To: 'Christopher Meyer'
Subject: RE: Carolex water rights (67-88 et al.)

Hey Chris,

Just thought I would follow up. I did check through 67-93 along with 67-88 and see that I forgot to add in the quantity for the stock water use. If your client wishes to file and objection, I don't see an issue with changing the recommendation to add 0.04 cfs for year round use for stock water. The total of the diversion rate for irrigation and stock water for both 67-88 and 67-93 would then be recommended as non-cumulative or for example:

67-93

Irr: 0.15 cfs
Stock: 0.04 cfs
Total: 0.15 cfs

Regarding the change of ownership issue:

First of all, I spoke with Chris and a letter from an attorney saying the name has changed isn't going to be enough to change ownership. Secondly, it appears Carola Holdings and Carolex LP are both still in good standing on the Secretary of State website. Because of this we will need to see conveyance of the property from Carola Holdings to Carolex LP. When we spoke on the phone and I said we didn't need a legal description describing the property, I thought that Carola Holdings change into Carolex LP and no longer existed. Since it does, we will need to see what properties went from Carola Holdings to Carolex LP.

Sorry.

Craig

Subject: Carolex water rights (67-88 et al.)

Craig,

I am following up on the recommendations for Carolex's water rights (summary attached).

IDWR's preliminary recommendations were issued on Nov. 17, 2006.

They all appear to be consistent with our prior discussions.

I am in the process of confirming with the client that these are all consistent with what is happening on the ground.

Has further action occurred since the preliminary recommendations were issued?

If we have no changes, should we still submit the Notice of Error Reply form?
(I see this was due on December 8.)

1/16/2007

Four of the rights included stockwater, for 100 head each.

It is my understanding that these are cumulative, allowing watering of 400 head. Right?

Two of the stockwater rights are quantified at 0.04 cfs and two are unquantified.

Why is that?

I see that the rights are still listed in the name of Carola Holdings (the prior corporate name).

I thought my client had sent in change of ownership information to update this to Carolex LP.

I guess not, huh?

Thanks for all your help in this.

-Chris

STOCKWATER same as IRRIGATION

117.6 ACRES TOTAL

The rights listed below are limited to the irrigation of a combined total of 117.6 acres in a single irrigation season. Combined Right Nos.: 67-88, 67-90B, and 67-4175

This right is limited to the irrigation of 20.8 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Stockwater use is for 100 range cattle.

Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.

Subject: POD measurement information

Hey Chris,

Thanks for the message. Based on the information provided stating that the last time the land below the river was irrigated was 1968, I will have to remove that acreage from the recommendations.

As far as the diversion rate. In order to remove the need for the remark we spoke about, I need evidence that 3.43 cfs can be diverted through the POD in section 14. What I am thinking, is if your client cannot provide information on the flow, I think it best that we come out there when we can and when high water is flowing and get a measurement from the weir.

The more we talk, the more it is appearing that we have two separate irrigation systems out there. One from the POD in Section 12, and one from the POD in section 14. If there are two separate systems, then I am going to have to recommend the rights in two groups (instead of one big one).

The ground irrigated from Section 14 is 117.6 acres and includes the following rights:

67-88
67-90B
67-4175; priority of 5-10-1918 (one day after the decree)
67-4176 (disallow as recommended under 67-4175)

The total diversion rate planned to be recommended under these rights is 2.35 cfs or 1 inch per acre. This is the POD that we still need to confirm can divert 3.43 cfs or more to avoid adding a limiting remark to the rights diverted from this point of diversion.

The ground irrigated from Section 12 is 42.3 acres and includes the following rights:

67-87
67-93
67-4174; priority of 5-10-1918 (one day after the decree)

The total diversion rate planned to be recommended under these rights is 0.85 cfs or 1 inch per acre.

In summary, I am still planning on recommending all the acreage we spoke about at the very beginning except for the acreage on the south side of the river. And I still feel I can recommend a total of 1 inch per acre on all the ground irrigated. And if we confirm a greater diversion rate from the POD in section 14, then we won't have an limiting remark. I am just describing two irrigation systems as that is what appears to exist in the field.

Drop me a line if you have questions. I will be leaving the office today at 1:30 however, but will be back in on Monday.

Have a good weekend.

Craig

Conversational Memorandum

Date: March 27, 2006

To: Yanits and Carolex LP files

From: Craig L. Saxton

Subject: Measurement information

I received a call from Alvin Yantis. He had been contacted by Chris Meyer and wanted to know what was going on. I explained to him that the point of diversion where Carolex LP, Hutchison, and Yantis divert water from has a capacity less than the total of their combine water rights. I told him I needed evidence that more than the measured 2.9 cfs of water could be diverted from the point of diversion in order to recommend the water rights out of that POD without a limiting remark.

He said he has measurement records that he will send to me. Then I will contact Chris Meyer with the records.

Conversational Memorandum

Date: 3-23-06

To: Carolex LP files

From: Craig L. Saxton

Re: QNT remark 178

I spoke with Chris Meyer in regards to his question about a comment I had mentioned I would be putting on the Carolex LP water rights.

It appears that one of the POD's claimed By Carolex LP has the capacity to divert 2.9 cfs, but there is over 3 cfs of valid water rights from that POD.

Yesterday, in a conversation with Mr. Meyer about needing evidence of irrigated land south of the river, I mentioned that I would be putting a remark on each of the water rights diverted from the POD limiting them to 2.9 cfs when used in combination. Mr. Meyer asked how they would be regulated. I didn't know the answer so I contacted Jan Shurte and she said that it would be regulated based on historical practice, which is generally rotation. However, if it was not agreed on, then the department would probably provide guidance on establishing an agreement.

Mr. Meyer also asked if his client later wanted to transfer his right, then would they be limited with this remark. I told him I didn't think so because we didn't know if one right was always being used or not. IDWR wouldn't definitively be able to say "...right 67-00000 was used only 50% of the time so we are reducing there flow by ½." I did tell Mr. Meyer that I wasn't so sure about that though.

We left with me conducting business as usual and he is trying to contact his clients to gather additional information.

Re: Carolex LP – Water Right Nos. 67-80D, 67-81AC, 67-87, 67-88, 67-89A,
67-90B, 67-93, 67-4174, 67-4175, 67-4176, 67-4270, and 67-7338

Dear Craig:

This follows up on our December 15, 2005 meeting regarding the above-captioned water rights for which SRBA claims have been filed by my client, Carolex LP, in Adams County. Carolex also owns rights in other basins, which are not addressed in this letter.

I. NAME OF ENTITY

As I mentioned, there has been a change in the corporate entity, from Carola Holdings to Carolex LP. We will forward to you a change of ownership form and documentation.

II. WATER RIGHT NO. 67-80D

Water Right No. 67-80D is claimed out of original Water Right No. 67-80, which corresponds to the original right decreed in the amount of 3,500 inches to Orchards Water Company with an extensive place of use, the closest to the Carolex property being:

T15N, R1W, Sec. 10, S SW
T15N, R1W, Sec. 10, SE SW

This is outside of the Carolex property. As of this date, I do not have evidence that any portion of this right was transferred to Carolex.

III. WATER RIGHT NO. 67-81AC

Carolex holds shares in the Lost Valley Reservoir Company. We understand that Carolex's claim for Water Right No. 67-81AC will be disallowed on the basis that the water rights associated with the Lost Valley Reservoir will not be decreed to the individual shareholders (which hold beneficial title), but instead will be decreed to the Lost Valley Reservoir Company (which holds legal title).

Storage water from this project is used by Carolex for exchange purposes. I have discussed this with David Tuthill, who is reviewing these storage claims. David assured me that the place of use for the Reservoir Company's rights will include the Carolex property. David and I agree that there is no need to document the exchange arrangement under which storage rights are released from the reservoir for the benefit of Carolex's diversion on the Middle Fork Weiser River.

IV. WATER RIGHT NO. 67-89A

Water Right No. 67-89A is claimed out of original Water Right No. 67-89, which corresponds to the original right decreed in the amount of 21 inches to George Shaw with the following place of use:

T15N, R1W, Sec. 10, NW NE
T15N, R1W, Sec. 10, NE NW
T15N, R1W, Sec. 3, E SW

This is outside of the Carolex property. It is my understanding that this is property owned today by Alvin Yantis, not Carolex. As of this date, I do not have evidence that this right was transferred to Carolex.

V. WATER RIGHT NO. 67-90B

When we met, you pointed out that the watermaster lists Water Right No. 67-90B in the name of Mink Land & Livestock. This is in error. This water right is owned by Carolex. I have spoken with the watermaster, Bosco Bosler, about correcting the watermaster's records.

Water Right No. 67-90B is claimed out of original Water Right No. 67-90, which corresponds to the original right decreed in the amount of 44 inches to William B. Shaw with the following place of use:

Craig L. Saxton
March 10, 2006
Page 3

T15N, R1W, Sec. 11, NW NW
T15N, R1W, Sec. 2, SW SW
T15N, R1W, Sec. 10, N SE
T15N, R1W, Sec. 10, S NE
T15N, R1W, Sec. 10, NE NE
T15N, R1W, Sec. 10, SE NW

All of this property (except for the portion in section 2) is on the current Carolex property.

A claim has been filed by Julia I. Marcum for Water Right No. 67-90A, which also derives from the same original right No. 67-90. I am advised that Ms. Marcum is now deceased and that her land is now part of the Carolex property. Consequently, the entire 44 inches should be recommended for Carolex, in accordance with Carolex' SRBA claim.

Please let me know if you need any further documentation.

VI. WATER RIGHT NOS. 67-87, 67-88, 67-90B, 67-93

It is my understanding that you anticipate recommending Carolex's decreed rights as follows:

Water Right Number	Inches	Cfs
67-87	30.0	0.60
67-88	13.0	0.26
67-90B	44.0	0.88
67-93	7.5	0.15
Total	94.5	1.89

If this changes, would you please let me know before the Director's report goes out?

VII. WATER RIGHT NOS. 67-4174, 67-4175, AND 67-4176

I understand that the three statutory claims, Water Right Nos. 67-4174, 67-4175, and 67-4176, are likely to be recommended with priority dates one day after the 1921 decree date and, consequently, will be available only when all decreed rights have been satisfied.

The claims were filed in the following quantities:

Water Right Number	Inches	Cfs
67-4174	50.0	1.0
67-4175	100.0	2.0
67-4176	100.0	2.0
Total	250.0	5.0

It is my understanding that the Department's recommendation will scale this back substantially. The Department will recommend a quantity sufficient to bring the total water rights for the Carolex property up to an inch-per-acre. What that number is will depend, in turn, on what the Department determines is the number of acres in the place of use. I discuss place of use below.

VIII. WATER RIGHT NOS. 67-4270 AND 67-7338

It is my understanding that these two domestic rights, Water Right Nos. 67-4270 and 67-7338, already have their partial decrees, and that no further action is required.

IX. 1979 APPLICATIONS

Carolex's ranch operator, Alvin Yantis, tells me that he distinctly recalls filing additional applications for water rights on behalf of Carolex's predecessor with IDWR in approximately 1979. These are different from the three statutory claims filed in 1977 (Water Right Nos. 67-4174, 67-4175, 67-4176). However, Alvin cannot locate records of this. Would you please check to see if the Department has any records of any water right applications for the Carolex property in addition to those listed in the caption to this letter?

X. PLACE OF USE

When I met with you, you explained that it appears that some lands are being irrigated south of the river. I am advised that Carolex is not currently irrigating land south of the river. However, this land has been irrigated in the past, and the company hopes to begin irrigating it again. Consequently, we believe it is appropriate to include these lands within the company's permissible place of use.

XI. POINTS OF DIVERSION

There is some inconsistency in the record over the location of points of diversion. Each of Carolex' water rights (both decreed and statutory claims) should have the same two points of diversion:

T15N, R1W, Sec. 12, SW SE (shown as a square dot in § 12 of IDWR map)

Craig L. Saxton
March 10, 2006
Page 5

T15N, R1W, Sec. 14, NW NE (shown as round dot in § 14 of IDWR map)

IDWR's map (copy enclosed) shows a third point of diversion, a square dot in the NE NE of section 14. Although this is not an active point of diversion, we have no objection to it being listed as an alternative point of diversion.

The Company's claim for Water Right No. 67-4176 lists a different point of diversion: T15N, R1W, Sec. 12, NW NE. This point of diversion is in error. As noted, each of the water rights have the same points of diversion.

Thank you again, Craig, for your help in evaluating Carolex's rights. Please do not hesitate to contact me if you have additional questions or if there are other issues that we should discuss prior to issuance of the Director's Report.

Sincerely,

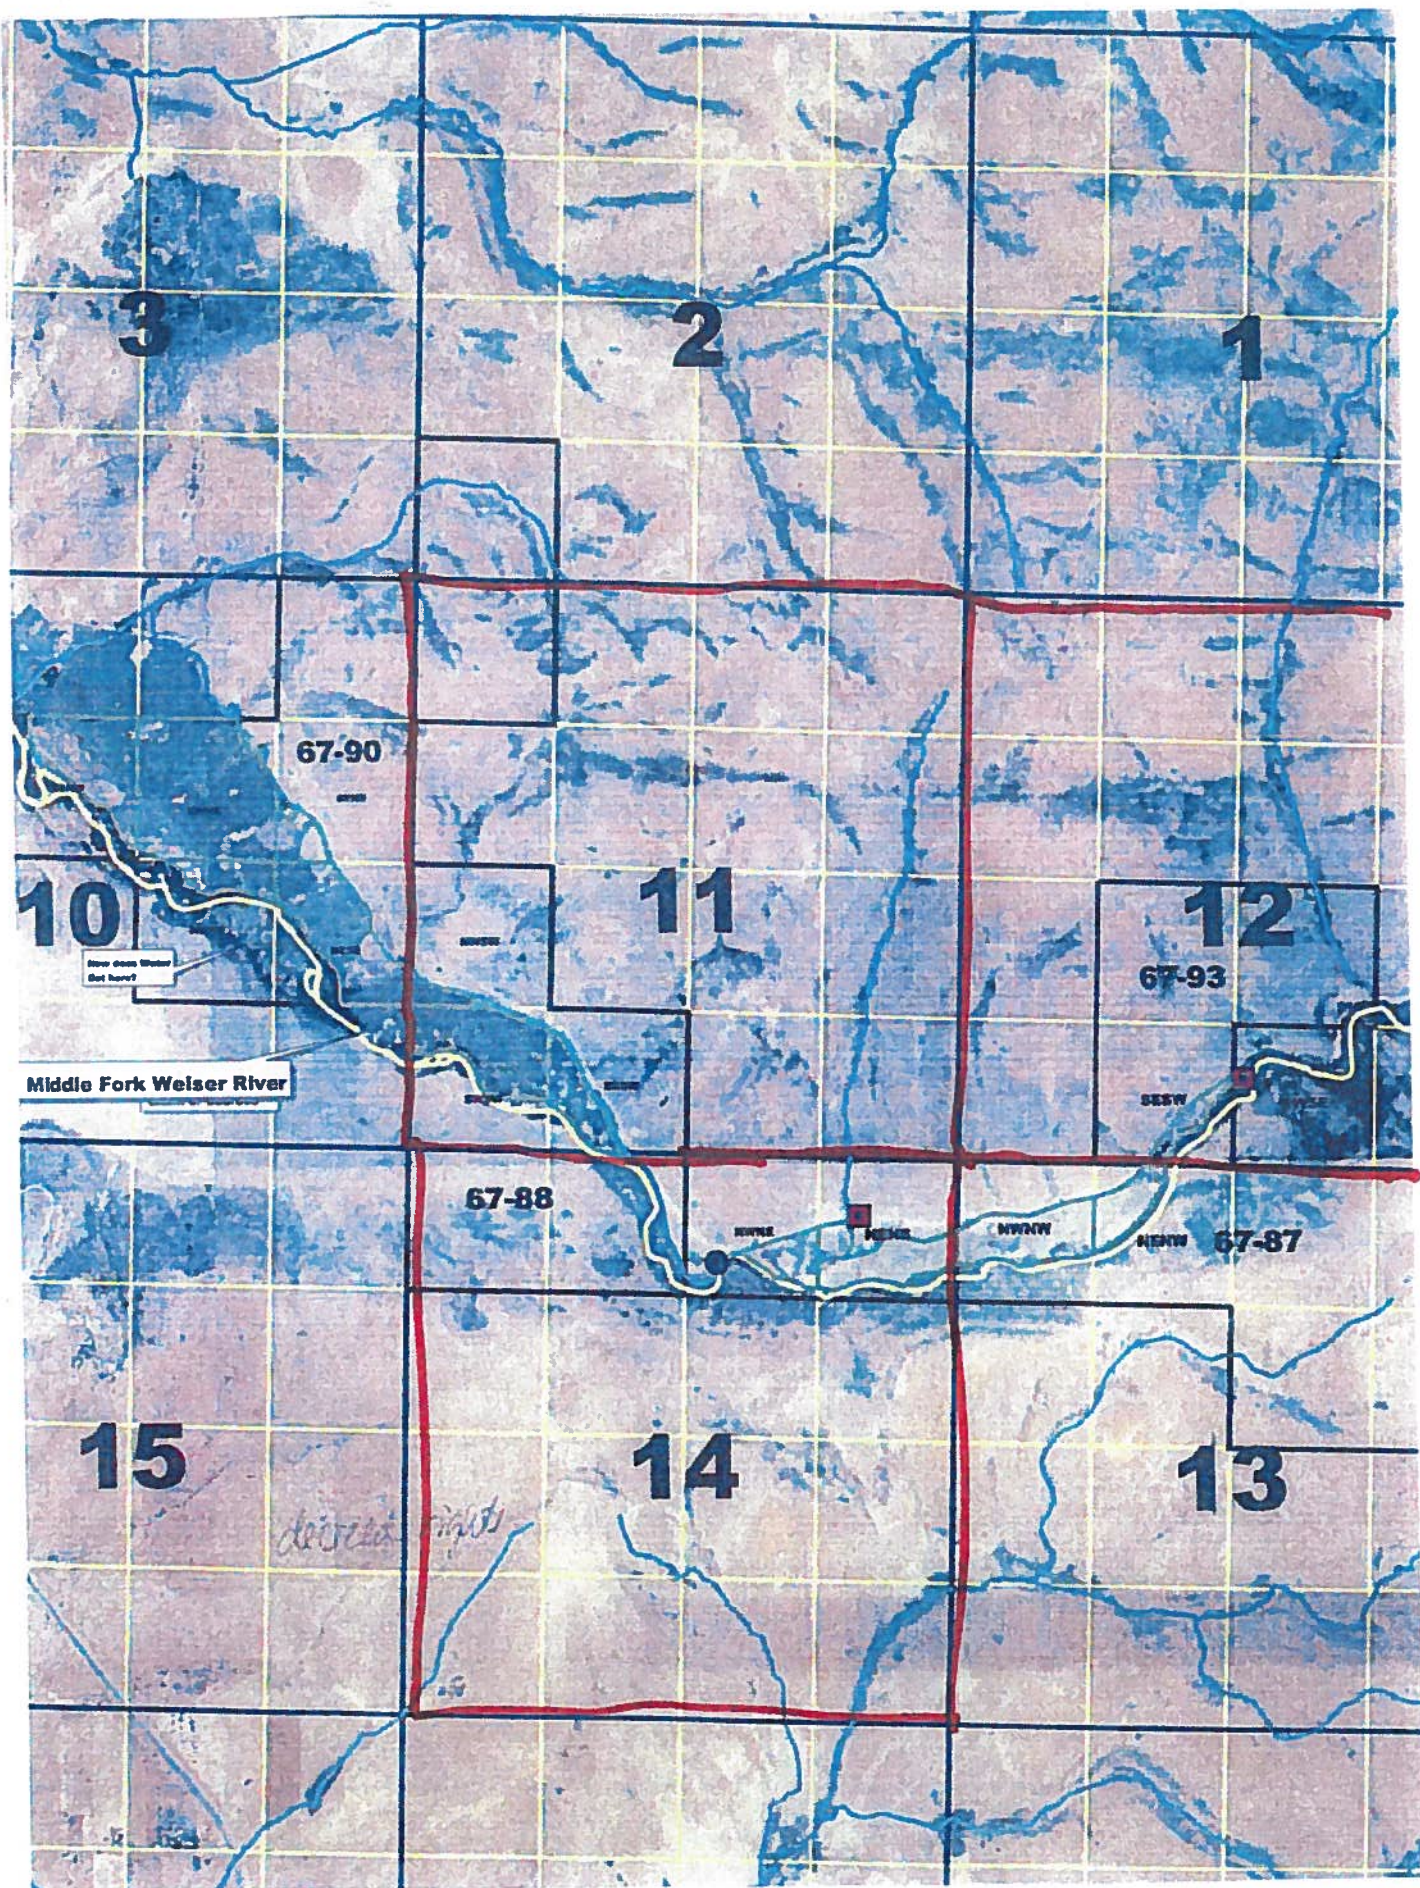

Christopher H. Meyer

CONVERSATIONAL MEMORANDUM

Date: December 19, 2005

To: Files – Carola Holding

From: Craig L. Saxton

Subject: Phone Call – C/O

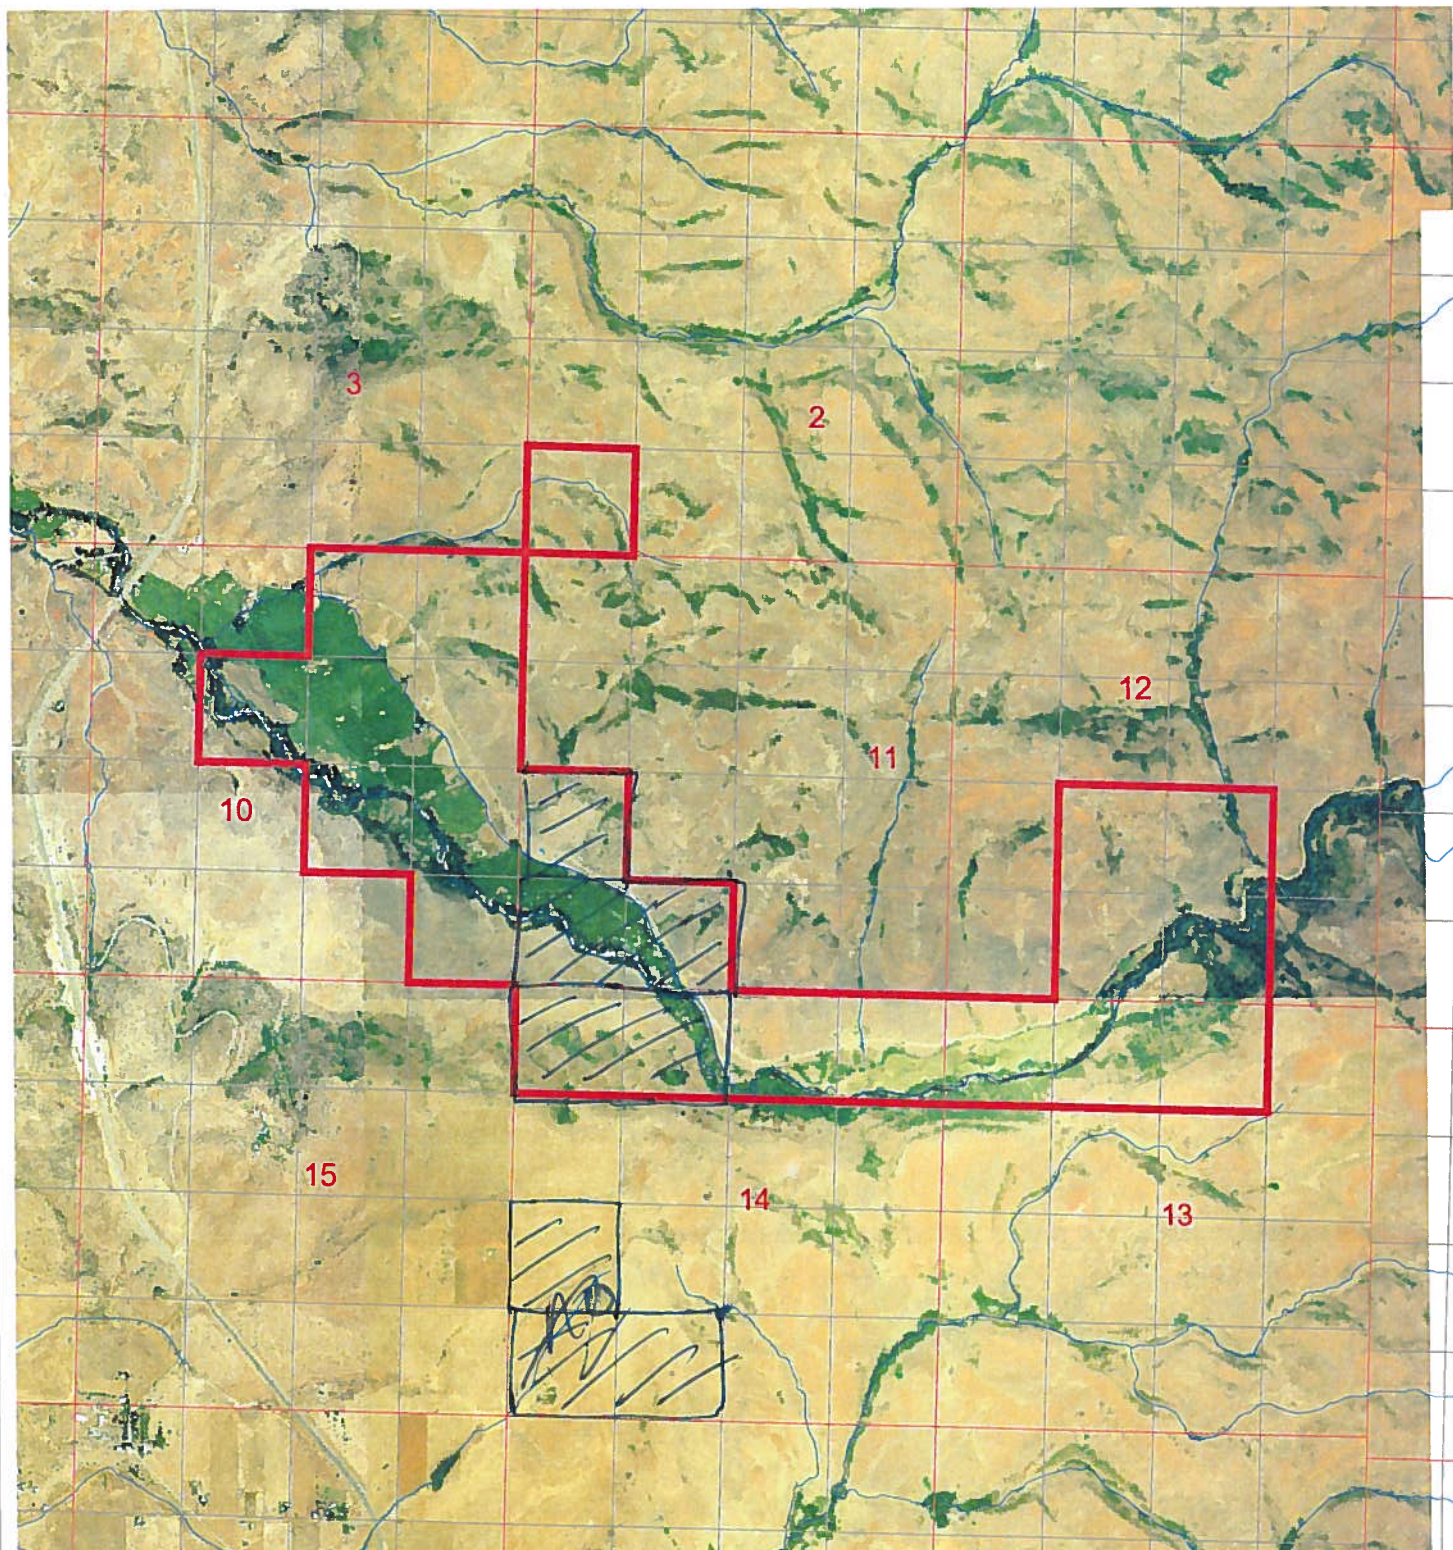

On December 15th I met with Chris Meyer to discuss his clients, Carola Holdings, water right filings. We discussed several issues including that 67-80 was not applicable to any of the property claimed by Carola Holdings and how one of the water rights claimed was owned by Alvin Yanits.

He is going to speak with his claimant but we left off with me telling him that if I didn't hear back from him, I would recommend the decreed acres I could support with statutory water on top of that bringing all water usage to 1 inch per acre without need for additional Evidence of Priority.
