

1 fish propagation, wildlife and aesthetic purposes. At times, there were more than five
2 thousand (5,000) head of sheep that were watered there.

3 4. McFadden's predecessor in interest diverted sufficient water during the
4 non-irrigation season to fill two (2) miles of a six (6) foot wide canal and various ditches
5 in zero degree weather and drifting snow. I would estimate that the amount of water so
6 diverted was approximately two hundred (200) miner's inches, or four (4) cubic feet per
7 second.
8

9 Further saith your affiant not.
