RE: 72-00032K

Dear Ms. Curtis,

This letter is in response to the Notice of Error (NOE) you recently filed with IDWR regarding the Director's proposed recommendation of the claim listed above. Your NOE questioned the reason for "disallowal" of the right.

Based on the information you provided and our conversation in Challis, I can now change the recommendation and recommend the right. I have enclosed a copy of the new proposed recommendation.

If you still do not agree with any portion of the proposed recommendation to the court, you may file an objection with the court after you receive the final recommendation of your water right. The objection process will be explained when you receive your final recommendation of your water right.

Sincerely,

Jeanie Robertson

1993	17.48

Copies of Watermaster's Reports prior to 1993 (as well as those listed above) should be available from the IDWR in Boise as they get the originals. If I can provide anything further, please let me know.

DIRECTIONS TO PROPERTY / REMARKS:

I met with Linda Curtis (claimant) and the Sullivans in the evening on Sept 14. Mr. Sullivan assists Ms Curtis with irrigation of her property. Ms Curtis said the west part of her place (above the canal) has never been irrigated.

Mr Sullivan said that it takes 15 days to cover the east field (below the canal) when making 2 sets per day

I found the irrigated field was only partially irrigated in 1993. The structures (wooden) have not been maintained and most of the field is covered by weeds and soil is very dry. Horses are being pastured in the field

The SW $\frac{1}{4}$ SE $\frac{1}{4}$ has never been irrigated - according to Ms. Cummins.
The SE $\frac{1}{4}$ SE $\frac{1}{4}$ has had very little irrigation in 1993 as
evidenced by a field examination showing the system in
a very poor condition and very little of the field was irrigated.
Fifteen acres recommended due to insufficient evidence of

CONVERSATION MEMORANDUM + MEMO to FILE

NAME OF PARTY Linda Curtis
EMPLOYEE: Robert Worstell

DATE Sept 14, 1993
FILE 72-00032 K

RE: Field Exam. + Claimant Contact.

I met with Linda Curtis at the home of Mr. and Mrs. Joe Sullivan in the evening to review their Adjudication Claims. Joe Sullivan assists Ms. Curtis with irrigating her property which lies less than $\frac{1}{4}$ mile south of and near his place.

Mrs. Curtis said that the west part of her property (West of and above the High Line Canal) has never been irrigated. All the irrigation water is applied below the canal. It is all pasture. Mr. Sullivan said that it takes 15 days to cover the field when making 2 sets per day. The comment was made that the field (un-irrigated) above the canal "Used to grow good hay in the past" - perhaps dry land hay in wet seasons.

When I walked over the "irrigated" field on Sept. 16, I found the following: (The SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec 17)

- 1) Only a small portion of this field was receiving any benefit from 1993 water applications - (about $2\frac{1}{2}$ acres - (15.5%) estimated from field examination and comparison to 1988 BLM Aerial photo.)
- 2) The irrigation system's wood structures have been allowed to deteriorate to the point where they have little value in water control (see photos)
- 3) Most of the field has grown up to weedy growth and the soil was very dry.
- 4) Three horses were being pastured in this field and any green growth was cropped off short.
- 5) A trickle of water was leaking thru the control gate on this day, but the V-notch weir appears to be set too low to accurately measure a full flow.
