DISCUSSION

We have studied the effect of the β -adrenergic antagonist, propranolol, on the effect of the α_1 -adrenergic agonist, phenylephrine, on the release of ^{45}Ca from the endothelial cells of the aorta. The results show that the release of ^{45}Ca from the endothelial cells is stimulated by phenylephrine in a dose-dependent manner. The release of ^{45}Ca from the endothelial cells is also stimulated by the β -adrenergic agonist, isoproterenol. The release of ^{45}Ca from the endothelial cells is inhibited by the β -adrenergic antagonist, propranolol. The release of ^{45}Ca from the endothelial cells is also inhibited by the α_1 -adrenergic antagonist, phentolamine. The results suggest that the release of ^{45}Ca from the endothelial cells is regulated by both α_1 - and β -adrenergic receptors.
