Subject: RE: Unclaimed Rights

Diana,

We did not find any additional water right numbers for late claims.

I did find that 78-7061 was claimed and split into 78-12120 and 78-12121. The splits were reported and partial decrees issued. It would be best if 78-7061 could come off the list of unclaimed water rights.

And, 77-2017 was a state based licensed water right for irrigation and domestic use in which the USFS filed as a significantly different reserved claim for just domestic use. The claim for the reserved right should probably have been assigned a different number since it did not reflect the license. Since the reserved claim was ultimately withdrawn, I am hoping the court can go ahead and decree 77-2017 as unclaimed.

Carter
