the first time in 1998, the 1999-2000 season was the first time in 10 years that the number of people who reported having been sexually abused in the last 12 months was higher than the number who reported not having been sexually abused in the last 12 months. This finding is consistent with the findings of the 1994-1995 survey, which found that the number of people who reported having been sexually abused in the last 12 months was higher than the number who reported not having been sexually abused in the last 12 months.
