STOCKWATER same as IRRIGATION

117.6 ACRES TOTAL

This right is limited to the irrigation of 70.4 acres within the place of use described above in a single irrigation season.

The rights listed below are limited to the irrigation of a combined total of 117.6 acres in a single irrigation season. Combined Right Nos.: 67-88, 67-90B, and 67-4175

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Stockwater use is for 100 range cattle.

Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.

Subject: RE: Yantis Diversion Rate Records

Chris,

I will use the information that Alvin Yantis provided to support that the point of diversion can divert enough water to satisfy all water rights that it serves at the same time. At this time, I do not see a need to put a remark limiting the diversion rate, on all the water rights served from this POD, to 2.9 cfs.

Craig

Hey Chris,

Here is what I have. Just to verify, I will look into this and at this point, no further action needs to be taken regarding this issue.

Thanks,

Craig

Subject: POD measurement information

Hey Chris,

Thanks for the message. Based on the information provided stating that the last time the land below the river was irrigated was 1968, I will have to remove that acreage from the recommendations.

As far as the diversion rate. In order to remove the need for the remark we spoke about, I need evidence that 3.43 cfs can be diverted through the POD in section 14. What I am thinking, is if your client cannot provide information on the flow, I think it best that we come out there when we can and when high water is flowing and get a measurement from the weir.

The more we talk, the more it is appearing that we have two separate irrigation systems out there. One from the POD in Section 12, and one from the POD in section 14. If there are two separate systems, then I am going to have to recommend the rights in two groups (instead of one big one).

The ground irrigated from Section 14 is 117.6 acres and includes the following rights:

67-88
67-90B
67-4175; priority of 5-10-1918 (one day after the decree)
67-4176 (disallow as recommended under 67-4175)

The total diversion rate planned to be recommended under these rights is 2.35 cfs or 1 inch per acre. This is the POD that we still need to confirm can divert 3.43 cfs or more to avoid adding a limiting remark to the rights diverted from this point of diversion.

The ground irrigated from Section 12 is 42.3 acres and includes the following rights:

67-87
67-93
67-4174; priority of 5-10-1918 (one day after the decree)

The total diversion rate planned to be recommended under these rights is 0.85 cfs or 1 inch per acre.

In summary, I am still planning on recommending all the acreage we spoke about at the very beginning except for the acreage on the south side of the river. And I still feel I can recommend a total of 1 inch per acre on all the ground irrigated. And if we confirm a greater diversion rate from the POD in section 14, then we won't have an limiting remark. I am just describing two irrigation systems as that is what appears to exist in the field.

Drop me a line if you have questions. I will be leaving the office today at 1:30 however, but will be back in on Monday.

Have a good weekend.

Craig
