INSTRUCTIONS

This form is used to file a late Notice of Claim or an amendment to a Notice of Claim in a reporting area where the Director's Report has been filed. Forms may be obtained from the SRBA Court, the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form. If you copy or reproduce this form, please copy on both sides with the even number pages upside down.

The water right number for your late or amended claim must be indicated above in the blank space following "Subcase." You must use a separate form for each late or amended Notice of Claim.

This form has been adopted by the court in *SRBA Administrative Order 1, Rules of Procedure* (amended Sept. 30, 1996), Section 4, which may be consulted for further information.

By filing a *Motion to File a Late Notice of Claim* or a *Motion to File an Amended Notice of Claim*, you certify that it is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and is not filed for any improper purpose, such as to harass, cause unnecessary delay, or needlessly increase the cost of litigation.

☒ I have read *SRBA Administrative Order I, Rules of Procedure* (amended Sept. 30, 1996).

MOTION TO FILE AN AMENDED NOTICE OF CLAIM

A *Motion to File an Amended Notice of Claim* may require a hearing before the Presiding Judge or Special Master or may be granted by leave of the court or by written consent of the parties and the Idaho Department of Water Resources (IDWR). Leave to amend a claim shall be freely given when justice so requires.

☒ I must amend my Notice of Claim to use of water in the SRBA because:

BLM filed its claims based upon provisional data from USGS regarding flows in the subject stream/river reaches. The USGS recently published its final report, therefore the claims are being amended to comport with this report. Also, the objections by the State of Idaho identified a number of issues in certain subcases with the location of Quantification Points and Beginning and Ending Points of Diversion, therefore these amendments seek to address those issues.

☒ I am providing legal and factual documentation to support my amended Notice of Claim. You must describe these documents and attach a readable copy.

See attached Notices of Claim.

I have attached:

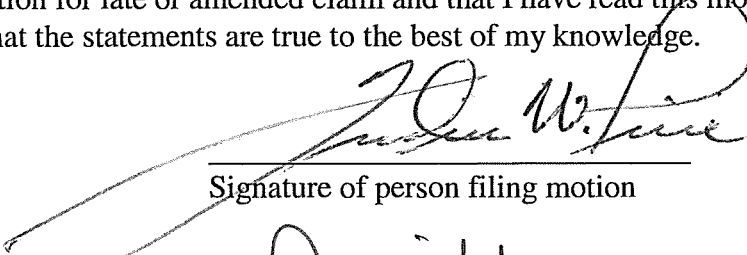

- ☒ An amended Notice of Claim (available from IDWR).

Case No. 39576	)	Federal Reserved Water Right 51-13089

1. Name and address of owner:

UNITED STATES OF AMERICA, on behalf of the
Department of the Interior, Bureau of Land Management
Idaho State Office
1387 S. Vinnell Way
Boise, Idaho 83709-1657

2. Source of water:

Wickahoney Creek, tributary to Big Jacks Creek

3. Quantity of right:

a. Stream flows at the Wickahoney Creek quantification site:

(1) When the stream flow at the Wickahoney Creek quantification site, as identified in Section 3.a.(3) below ("Wickahoney Creek quantification site"), is less than 7.53 cfs, the United States is entitled to the following flows (subject to paragraph 3.c. below):

Period of Use	Discharge (cfs)	Period of Use	Discharge (cfs)
January 1-15	0.75	July 1-15	1.14
January 16-31	0.18	July 16-31	0.27
February 1-15	0.19	August 1-15	0.11
February 16-28(29)	0.32	August 16-31	0.06
March 1-15	0.49	September 1-15	0.05
March 16-31	1.46	September 16-30	0.06
April 1-15	3.01	October 1-15	0.08
April 16-30	5.05	October 16-31	0.09

May 1-15	6.93	November 1-15	0.10
May 16-31	8.88	November 16-30	0.11
June 1-15	7.14	December 1-15	0.11
June 16-30	3.79	December 16-31	0.12

- (2) When the stream flow at the Wickahoney Creek quantification site is greater than or equal to 7.53 cfs (as adjusted by accounting for upstream junior depletions), the United States is entitled to all flows.
 - (3) The quantification site for the flows identified above at the Wickahoney Creek quantification site is the Wickahoney Creek located in SE1/4SW1/4NE1/4, Sec. 16, T.10S., R.04E., Boise Meridian; Latitude 42° 33' 25.878" N, Longitude 115° 59' 21.115" W (NAD 83).
- b. This water right does not prohibit the appropriation, diversion and use of water within the Wickahoney Creek Basin upstream from the ending point, as identified in element 5.b. below ("Wickahoney Creek Wild and Scenic River Basin"), when the stream flow at the Wickahoney Creek quantification site exceeds the flow amount in Section. 3.a.(1) and is less than 7.53 cfs.
 - c. The discharges identified in the table in Section 3.a.(1) above are intended to reflect the 20% unimpaired exceedance discharges at the Wickahoney Creek quantification site for each semi-monthly period (except for any semi-monthly period for which the discharge identified as necessary to protect recreation values exceeds the 20% exceedance discharge for that semi-monthly period). The 7.53 cfs discharge identified in the text of Section 3.a.(1), and in Section 3.a.(2) and Section 3.b. above, is intended to reflect the unimpaired 1.5 year peak flow recurrence interval discharge at the Wickahoney Creek quantification site. These discharges have been calculated based upon the best available hydrologic data and without taking into account impairment of discharges (existing upstream depletions). If additional hydrologic data and/or information concerning impairment of discharges become available that indicate a need for adjustment of the stated exceedance discharges, and/or the 1.5 year peak flow recurrence interval discharge, the claimed discharges may be modified accordingly.
 - d. This water right precludes any diversion of water out of the watershed of the Wickahoney Creek Wild and Scenic River Basin.

4. Priority date:

March 30, 2009

5. Point of diversion:

There is no diversion associated with this instream flow water right. The legal description of the beginning and ending points of the instream flow water right are as follows:

This is a federal reserved water right established pursuant to the Wild and Scenic Rivers Act, Pub. L. 90-542, 82 Stat. 906, Oct. 2, 1968 (codified as amended at 16 U.S.C. §§ 1271, et seq.), and the Omnibus Public Land Management Act of 2009, Pub.
