1. *What is the purpose of the study?* The purpose of the study is to determine the effect of a new teaching method on student learning outcomes in mathematics.

2. *What is the research question?* The research question is: "Does the use of a new teaching method (X) significantly improve student learning outcomes (Y) compared to traditional methods?"

3. *What is the hypothesis?* The hypothesis is that the use of the new teaching method (X) will result in significantly higher student learning outcomes (Y) compared to traditional methods.

4. *What are the variables in the study?* The independent variable is the teaching method (X), and the dependent variable is the student learning outcomes (Y).

5. *What is the significance of the study?* The significance of the study is to provide evidence for the effectiveness of the new teaching method, which can inform educational policy and practice.

6. *What are the limitations of the study?* The limitations of the study include the potential for confounding factors, the limited generalizability of the findings, and the potential for measurement error.

7. *What are the conclusions of the study?* The conclusions of the study are that the use of the new teaching method (X) significantly improved student learning outcomes (Y) compared to traditional methods.

8. *What are the implications of the study?* The implications of the study are that the new teaching method (X) should be widely adopted in schools, and further research should be conducted to explore its effectiveness in other contexts.
