Muir v Allison = limited 0.9 cfs combined (for all splits off 67-79)

Delivery System Narrative: current system: 10" buried PVC w/ 2" gate valves, open discharge to dirt ditches running east + west on north property + north to south on west + east property line (2 branches running east + west) gravity flow running north to south. Attaches hoses to gate valve + moves them around to some of the trees + grass pasture.

Previous/Historical System: where 10" buried ditch is currently, used to be a dirt ditch. The rest of the system didn't change

NARRATIVE/REMARKS/COMMENTS

12" at headgate with full pipe (overflow goes back to the Leisey River). 12" buried pipe converts to 10", converts to 8", converts to 6" + at the end of the system 4". Actual flow is determined by number of users on the line. Installed fall 1983 (dirt ditch prior to that)

Pipe Conversions:		Maximum Capacity

		10" = 2.73 cfs

2" Gate Valve w/ 2" discharge = 0.11 cfs maximum flow

Ownership change forms, copy of recommendation report & map was given to Kevin Gray / brother-in-law to give to Brian to complete & return to IDWR.

MEMORANDUM

TO: FILE

RE: GLENN C. MC LAUGHLIN CLAIMS
SPLITS FOR 67-02053 AND 67-00079

Two claims were filed by Mr. McLaughlin regarding his water rights from Weiser River. The claims are exactly the same; however, it appears that he intended to file for portions of both of the rights referenced above. This is based on the fact that he mentioned other rights as 67-00079, although both his claims list a basis of claim as 67-02053 and no other claims were filed.

Therefore, the claims have been processed as each being based on the separate rights mentioned above; review and analysis will determine the correct basis of claim.

The elements of the claim have been data entered exactly as shown on Mr. McLaughlin's claim, except for the basis of claim being modified to 67-00079 and numbered accordingly.
