Subject: Unauthorized Use!

Tim, I have followed up on the situation we discussed regarding the unauthorized use of water. Frankly, one "situation" lead to another.

First, David L. & Denice A. Udy (P. O. Box 923, Challis, ID 83226-0923) sold Water Right No. 72-00032N to Everett P. Enzenauer 6-11-98. This left Udy without any water right(s). The diversion for 72-00032N was subsequently moved in Diversion Transfer 5193. This left the prior diversion, for all practical purposes, abandoned. Udy never removed the pump and, at this writing, has lines from the old pump house running all over the minimal acreage he retained. The fields are green (and I might say a pretty green!), the area around the pump house is a "mud hole" and his meter shows power usage (while I can see no other electrical device connected thereto other than the pump). As I told you, I told him in as nice a way as I could to stop pumping from the Highline Canal a week or two ago. He jokingly asked if "High Water" was over!?! All he has done is limited use to "dark-thirty"! We need the pump OUT of the Highline Canal or this will be an ongoing problem!

When I was checking on the foregoing, I discovered the neighbor, Eugene & Nancy Schaecher (P. O. Box 603, Challis, ID 83226-0603), also had a pump in the Highline Canal watering his/their acreage. When I approached them about it, he told me he had a "High Water" right. I asked for the number. He advised he did not have a number but, "was sure there was a notation on his purchase documents". I told him unless he had a documented water right he would have to stop any pumping from the canal. I leave it up to you if you want to write to these people as well!?! However, if you don't, I can pretty well guarantee that next spring with a different Watermaster they'll be at it again!

I would appreciate copies of whatever you send, of course. This time you get to be the "Bad Guy"!

Jack

Re: Pending Notice of Violation – Unauthorized Use of Water from Challis Creek and the Highline Canal

Dear Mr. and Mrs. Udy:

Our office has become aware of a pump diversion in the Highline Canal that you may be using to irrigate certain lands that may no longer be associated with a valid water right. The records of the department indicate that you are the former owner of right 72-00032N. Our records further show that the complete ownership of this right was changed to Everett and Mary Enzenauer in 1998. Our records do not indicate that you retained any portion of this right or that you own any other rights that authorize diversion of water from Challis Creek and the Highline Canal. Earlier this month, the watermaster of Water District 72-C; (Challis Creek and tributaries) confirmed the diversion of water from a pump in the Highline Canal and use of water to lands which you own. Both the diversion pump and irrigated lands appear to be separate from the point of diversion and lands described under water right 72-00032N that is now owned by Enzenauer.

Based on the records of the watermaster and IDWR, it appears that there are no rights that authorize your diversion of water. Therefore, I request your immediate cooperation in:

- Identifying what water rights authorize your diversion if our records are not correct.
- Cease diversion of water if you do not have a water right.
- And/or obtain a valid water right for your diversion.

Please respond to our office within 14 days of the date of this letter regarding the status of your diversion.

Idaho Code §42-351 states:

If the director of the department of water resources finds, on the basis of available information, that a person is diverting water or has diverted water from a natural watercourse or from a ground water source without having obtained a valid water right to do so or is applying water or has applied water not in conformance with a valid water right, then the director of the department of water resources shall have the discretion to

issue a written notice of violation to the person in accordance with the provisions of section 42-1701B, Idaho Code, for the illegal diversion or use of water. Notwithstanding the issuance of a notice of violation, the director may also file an action seeking injunctive relief directing the person to cease and desist the activity or activities alleged to be in violation of applicable law or any existing water right.

This letter is notification that the Department may issue a Notice of Violation for application of water without a water right. Pursuant to Idaho Code, the Notice of Violation can establish civil penalties of \$300 annually per acre, in whole or in part, for continued illegal use or diversion of water.

If you have questions concerning this matter you may contact this office or our regional office in Twin Falls. You may also contact me directly at (208) 327-7864.

Sincerely,

Tim Luke

RE: 72-00032N

Dear Mr. and Mrs. Enzenauer,

This letter is in response to the Notice of Error (NOE) you recently filed with IDWR regarding the Director's proposed recommendation of the claim listed above. Your NOE questioned the size of the Place of Use.

Transfer #5193 was filed by the previous owner, David Les Udy. He indicated that only 99 acres were being irrigated and wished to consolidate the water for those 99 acres under a pivot, with 33 acres in each of the following quarter-quarters: SWSW of Section 8, NENW and NWNW of Section 17. This transfer was approved by the Department in April, 1998. The recommendation is based on this approved transfer and no changes can be made at this time.

Sincerely,

Jeanie Robertson

phone call (X) walk-in (.)

He wanted claims in Challis Creek area under the name of UDY, Les and/or David L. Also, he wanted information regarding irrigation/canal company shares; on the claim the owners are under the name of "Round Valley Irrigation Co." I suggested he find out through this entity what other canal/irrigation companies are around in the area. J. Stanton not in the office at the time to direct this call to him. RE: Irr./Canal Co. only.

MEMORANDUM

TO: File 72-00032H

FROM: Pam Skaggs^{PS}/State Office

SUBJECT: Transfer 5193

DATE: April 8, 1998

Transfer 5193 corrects the legal description of the historical point of diversion, changes the point of redirection and changes the place of use under Right 72-00032H. ✓

The water under this right is diverted into the High Line Canal and redirected by pump to irrigate 99 acres. The transfer application corroborates SRBA field exam recommendations identifying a reduction from the 147 originally decreed acres. The diversion rate from Challis Creek has remained the same for conveyance purposes down 1.5 miles of canal, while the diversion from High Line Canal is limited to 1.46 cfs as the confirmed historic use associated with the original irrigation system. The place of use has been modified to accommodate a pivot system in the three identified quarter quarters. ✓

The watermaster of Water District 72C controls redirections from High Line Canal. The region sent out a watermaster comment form, but due to the absence of the watermaster didn't pursue obtaining the completed form. I have been in telephone contact with the newly elected watermaster, Rick Philps, and discussed the transfer proposal. He has verbally approved the change and he will complete the comment sheet and return it to this office.

Season of use and diversion volume were adjusted to current standards. Other recommended conditions include watermaster control, measuring & lockable controlling works from both the point of diversion & redirection, conveyance portion, right-of-way, authorized acres, irrigation overlap, and standard transfer approval conditions. ✓

MEMORANDUM

TO: David Udy Transfer (72-00032H) File

FROM: Corey Skinner/CS

DATE: December 26, 1997

SUBJECT: Staff Review

The enclosed transfer application, filed by David Udy, seeks to modify water right record 72-00032H, created by transfer #3006 (approved 08/15/1985). This particular water right is for the diversion of 1.90 cfs from Challis Creek for the irrigation of 147 acres located in the West $\frac{1}{2}$ of the Southwest $\frac{1}{4}$ of Section 08 and the North $\frac{1}{2}$ of the Northwest $\frac{1}{4}$ of Section 17 (both in T14N, R19E).

As part of the Snake River Basin Adjudication, claim A72-00032N was filed on this right and field review(s) were conducted to obtain information for the recommendation of this right. The preliminary recommendation for this right is recorded as R72-00032N and reflects 99.0 acres of irrigation. This recommended acreage is based on the actual beneficial use of this particular right since the 1985 approved transfer (#3006).

The enclosed transfer application seeks to redistribute the recommended acres to facilitate a sale of a portion of the property. This proposed change will result in a change in the recorded (and recommended) place of use. The transfer also proposes changing the recorded point of diversion from Challis Creek. Apparently, the right has historically been diverted from Challis Creek through the Highline Canal. However, the approved transfer (#3006) listed an incorrect legal description for the Highline Canal diversion, which has been listed correctly on the enclosed transfer application. In addition, the enclosed transfer application seeks to change the rediversion point from the Highline Canal. The right has historically been rediverted from the Highline Canal in the SENWSW Section 08 (T14N, R19E), but the enclosed transfer seeks to change this rediversion point to the SESESW $\frac{1}{4}$ of Section 08 (T14N, R19E). This proposed change will result in changing the rediversion point to a new location, about $\frac{3}{8}$ of a mile further down the High Line Canal.

I see no reason why the enclosed transfer application can not be approved since it is based on SRBA findings. However, it should be noted that the recommended diversion rate for R72-00032N, 1.46 cfs, was based off of measurements taken at the sprinkler heads in the field(s) being irrigated. This recommended rate does not take into account possible conveyance loss of the right through the Highline Canal from Challis Creek. For this reason, there may be justification for the entire 1.90 cfs from Challis Creek, since the water from this right has traveled over 1.3 miles down the canal before reaching its historical rediversion point.

MEMORANDUM

TO: David Udy Transfer (72-00032H) File
FROM: Corey Skinner/BS
DATE: December 26, 1997
SUBJECT: Staff Review

The enclosed transfer application, filed to modify water right record 72-00032H, created (approved 08/15/1985). This particular water diversion of 1.90 cfs from Challis Creek for the irrigation of 147 acres located in the West $\frac{1}{2}$ of the Southwest $\frac{1}{4}$ of Section 08 and the North $\frac{1}{2}$ of the Northwest $\frac{1}{4}$ of Section 17 (both in T14N, R19E).

As part of the Snake River Basin Adjudication, claim A72-00032N was filed on this right and field review(s) were conducted to obtain information for the recommendation of this right. The preliminary recommendation for this right is recorded as R72-00032N and reflects 99.0 acres of irrigation. This recommended acreage is based on the actual beneficial use of this particular right since the 1985 approved transfer (#3006).

The enclosed transfer application seeks to redistribute the recommended acres to facilitate a sale of a portion of the property. This proposed change will result in a change in the recorded (and recommended) place of use. The transfer also proposes changing the recorded point of diversion from Challis Creek. Apparently, the right has historically been diverted from Challis Creek through the Highline Canal. However, the approved transfer (#3006) listed an incorrect legal description for the Highline Canal diversion, which has been listed correctly on the enclosed transfer application. In addition, the enclosed transfer application seeks to change the redirection point from the Highline Canal. The right has historically been redirected from the Highline Canal in the SENSW Section 08 (T14N, R19E), but the enclosed transfer seeks to change this redirection point to the SESESW $\frac{1}{4}$ of Section 08 (T14N, R19E). This proposed change will result in changing the redirection point to a new location, about $\frac{3}{8}$ of a mile further down the High Line Canal.

I see no reason why the enclosed transfer application can not be approved since it is based on SRBA findings. However, it should be noted that the recommended diversion rate for R72-00032N, 1.46 cfs, was based off of measurements taken at the sprinkler heads in the field(s) being irrigated. This recommended rate does not take into account possible conveyance loss of the right through the Highline Canal from Challis Creek. For this reason, there may be justification for the entire 1.90 cfs from Challis Creek, since the water from this right has traveled over 1.3 miles down the canal before reaching its historical redirection point.

Jeanie; FYI

L.T. Stevenson dropped that transfer off for Udy today. This memo describes the transfer and mentions the recommended diversion rate.

Bob & I met with claimant on 7/15/93 and returned to the property on 8/9/93 and did some water measurements. CVR completed by Janis Robertson from Bob's notes.

10/15/95: I visited the property to take some photos. Met with Mrs. Udy, briefly and she stated over in NW1/4 of Section 17 were still not being irrigated. Told her to check and get back to her on a regular recommendation. (See letter dated 6/29/95) R

NOTES:

This claim is based on the Decreed Right 72-00032 to Round Valley Irrigation (see split analysis). There was an old license to Round Valley (72-02015) but the Remarks say: apparently decree - see 72-00032. The land is not the land (1914) the decree originally referred to but was moved there through approved Transfer #3006 in 1985. Since it is a split of the Round Valley right which had the priority of 7/22/1910 and that right is under-claimed, I can recommend the priority date as claimed.

NOTES:

Claimants brought the property in 1990 and Bob found them irrigating during his exam in 1993. Even though there appears to be long periods of time when the land was not irrigated, based on aerial photos, landcat, etc., I recommended the 99 acres that Bob found irrigated. It is very difficult to prove 5 years of non-use, especially considering the drought conditions. Bob has been experiencing.

Transfer #3006 was approved in 1985. The owners had five years in which to use the water as the transfer states. Bob found no system in place on the ground in the NW1/4 of Section 17 when he was there in 1993, therefore, I am disallowing the 40 acres claimed there.

6/15/95 Spoke with Mr. Haly while "90's" airt and she said they are still not irrigating the 40 acres, but said they hoped to someday. Wondering if they still could? Told her to check file and let us know.

See letter dated 6/29/95 at back of file...

* IF NO, DESCRIBE IN NOTES BELOW HOW THE RECOMMENDED DIVERSION VOLUME FOR EACH USE WAS DETERMINED.

K. SHOULD THE CLAIMED DIVERSION VOLUME FOR EACH USE BE VERIFIED BY FIELD EXAM?

N/A(✓) Y() N()

NOTES:

Recommend to meet IOLR standard period of use: 4/15 to 10/15.

AJ CLAIM TOTAL DIVERSION RATE: 1.900 CFS

WR ROOT RIGHT TOTAL DIVERSION RATE: 1.9 CFS

A. IS THE CLAIMED TOTAL DIVERSION RATE THE SAME AS DESCRIBED IN THE WATER RIGHT FILE?

B. CAN THE CLAIMED TOTAL DIVERSION RATE BE VERIFIED USING THE WATER RIGHT FILE?

* ALL CLAIMS BASED ON BENEFICIAL USE (INCLUDING POSTED NOTICES AND STATUTORY CLAIMS) REQUIRE A FLOW MEASUREMENT.

C. IS THERE ANY INDICATION THAT THERE HAS BEEN A FIVE YEAR PERIOD OF CONTINUOUS NONUSE OF THIS RIGHT, OR ANY PORTION OF THE DIVERSION RATE?

* IF AN AMOUNT SMALLER THAN THE ORIGINAL DIVERSION RATE IS CLAIMED AND A FIELD EXAM IS NOT REQUIRED, EXPLAIN IN NOTES.

D. SHOULD THE CLAIMED DIVERSION RATE BE VERIFIED BY FIELD EXAM?

E. FLOW MEASUREMENT

MEASUREMENT METHOD

SEE ATTACHED CALCULATIONS.

F. RATE/VOLUME CALCULATIONS: (IRRIGATION)

1a. IRRIGATION RATE

ACRES 99 x 0.02 CFS/ACRE = 1.98 CFS
(Taken from pou review)IS A DIVERSION RATE PER ACRE GREATER THAN 0.02 CFS/ACRE CLAIMED? Y() N(✓)

IF YES, IS AN ADDITIONAL WATER USE FORM FILED AND ATTACHED? Y() N()

2. IRRIGATION DIVERSION VOLUME

CLAIMED DIVERSION VOLUME = AF/A

ACRES 99 x DIVERSION VOL. AF/A FOR AREA N/A =TOTAL DIVERSION VOLUME N/A AF/A

3. IRRIGATION CONSUMPTIVE USE

CLAIMED CONSUMPTIVE USE = 367.0 AF/A

ACRES 99 x CONSUMPTIVE VOL. AF/A FOR AREA 2.5 = 247.5TOTAL CONSUMPTIVE USE 247.5 AF/A

1.46 cfs (system capacity)

NOTES:

99 acres at .02 cfs per acre = 1.98 cfs
system capacity measured at 1.46 cfs, recommend 1.46 cfs

RE: SRBA CLAIM #A72-00032N

Dear Mr. & Mrs. Udy,

While in Challis a couple of weeks ago, I spoke with Mrs. Udy about the 40 acres in the NWNW of Section 17 which were not being irrigated when Bob Worstell of our department did the field exam in 1993. She stated that those lands were still not under irrigation but that you had planned and hoped to include them in your system in the future. I told her I would check and let you know the status of those acres.

After reviewing with my supervisor, it appears those 40 acres will not be recommended in the adjudication. When the Rogers applied for a transfer (a copy of which I've enclosed), they indicated those lands would be irrigated. This was in 1985. Idaho Code states that a Water Right which is not used for 5 years or more is subject to forfeiture. This appears to be the case for those 40 acres as they are still not being irrigated after 10 years.

You will be notified of our final recommendation of your water right when the Director's Report is issued for your basin sometime in the future. There are procedures and options that will be available to you at that time as far as objecting to our recommendation, etc.

If you have any questions, please feel free to give me a call at the office.

Sincerely,

Jeanie Robertson

RE: SRBA CLAIM #A72-00032N

Dear Mr. & Mrs. Udy,

While in Challis a couple of weeks ago, I spoke with Mrs. Udy about the 40 acres in the NWNW of Section 17 which were not being irrigated when Bob Worstell of our department did the field exam in 1993. She stated that those lands were still not under irrigation but that you had planned and hoped to include them in your system in the future. I told her I would check and let you know the status of those acres.

After reviewing with my supervisor, it appears those 40 acres will not be recommended in the adjudication. When the Rogers applied for a transfer (a copy of which I've enclosed), they indicated those lands would be irrigated. This was in 1985. Idaho Code states that a Water Right which is not used for 5 years or more is subject to forfeiture. This appears to be the case for those 40 acres as they are still not being irrigated after 10 years.

You will be notified of our final recommendation of your water right when the Director's Report is issued for your basin sometime in the future. There are procedures and options that will be available to you at that time as far as objecting to our recommendation, etc.

If you have any questions, please feel free to give me a call at the office.

Sincerely,

Jeanie Robertson
