Attorney for IDWR

2-16

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT

OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA	)	Subcase No. 57-11337
	)	
	)	IDWR REPORT RE: REVIEW
Case No. 39576	)	OF STANDARD FORM 5
	)	
	)	

DESCRIPTIVE SUMMARY

IDWR submits this report to inform the Court and the parties that IDWR has reviewed the Standard Form 5 submitted by the parties in this subcase and that the Director has chosen not to sign the Standard Form 5.

DISCUSSION

The Director did not sign the Standard Form 5 for the reasons set forth below:

A. The description of the elements of the water right in the Standard Form 5 are not correct as stated below:

1. [] Name and Address
2. [] Source
3. [] Quantity
4. [] Priority Date

5. [] Point of Diversion

6. [X] Purpose of Use

Although no objection was filed to the description of the purpose of use of this water right in the director's report, the Standard Form 5 seeks to change the description of the purpose of use in two ways.

First, the Standard Form 5 seeks to change the purpose of use from "STOCKWATER" to "STOCKWATER" and "WILDLIFE". Wildlife use cannot be included as a purpose of use for an instream stockwater water appropriation. Physical diversion is required for an appropriation unless an exception is established by statute. Idaho Code §§42-113 and 42-114 establish an exception to the diversion requirement for watering of domestic livestock, but no exception is provided for appropriations by the United States for wildlife purposes.

Second, the Standard Form 5 omits the further description of non-irrigation use. IDWR included in its recommendation a further description of non-irrigation uses that states: "STOCKWATER, 124 RANGE CATTLE; WILDLIFE, VARIABLE AMOUNT". This language was included pursuant to Idaho Code §42-1411(2)(f), which provides for IDWR to determine the purpose(s) of use of a water right to the extent the director deems appropriate to define and administer the water right, and 42-1411(2)(j), which further provides for IDWR to include such other matters as the director deems appropriate to define and administer the water right. IDWR recognizes that wildlife preservation is an appropriate use of public lands, and to the extent the United States has a right to water for stockwatering

purposes, wildlife might also drink from the source. This language recognizes wildlife use as incidental to stockwater use but does not recognize wildlife as a purpose of use of the water right independent from stockwater use.

Further description of stockwater uses by the type and number of head is also provided. This description of non-irrigation uses defines the water right with sufficient specificity to prevent future expansions in use that would enlarge the water right and cause injury to other water rights. This is particularly true for stockwater rights because a reasonable rate of flow (cfs) for such rights is capable of producing an annual diversion volume that is significantly in excess of the volume of water required for drinking by the stock for which the water was appropriated.

The omission of the further description of non-irrigation uses from Standard Form 5s for water rights acquired under state law by the United States for stockwater purposes is currently the subject of further proceedings in Reporting Area 1, Basin 34, Subcase No. 34-04179.

7. [] Period of Use
8. [] Place of Use
9. [] Consumptive Use
10. [X] Other Matters Necessary to Define or Administer
the Right

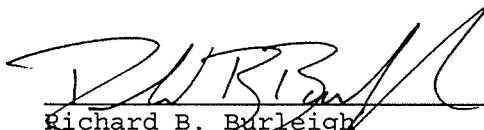

The Standard Form 5 omits the following statement, "THIS RIGHT AND OTHER RIGHTS COMMON TO THE SAME GRAZING ALLOTMENT SHALL BE LIMITED TO THE QUANTITY OF WATER BENEFICIALLY USED BY THE NUMBER OF STOCK WITHIN THE ALLOTMENT." This statement is necessary to limit

the use of this water right in combination with other rights claimed and recommended for the same use. In the case of BLM stockwater rights, combined use occurs where the BLM claims a separate right to each of a number of water sources, each for use by the full number of cattle on the allotment. Each right is quantified based on the total use for the allotment, to allow the grazing permittee to take the full amount of water needed from any combination of the sources within the allotment. Since each right is quantified based on the total use within the allotment, the combined use must also be limited to that same total, thereby avoiding the misconception that the rights are additive.

B. The Standard Form 5 was not signed by the Director for other reasons as stated below:

☐ Federal Reserved Water Right

☐ Other

Richard B. Burleigh
Deputy Attorney General
Idaho Department of Water Resources

CERTIFICATE OF MAILING

I certify that on February 15, 1996, I mailed the original and copies of this form, including all attachments, to the following persons by mailing the original and/or copies, postage prepaid and addressed as follows:

1. Original to:

Clerk of the District Court
Snake River Basin Adjudication
253 Third Avenue North
P.O. Box 2707
Twin Falls, Idaho 83303-2707

2. Copies to:

U.S. Department of Justice
Environment and Natural Resources Division
550 West Fort St., MSC 033
Boise. ID 83724
