D. REMARKS

The watermaster has traditionally delivered 75" to landowners within the original place of use. Since at least 1934 20" of this right has been delivered to the bench ditch as evidenced by the attached memorandum of agreement.

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willfull misrepresentations made in this application may result in voiding its approval.

Information for Water Users of Rock Creek Water
District No. 29

After studying the application, checking the map of the area, and considering the water users, I have decided this matter to be a private matter and not a public one. The amount of water delivered to various points on the valley, which are not the same, is to be determined by the water users and not by the district.

If there are any other matters they shall be handled by the water users and not by the district.

An aerial photograph of a coastal area, likely a wetland or marsh. A yellow boundary line outlines a specific region in the center. The area is divided into four numbered sections: 5 (top-left of the yellow boundary), 6 (bottom-left of the yellow boundary), 7 (bottom-left of the entire image), and 8 (bottom-right of the entire image). The terrain is a mix of red, brown, and green, indicating different types of vegetation or water levels. A small red dot is visible near the top of the yellow boundary.

R. KEITH HIGGINSON

Director

February 10, 1995

Dear Wateruser:

In response to the Bench Ditch Irrigation Company's letter to IDWR dated January 25, 1995, this letter is being sent to all waterusers of record in the Basin 41 Water District.

As you may know, the arbitration for delivery of water that has operated in the Rockland valley for over 100 years has been very effective in allowing the delivery of water rights by the local watermaster. The box method described in the arbitration has worked to divide the waters fairly, but recent studies of the boxes have determined the actual flow rates that have been delivered for years are different than the rates listed in the arbitration. This is largely due to the fact that the box method, as applied in the valley, is not a standard measuring device.

It is IDWR's position that:

Rights recommended in the ongoing Snake River Basin Adjudication, will be based on the historical beneficial use and historical diversion rate represented by use of the box method.

Conversion to an approved, standard measuring device is encouraged but should not result in a increase in the amount of water diverted. IDWR requests, before any old diversion structure is removed or destroyed, to view and measure the historical diversion rate as delivered by the box described in the arbitration.

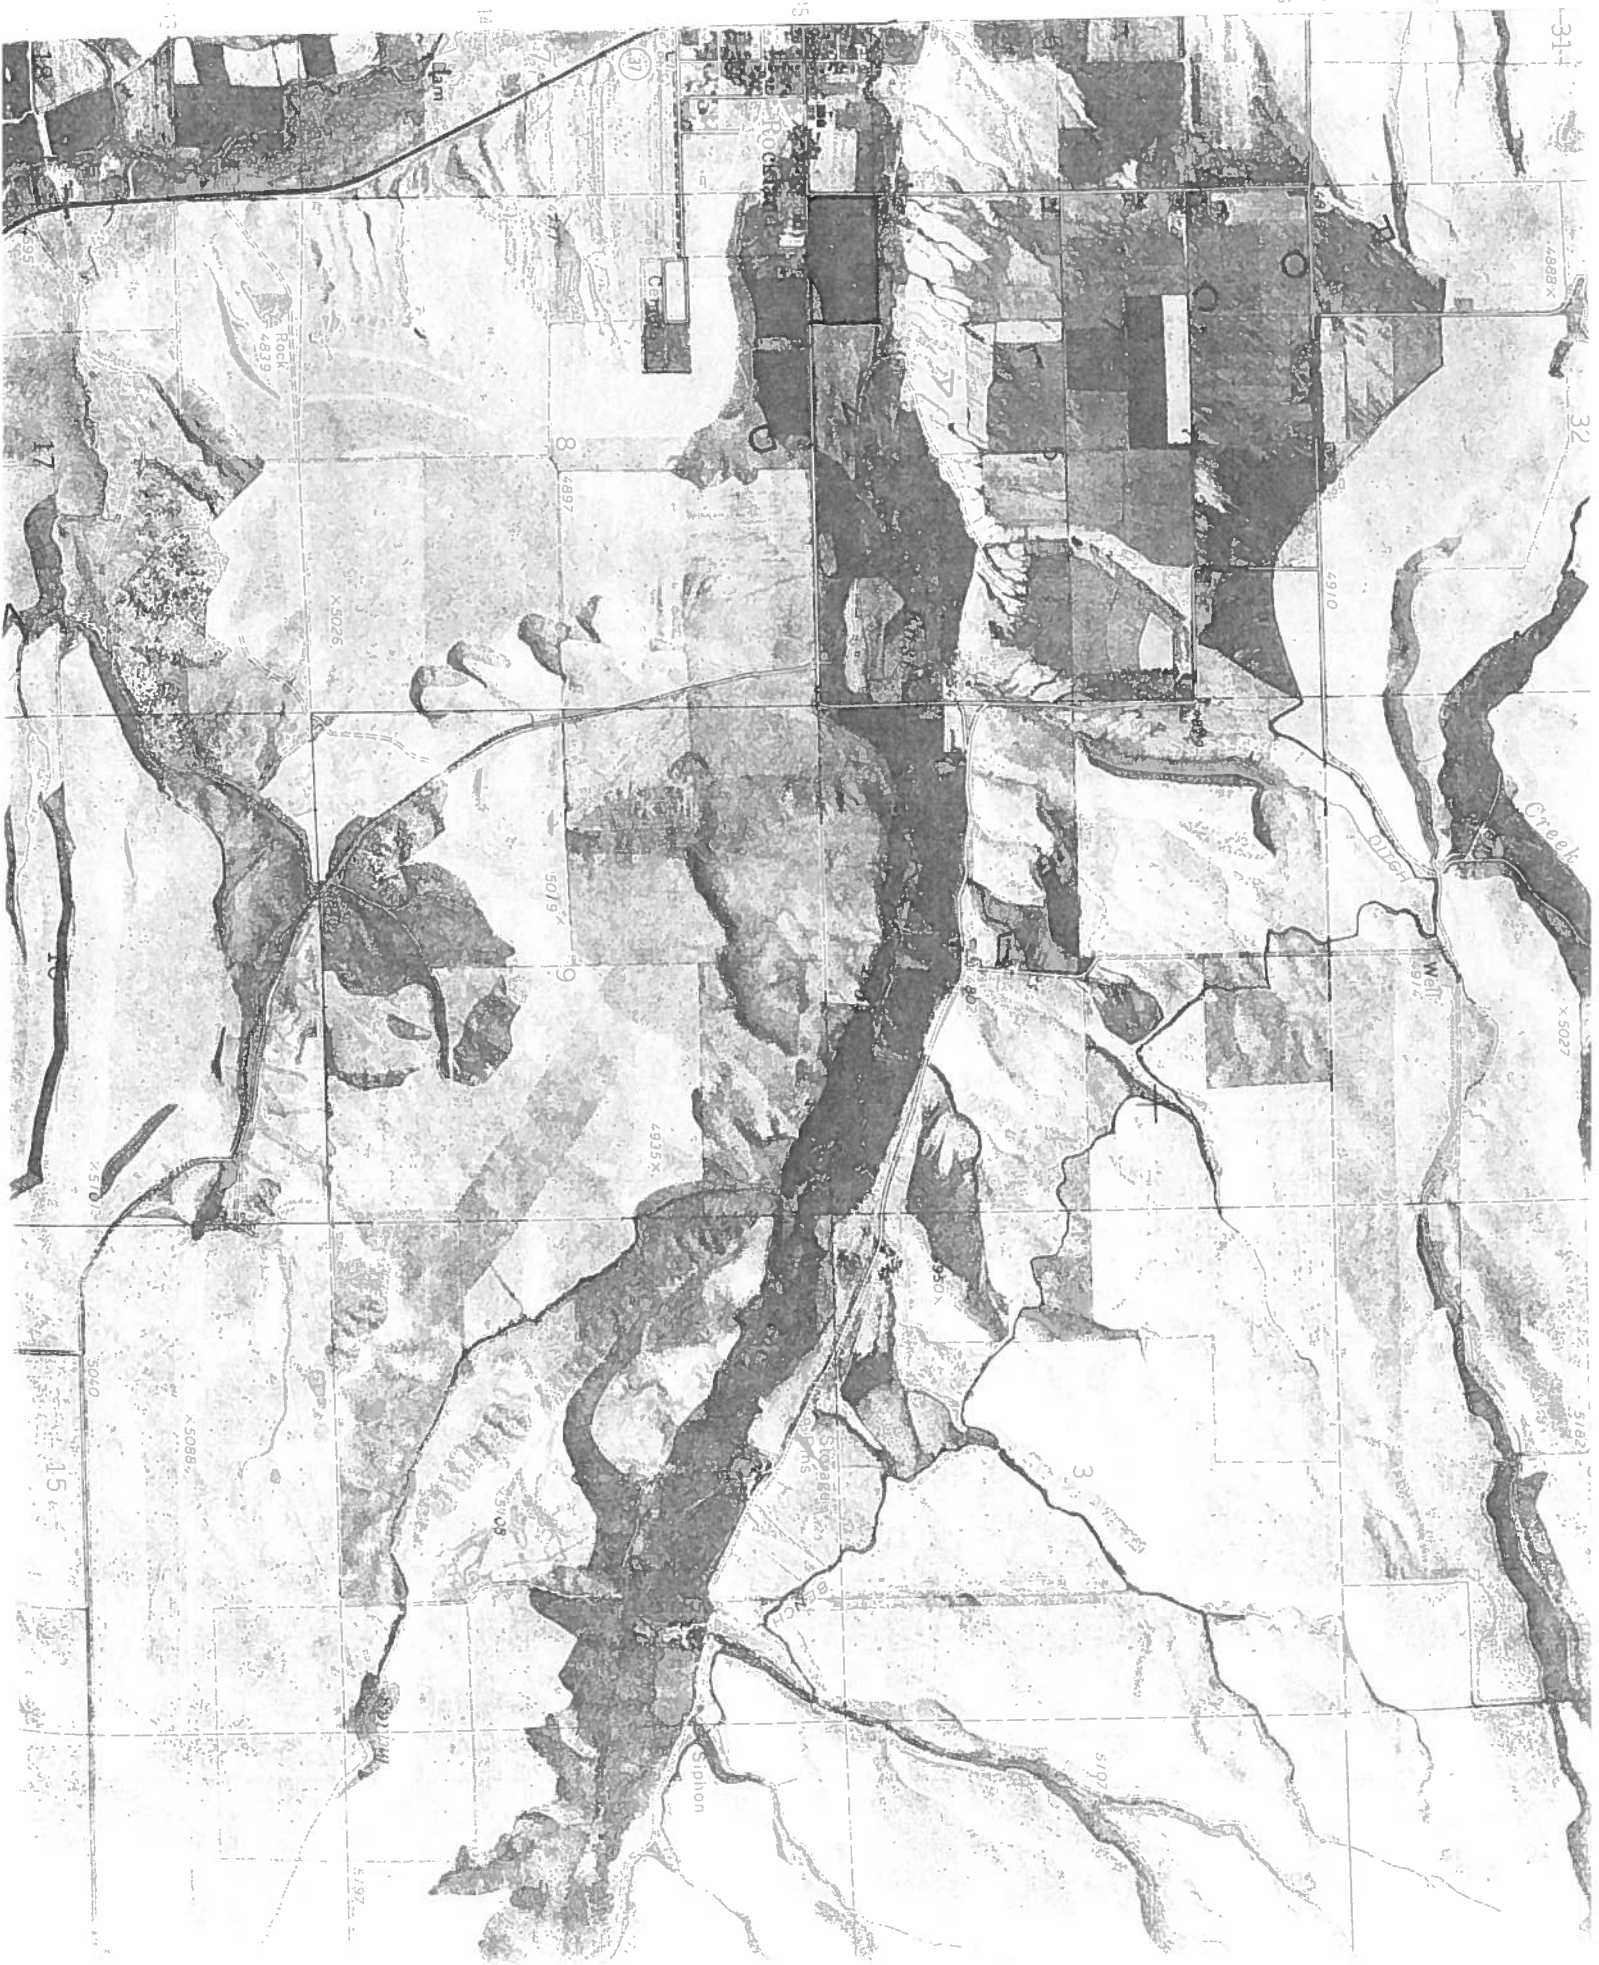

Any change in measuring devices or structures that results in an increase of diversion rates above the historical beneficial use will result in injury to junior right holders within the Rock Creek system.

We look forward to working with all waterusers in the district. SRBA examinations will resume in the spring of 1995 and IDWR will measure and evaluate all of the structures diverting from Rock Creek and the East Fork of Rock Creek. If you have questions please contact me at my office in Twin Falls.

Sincerely,

STEVE CLELLAND
Water Resource Agent
