RE: 72-00020J

Dear Mr. and Mrs. Hurless,

This letter is in response to the Notice of Error (NOE) you recently filed with IDWR regarding the Director's proposed recommendation of the claim listed above. Your NOE questioned whether you still had a water right on the 4 acres you retained, after selling 8 acres to the Stuarts.

72-00020J was a "claim" for 12 acres, but only 8 were found to be irrigated from the Highline Canal. 72-07448, the groundwater right, was originally filed as a permit for 12 acres but was licensed for 8 acres. (72-07448 was not required to be a part of the adjudication because it's priority date is 1989. Rights required to be in the adjudication were those rights established before November 19, 1987.)

The 8 acres appear to be the same 8 acres in both rights. The "conditions" on the license mention that it must be used in conjunction with the surface water right and the license cannot be used if the surface water right is sold or transferred off.

We have changed the ownership of 72-00020J to the Stuarts. It would seem that the ownership of license 72-07448 should also be transferred to the Stuarts.

In answer to your question as to whether you still have a water right for the 4 acres you retained, it appears that you do not. You can, however, file a new application for permit to establish a right for these acres or you may be able to transfer the groundwater right to your 4 acres, if you did not convey it to the Stuarts.

If you have any questions, please call the office.

Sincerely,

Jeanie Robertson

CONDITIONS/REMARKS:

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. The right holder shall use the full allotment of appurtenant surface water rights, to the extent they are available, in conjunction with groundwater diverted pursuant to this right.
5. This right to divert groundwater shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
6. This right when combined with Adjudication Claim A72-00020J and all other rights shall provide no more than .02 cfs per acre nor exceed a combined annual diversion volume of 28.0 af for the lands above.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 2ND day of MAY, 1995.

Re: Notice of Error Reply

Dear Sirs,

In reviewing the enclosed information on the water rights to my property several discrepancies are evident. We have currently three water rights for the described property. Water right #A72-10277 for 0.08 cfs is the domestic water right for our home, water right # 72-07448 for 0.16 cfs is an irrigation right from a ground water source that should be for 8 acres in the described section, and water right A72-00020J for 0.24 cfs is an irrigation right with a point of diversion from the Highline Canal attached to a total of 12 acres as described in the document.

I am concerned that these rights be recorded and acted upon properly as the 8 of the 12 acres described for the water right A72-00020J have recently been sold with the representation of an irrigation water right. I am concerned the water right # A72-07448 is adjudicated properly so the remaining four acres that I have retained will not be without a water right.

In the documentation that I received to respond to potential errors I notice that the water right number in the first line in 72-00020J however in the description of place of use the water right number given is 72-07448. The 8 acres that have recently been sold are properly described in the documentation that you have sent me. Again I am concerned about the four acres that I have retained. Please review your records and notify us if my understanding is correctly represented in your files.

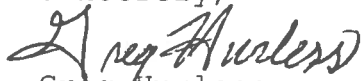

I am uninformed if ground water rights are a part of this litigation. Please advise if they are or not.

I will inform the new owner of the 8 acres of their obligation to transfer the rights for their property to their name.

I am enclosing copies of the documentation that you have sent to me along with copies of the other two rights I believe to be correct.

Please advise if further information is needed and if your department concurs or not. You can reach me at work @ phone (208)838-3521 or at home @ phone (208)879-4250.

Sincerely,

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.
