Re: Browning Family Trust

Dear Kelly,

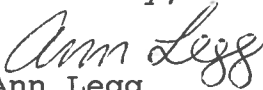

I believe that you have now received back from Mr. Browning his replies to the various water rights claims involving the Browning property near Stanley. It is my understanding that all of those replies were signed off as "acceptable", including the last claim filed for beneficial use (#71-10872).

I also sent him the Notice of Change of Ownership Form for signature and return. The Browning Family Trust is now the owner of the ranch. You should have received that signed form by now. If you have not, let me know and I will follow up with Mr. Browning.

I did notice that the data entry which you sent to me identified the place of use as within section 14. The place of use is within section 13 as the claim noted; however, the preliminary recommendation (which Mr. Browning approved) correctly reflected the place of use as within section 13 so I assume that no further correction is needed. Also, the correct zip code for the Browning address is 90703 as noted on the last claim filed and on the change of ownership form. 90701 is not the correct zip code and probably arose through an error in my office.

Thank you very much for your time and efforts in this matter. I do not believe there is anything further that you need from Mr. Browning or me, but if this is incorrect, please let me know and I will attend to it.

Sincerely,

Ann Legg

RE: SNAKE RIVER BASIN ADJUDICATION CLAIM: A71-10872

Dear Ann

Enclosed is the adjudication claim as data entered and the receipt for the use on HES-577 for Mr Browning. Please review the claim to confirm that the data entries are correct.

When you submitted this claim I noticed that it was for the Family Trust, whereas other claims for the adjacent property were not. Although this does not present a problem as far as the adjudication recommendations are concerned, you may wish to review the ownership issues. Also I noted that the other claims show a zip code of 90701 whereas this claim shows a zip of 90703 all which appear to be for the same California address.

I look forward to visiting with you August 6, 1998 in Stanley.

Sincerely

Kelly K Christensen

Re: Browning Water Rights

Dear Kelly,

Please find enclosed for filing the beneficial use claim for the portion of the Browning property in HES 577 which is being irrigated from Valley Creek. As I mentioned when we last spoke, we are filing the claim for 30 acres of use as opposed to the 20 acres which you had recommended as being so irrigated. We were concerned that the irrigated section was more than 20 acres and did not want to understate the use.

I am not certain whether Mr. Browning will still be in the area by August 6. Even if he is not, I would appreciate the opportunity to view the area with you if you have the time. I did communicate with him our discussion to the effect that his property line in this area is not exactly that of the HES boundary.

Enclosed as well is a check in the amount of \$50.00 to cover the filing fee.

Thanks very much for your time and assistance.

Best regards,

Ann Legg

In regard to your letter to
Tony Ypsomella dated December
, 1994 and Re: Snake River Adj
ains A71-00051, and A71-00052.

Your question was when was
a change in the point of diversion -
happened in the early 1940's when
thru Huntington and my great
uncle Ray Chivers had a serious
disagreement where by Kathryn
opt taking water out of Uncle
Ray's ditch to irrigate the land
on the west side of the road which
longed to the Huntington family
it was known as the Triple H Ranch -
Uncle Ray got mad and told

Kathryn to take the ditch and
he would build a new one.
At that time Uncle Ray owned
the "Paul Place" just South of
the cattle scales ~~at that time~~
so this ditch serves both ranches.

I was about 10 years old when
this happened and I was born in
1935.

SOURCE: Valley Creek TRIB: Salmon River
verified using orthophoto 71-68

REVIEWED BY: KKC DATE: 7-15-98

SYSTEM DESCRIPTION: DESCRIBED BELOW (), SEE LICENSE FILE (), OR SEE ATTACHMENT ()

The system is a P/D using a rock wing di structure diverting water into a ditch that carries water to the "eastly" border of HES-577 (paralleling Cowcamp Road) and flows to the "southern" end of the HES. The irrigation flows are generally South to Southwest from the main ditch to the ditches for rig 2 to 71-00052 & 57 and/or 71-00054. Irrigation water is stopped by those ditches and does not flow into the riparian area around Valley Creek.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

SOIL TYPE	OPTIMAL / ROTATION (chart)	ACTUAL / ROTATION (field)	* ACRES PER SOIL TYPE (field)	* RATE PER ACRE (chart)	= TOTAL DIVERSION RATE
RP1	4.33	14	* 15.2	* .16	= .75 CFS
