RE: Adjudication Claim A72-00012F

Dear Mr. Bloxham;

I have amended your irrigation adjudication claim to correct the legal description of the points of diversion that you are presently using with your portable pump. Transfer #2862 (approved 4/3/1984) to permit you to pump directly from Challis Creek near your property is considered out of date. If you still wish to do this in the future you may file for another transfer.

The Assessor's records show that you have 12 acres of property, but only 6.4 acres are being irrigated so I have reduced the place of use (item #10) accordingly.

Please examine this amended copy of your claim carefully. If you find slight changes, you may make them with your pen and add your initials near the change. If you have large changes to make indicate them on the copy, return the corrected copy to me and I will re-type it. Sign and date the amended claim on page 3 and return it to me promptly in the enclosed stamped and addressed envelope. This will enable me to finish processing your claim.

Please contact this office if you have any questions.

Respectfully,

Robert V. Worstell
Sr. Adjudication Agent

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

Figure 1 shows the results of the three experiments. The top panel shows the mean number of correct responses for each condition. The bottom panel shows the mean number of correct responses for each condition, with error bars representing the standard error of the mean. The results show that the number of correct responses was significantly higher for the 'Correct' condition than for the 'Incorrect' condition in all three experiments.

REMARKS:

Mr. Bloxham filed his adjudication expecting to install a pump in Challis Creek channel at the above point of diversion. He had an approved transfer (No. 2862) to do this, but he has been unable to do the needed investment and is currently irrigating by using a small portable gasoline pump which he moves from place to place in 2 streams that cross his acreage from west to east. The north channel is known locally as "Frog Creek" after it is diverted from **MICROFILMED** The south channel carries a collection of surface runoff water and seepage flow with Challis Creek irrigation uses.
