KELLY K CHRISTENSEN

A43-00417B

You are looking northwest from the point of diversion and GPS measurement site toward the grove of trees that surround the southern spring of the three diverted and recognized springs for the above claim. This measurement point is where the spring channel is intercepted by a ditch that originates at the ponds on the northern springs. There is no physical structure to attach a site tag to, therefore, this location does not have a site tag identification.
