1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

I disagree on the amount of acres irrigated. I feel the 29 acres I irrigate should be in the total amount

2. Describe the changes you wish to make in the proposed recommendation:

3. Give a brief explanation as to why you disagree with these portions:

This property has been irrigated by these generation in our family & has been farmed since the late 1800's. This ground slopes to the north and the water goes toward the creek & it would be hard to irrigate 19 acres by itself.

 I AGREE with this proposed recommendation; no changes need to be made.

~~REGULAR ADDRESS~~

Governor PHILIP E. BATT

R. KEITH HIGGINSON

Director

February 10, 1995

Dear Wateruser:

In response to the Bench Ditch Irrigation Company's letter to IDWR dated January 25, 1995, this letter is being sent to all waterusers of record in the Basin 41 Water District.

As you may know, the arbitration for delivery of water that has operated in the Rockland valley for over 100 years has been very effective in allowing the delivery of water rights by the local watermaster. The box method described in the arbitration has worked to divide the waters fairly, but recent studies of the boxes have determined the actual flow rates that have been delivered for years are different than the rates listed in the arbitration. This is largely due to the fact that the box method, as applied in the valley, is not a standard measuring device.

It is IDWR's position that:

Rights recommended in the ongoing Snake River Basin Adjudication, will be based on the historical beneficial use and historical diversion rate represented by use of the box method.

Conversion to an approved, standard measuring device is encouraged but should not result in a increase in the amount of water diverted. IDWR requests, before any old diversion structure is removed or destroyed, to view and measure the historical diversion rate as delivered by the box described in the arbitration.

Any change in measuring devices or structures that results in an increase of diversion rates above the historical beneficial use will result in injury to junior right holders within the Rock Creek system.

We look forward to working with all waterusers in the district. SRBA examinations will resume in the spring of 1995 and IDWR will measure and evaluate all of the structures diverting from Rock Creek and the East Fork of Rock Creek. If you have questions please contact me at my office in Twin Falls.

Sincerely,

STEVE CLELLAND
Water Resource Agent
