irrigation season of use standards for various climatic areas throughout the state based on a 75% chance of a 24°F frost. The period of the year during which this water right may be used is consistent with the standard irrigation season of use for the area in which the place of use of this water right is located. The director's report does not prohibit pre-season or post-season irrigation; subject to the conditions set forth in general provision 12b of the director's report, water may be used for irrigation outside the standard season of use. IDWR denies that it is estopped from recommending the standard season of use recommended for this water right. IDWR denies that it has waived its authority to recommend the standard season of use recommended for this water right, and affirmatively alleges it has a statutory duty to recommend the season of use for this right.
