

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM.

CIVIL CASE NUMBER: 39576

Ident. Number: **A72-00219A**
Date Received: 12/28/1989
Receipt No: S010779
Received By: _____

**NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW**

1. Name: EARL V. GARDNER 208-524-5105
Address: PO BOX 51155
IDAHO FALLS ID 83405
2. Date of Priority: MAY 1, 1919
3. Source: LITTLE WICKIUP CREEK Trib. to: SALMON RIVER, EAST FORK
4. Point of Diversion:
- | Township | Range | Section | 1/4 of | 1/4 of | 1/4 of | Lot | County |
|----------|-------|---------|--------|--------|--------|-----|--------|
| 09N | 17E | 33 | | SW | SE | | CUSTER |
5. Description of diverting works:
OPEN DITCH.
6. Water is used for the following purposes:
- | Purpose | From | To | C.F.S | (or) | A.F.A. |
|------------|-------|-------|-------|------|--------|
| IRRIGATION | 04/01 | 11/01 | 0.200 | | |
7. Total Quantity Appropriated is:
0.200 C.F.S. (and/or) A.F.A.
8. Total consumptive use is 50.0 Acre Feet Per Annum.
9. Non-irrigation uses:
10. Place of Use:

Township	Range	Section	1/4 of	1/4 of	Lot	Use	Acres
09N	17E	33	SW	NE		IRR	5.0
			NW	SE		IRR	6.0
			SW	SE		IRR	6.0
Section Acres							17.0

CHECK DOCUMENTS USED TO VERIFY POB: () ORTHOPHOTOQUAD, IDMR NO. 173; () TOPOGRAPHIC QUAD, IDMR NO. 173;

() NAPP, IDMR NO. 173 443 129; () AERIAL PHOTO; () OTHER 641060 1889-3

USDA-F

NOTES:

The mounted area has been described immediately north of the bunker at the south end of the landing strip. (See the July 7-point "photo" that's taped together.)

Photos are taken from ditch @ the bunker. Some are north and some are in air are around to the bunker area (the hole is just behind the bunker).

The area behind the hole source in the SW NE 5 area, all 7-08-20-96 initiated from the "main" ditch showing some signs, that hole.

The shipment during field work "around initiated by S.W. Dr. at around around. Some small to not around some back utility pole."

RECOMMENDATIONS:

ship founded on the same prin-
ciples of religion, modality, and
philanthropy.

Ladies Golf League news

The ladies played on Thursday
at 9:00 a.m. and 5:30 p.m. They
played a scramble. The first
place winners were Donna Allen,
Bessie Cresto and Betty Jo Fen-
wick. This same team also won
for the least putts.

On Saturday morning there
was a tournament with a good
turnout. They played a scram-
ble. The longest drive was won
by Betty Jo Fenwick. The closest
chip to the pin off the green was
won by Bessie Cresto. Closest to
the "line" was Wilma Nichols.

The first place team winners
were Carol Schmid, Angie Peas-
nall and Wilma Nichols. Second
place team winners were Mae
Kopp, Ruby McGowan and Myr-
tle Siebe. The third place team
winners were Debbie James,
Donna Allen and Bessie Cresto.

The play for next Thursday

† Obituaries

Earl V. Gardner

Earl Vernon Gardner, 75, of
Idaho Falls, former operator of
Gardner Excavating, died Au-
gust 8, 1996, at Eastern Idaho
Regional Medical Center of com-
plications following surgery.

He was born August 30, 1920,
at Rose, to Vernon Hugh and
Laura May Stanger Gardner. He
was raised and attended schools
in the Rupert area. During
World War II, he served in the
Army.

On March 4, 1943, he married
Viola Louise Allen in Idaho Falls.
He operated Gardner Excavating
in Idaho Falls. The family also
homesteaded and worked a farm
in the Rupert area and ranched
on the East Fork of the Salmon
River. He lived most of his life in
Idaho Falls.

He was a member of the LDS
Church. He enjoyed being a pi-
lot, a sportsman, and square
dancing.

He was preceded in death by
his parents. Survivors include
his wife, Viola Louise, of Idaho
Falls; children, Larry Joe Gard-
ner and Lynn E. Gardner, both
of Idaho Falls, Linda V. Gardner
of Fairbanks, Alaska, and Cora
May Drayton of Pocatello; three
brothers, Kenneth Gardner of
Corvallis, Mont., and Roy Gard-
ner and Vernon Gardner, both of
Idaho Falls; three sisters, Len-
ora Jean Carter of Desert Hot-
springs, Calif., Geneva Butler of
Idaho Falls, and Marie Gardner
of Palm Springs Calif.; and five
grandchildren.

Funeral services were held
Monday at Wood Funeral Home
in Idaho Falls, with Bishop Evan
O. Johnson of the Idaho Falls
LDS Park Taylor Ward offici-
ating. Burial was in Fielding Me-
morial Park.

Mike Rukavina (l) scored the first
Challis Golf Course during the Mario I
Golf Tournament June 22. Pictured with l
and Dick Anderson.

Hole in one!

Mike Rukavina stole the show
in the first annual Mario
D'Orazio Memorial Golf Tourna-
ment held Saturday, June 22.
Not only did Mike record the
first hole in one ever at the Chal-
lis Golf Course, he won a set of
Wilson Staff mid-sizes irons
sponsored by Dick Anderson
Auto Sales.

Mike's ace came on the 11th

RE: SRBA Claim(s) 72-00219A, 72-00219B, 72-00219C

Dear Claimant:

Please find the enclosed copy of the Notice of Completed Administrative Proceeding, which the department has filed with the SRBA Court regarding the above referenced claims. You have received this notice pursuant to SRBA Court Administrative Order 11 requiring IDWR to report to the court and interested parties any pending changes to adjudication claims in basins for which a Director's Report has been filed with the court.

Please contact this office if you have any questions about the notice or the administrative process.

Sincerely,

Trish Fawcett
Technical Records Specialist

PHILIP E. BATT
GOVERNOR

KARL J. DREHER
DIRECTOR

November 20, 1998

Dear Water Right Claimant(s):

The Idaho Department of Water Resources (IDWR) has completed its initial investigation of your water right claim(s) in the Snake River Basin Adjudication (SRBA). We have enclosed a print-out showing our preliminary recommendation regarding how your water right should be reported to the SRBA District Court.

Please review the preliminary recommendation carefully. If there is any information on the print-out you believe is inaccurate, please fill out the enclosed reply indicating what changes you believe should be made. Further instructions to assist you with the review are enclosed. For water rights with an irrigation water use, a Geographic Information System (GIS) computerized image of the place of use for your water right is also enclosed.

You may return this reply in person to us at a public meeting IDWR will be conducting in your area. **The meeting will be held on Tuesday, December 8th at 7:00 p.m. in the Challis Middle School auditorium.** Please come to the public meeting, where you will have an opportunity to find out more about the SRBA process and speak with a department staff member should you have questions regarding your water right. Please bring any and all information you have which will help the Department understand your water rights and describe them accurately.

This process is intended to ensure IDWR recommends your water right accurately to the SRBA District Court. This is the easiest and least costly means for you to identify corrections you believe should be made to our recommendation. Completion of this process is an important step toward the overall success of the adjudication in Idaho. Your participation is necessary so that accurate information is provided to the SRBA District Court.

We look forward to hearing from you.

Sincerely,

Karl J. Dreher
Director

SRBA CHAMBERS
P.O. BOX 2707
TWIN FALLS, IDAHO 83303-2707

Dear Water Right Claimant,

To help you with your water right claim(s) in the Snake River Basin Adjudication, this information is sent to you by the Idaho Department of Water Resources (IDWR). Included are the following important documents which I ask you to please read carefully because they give you the opportunity to save a great deal of time and money:

1. Preliminary Recommendation. This is IDWR's *initial* conclusion about your water right and how it should be reported to the SRBA Court. It is not filed with the court, but is provided to you to help correct errors or resolve any disagreement you may have over its content. This document has been prepared following IDWR's investigation and may be different than the claim(s) you filed.

Please review this preliminary recommendation carefully to find any errors or disagreements you have with IDWR's findings.

2. Error Correction/Settlement Process. This is a special service provided to you by IDWR to help you correct errors and resolve any other disagreement you have before the recommendations are filed with the court.

A description of how to work with IDWR is included. Our experience in the SRBA shows that by working in cooperation with IDWR most errors and differences can be addressed before coming into court. It's well worth your time to take full advantage of IDWR's helpful service. If your disagreement cannot be resolved, you will be able to file an objection to IDWR's recommendation when it is filed in court and have the final decision made by the Presiding Judge.

This error correction service is an important opportunity for you to work together with IDWR to make sure your water right claim(s) are decreed accurately. There is no cost to you other than your time reviewing the preliminary recommendation and talking to IDWR about any problem you see.

The goal of the SRBA is to see that your water right(s) are decreed by the court as accurately and fairly as possible. It is important to me that this is done efficiently in order to reduce your costs and present you with your decree.

I strongly encourage you to take full advantage of this opportunity to use the fine and courteous service provided by IDWR.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Daniel C. Hurlbutt, Jr.", is written over the typed name.

Daniel C. Hurlbutt, Jr.
Presiding Judge
Snake River Basin Adjudication

EXPLANATION OF ELEMENTS OF A WATER RIGHT

To assist you in reviewing the preliminary recommendation of your claim are the following explanations:

Water right number: This number is assigned by IDWR to identify your claim. The first two digits indicate the sub-basin of the Snake River Basin where your claim is located.

Name and address of claimant: This is the name and address shown on the notice of claim form, or on the most recent *Notice of Change of Water Right Ownership* (see enclosed form if you need to change this information) that was filed with IDWR as required by statute.

Source: The source is the natural water body to which the claimant has a right. For surface water sources, the natural water body to which the source is tributary is also shown.

Priority Date: This is the calendar date which is used to determine the relative priority of the right in relation to other rights from the same source, and is determined based on the method of appropriation (see basis of right, below). When there is insufficient water available to satisfy all existing rights, the water right holders with the oldest priorities are entitled to have their water rights satisfied before right holders with newer priorities are entitled to water.

Purpose of Use: Purpose of use indicates the general type of use made on the water, such as irrigation, domestic, or stockwater.

Period of Use: The period of use is the portion of the calendar year when water may be used for a particular purpose.

Quantity: The quantity of the right is the rate of diversion in cubic feet per second (CFS), the volume of water diverted in acre feet per calendar year (AFY), and/or the volume of water stored in AFY. The quantity for each purpose of use is shown, as well as the total quantity.

Non-irrigation Uses: If your preliminary recommendation includes purposes of use other than irrigation, then this element further describes the other purposes of use.

Point of Diversion: The point of diversion is the point at which water is diverted from the source, and is generally described by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot within which the point of diversion is located. In some instances the point of diversion is described by a legal description of the 10 acre tract (1/4 1/4 1/4 section or 1/64 section) within which the point of diversion is located.

"B" and "E" suffixes indicate the beginning and ending points of an instream flow right. "I" and "R" suffixes indicate points of injection and rediversion. Points of injection and rediversion are indicated where water is diverted from one source, injected into another source, and then rediverted, or where water from one source is exchanged with water from another source.

Place of Use: The place of use is the location where water is used, which is indicated by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot where the water is used. For irrigation rights, the number of irrigated acres in each 40 acre tract or government lot is listed.

Remarks: Remarks, if any, further describe the particular right. PLEASE REVIEW THE REMARKS CAREFULLY.

Basis of Right: The basis of right may be a decree (where the water right was previously determined by a court); posted notice (an historical method of appropriation that is no longer available); beneficial use (another historical method of appropriation that is available today only in very limited circumstances); permit (where IDWR has granted an application seeking approval of a proposed appropriation); or license (where an appropriation has been completed pursuant to permit).

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

BARNE

are arid in character and will not successfully raise any crops without the artificial application of water thereon by irrigation thereof, and that all of said lands are

capable of irrigation from the East Fork of the Salmon River and its tributaries.

3. That 1½ inches of water per acre, or its equivalent in cubic feet per second,

of time, is necessary and ample for the proper irrigation of said land.

4. That the dams and diverting works of the several parties to this action were at the time of the several appropriations, and are now, of sufficient size and capacity to carry and convey water so appropriated to and upon the several tracts of land of the several parties for the irrigation thereof, and that each and every of said ^{several} tracts of land are situated in Custer County, State of Idaho.

5. That each of the parties to this action, plaintiffs and defendants hereinafter named, or their predecessors in interest, were at the time of the several appropriations of water, made as hereinafter set forth, the owners respectively of the several tracts of land set forth and described in the complaint, answer and cross-complaint and stipulation on file herein, and that for the irrigation of the same, the said parties, or their predecessors in interest, did respectively appropriate the quantities of water hereinafter stated, and the dates and from the streams respectively hereinafter stated, and set opposite the names of each of said parties, such water being an estimate under a four inch pressure or its equivalent in cubic feet per second of time, and ever since said dates of the said several appropriations, said waters have been so diverted and used on said lands in the irrigation thereof.

6. That the certain decree of this Court made and entered on the third day of August, 1933 and of record in Book 3 of Judgments at page 350, records of Custer County,

CARDNER

077-00219 A, B & C

NARRATIVE-A72-00219A, B AND C SYSTEM DESCRIPTION AND

OVERLAP REVIEW by Frank Hitchcock 08-28-1996

GARDNER, EARL V.

The three claims filed by Gardner represent the splitting of a water right decreed 02-14-1938 for usages from three separate sources. The separation of the right into three different claims more clearly identifies the individual sources.

The **A** portion represents the entire flow of Little Wickiup Creek that flows onto the south end of the property near the airplane hangar and is diverted by a concrete check structure onto ground just north of the hangar and its concrete apron and south towards the homesite. Claimant stated that water can reach the ground near the second power pole. (see tip-out photo sequence in the file at labeled print PIX 12 that clearly shows the poles and the claimed POU)

The creek channel comes down the elevation between the homesite and the hangar. There is an abandoned Pelton wheel and related hardware just above the lane or "old" road before the channel drops down along the hangar and into the POU.

NOTE:

The ground north of the power pole is irrigated by water from Salmon River, East Fork and is claimed under another split of this decreed right as it is from a separate source. See the C portion of this base number A72-00219 for the system description that reaches the POU acres above the POU recommended for the A portion.

The **B** portion represents the majority of the flow of Wickiup Creek at the opposite, north, end of the property. The creek flow is diverted through a length of pipe positioned in the fall of the creek channel and goes down a shallow ditch that descends onto the place of use at the base of the elevation between the "old" road and the "new" road. The channel passes an abandoned mobile home on the ridge in the trees and then meanders down the side of the elevation.

The **C** portion represents the Salmon River, East Fork flows and serves the center of the subject property on the west and the east side of the runway between both the "old" road and the "new" road along the channel of the river. Claimant stated at field exam that unusually high runoff in 1973 destroyed the original diversion works and conveyance which is evidenced by the abandoned fish screen along the "new" road in the now almost silted-in ditch still

A72-00219A

GARDNER

visible while driving by.

A diversion channel extends into the Salmon River, East Fork and the flow is controlled by a headgate leading to a ditch on the east side of the river channel. The ditch makes a right angle bend and flows through a culvert set in concrete into a large metal pipe that extends across the river channel. An open ditch then passes under the road in a culvert and exits into the claimed lands in another open ditch that passes through a series of concrete check structures with metal plates.

The ditch extends from the culvert on the west side of the "new" road and can be turned to the north along the landing strip as well as under the landing strip in order to irrigate ground north of the second power pole on the hangar side or west side of the runway. Manual cuts in the ditches allows for water to be checked and turned at will along the ground claimed.

Claimed acreages are separately irrigated from their claimed sources and no overlapping occurs.

Claimant stated that he irrigates by changing water on weekends when he came up from Idaho Falls and over the years has worked out the following system:

A72-00219A: about a week to irrigate the acres at the south end of the property out of Little Wickiup Creek.

A72-00219B: about one week for irrigation of the north end of the property out of Wickiup Creek.

A72-00219C: about two weeks to irrigate the center of the property on both sides of the runway out of Salmon River, East Fork.

NOTE: Updated 09-18-1996 by FH to more completely describe the POU and the system for delivering the water to the "high ground" in the center of the ranch north of the hangar and west of the runway along the power line parallel to the "old" road.
