National Forest System land.
5. 71-10729 is for commercial use at Redfish Lodge, all situated on National Forest System land.
6. 71-10770 is for irrigation by the concessionaire of approximately 5 acres of National Forest System Land as the grounds and landscaping associated with Redfish Lodge.
7. 71-10871 is for irrigation of 67 acres of National Forest System land.

We will also be filing amended claims for several water rights associated with the Busterback Ranch and Valley Creek.

If you have any questions about these claims, or any other claims to water use by the Forest Service that are or should be involved in the Director's Report for Irrigation and Other Water Rights in Basin 71, please contact Steve Spencer or me.

Very truly yours,

Randall J. Bramer

NOTES: Physically it would have been extremely difficult to have irrigated the private ground under A71-02101 and NOT have irrigated this ground. Field exam for licensing and even the sketch of the P/U for the permit indicate that the P/U for the F.S. is within the irrigated boundary of the irr system. Proof of Completion of Work submitted by Wallace Young on May 13, 1966 states that irr began in 1963. (Attached). Therefore I accept the claimed priority date as valid.

DEPOSITION OF WITNESS

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Wallace Young, Hailey, Idaho, Rancher, Business, Box 583

Ques. 2. Are you acquainted with Everatt A. Campbell, the holder of Permit No. 31936, authorizing the diversion of 8 cu. second feet of the waters of Salmon River, at Mouth of Hot Creek for Irrigation purposes? How long have you known him, and where does he reside?

Ans. Twenty years, he resides at Bellerue, Idaho

Ques. 3. Have you read or heard read said Permit No. 31936, and are you familiar with its terms and conditions?

Ans. Yes.

Ques. 4. (If for irrigation purposes). Are you acquainted with the land proposed to be irrigated under said permit? If so, describe same, state its character, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Irrigation of 400 acres, E1/4, SE1/4 Section 17 and W1/4, NE1/4 and N1/4, SE1/4 Section 20, all in Township 8 North, Range 14, E. B. M. Custer County. Good pasture land. Would require 8 cu. feet per second for profitable cultivation.

Ques. 5. Are the works of diversion fully completed and of sufficient capacity to convey the entire amount of water set out in the permit from point of diversion to place of use?

Ans. Yes, 1963-64-65 water has been turned into diversion works and full 8 cu. feet per second used.

Ques. 6. Describe the works of diversion as they now exist, and give your estimate of their capacity.

Ans. Diversion is fully completed according to terms of permit.

Made of a four foot submerged orifice. Made of treated wood.

Estimate of capacity, 20 second feet of water.

**ANALYSIS OF RIVER RANCH P/U
BLECHMANN RIGHT 71-02101 AND USDA-F**

KKC

The place of use for this right was originally licensed for virtually all of the property owned by the Blechmanns on both sides of the Salmon River.

I found one point of diversion and one ditch system from the Salmon river. The delivery system was not functional at the exam date. The claimants indicated that they expect to file a transfer to change the point of diversion to a point downstream from the current diversion location. Although there is some indication that there has been several years since the system has delivered water to the P/U the exact date of last use has not been established, and therefore I am recommending this right as valid at this time. Water was also going into the delivery system in the SENE of sec 20 from 71-02077A and 71-02077B but has not been claimed.

PLACE OF USE

I found one continuous parcel being irrigated going north from sec 20 NESE to sec 17 SWNE and laying between the ditch that forms the eastern boundary and the Salmon River and meander banks on the west. The quality of irrigation varies through out the parcel with some ground being well irrigated to other parts that have braided channels running through that area with only sub irrigation (if any) occurring on much of that spot.

The irrigated ground is alternately owned by the Blechmanns and the USDA-F (see map for ownership). I am recommending that portion of the irrigated ground owned by the Blechmanns under this right and the balance irrigated to the USDA-F if they file a claim. I notified the USDA-F about this system and its operation on June 5, 1998. All available information points toward the current system being the only system ever in existence. The priority date for the USDA-F would therefore be some date after the priority date established for 71-02101.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.
